Lead2Passed Adobe AD0-E124 Different Formats

With our AD0-E124 exam braindump, your success is 100% guaranteed. Not only our AD0-E124 study material can provide you with the most accurate AD0-E124 exam questions, but also offer with three different versions: PDF, Soft and APP versions. Their prolific practice materials can cater for the different needs of our customers, and all these AD0-E124 simulating practice includes the new information that you need to know to pass the test. So you can choose them according to your personal preference.

Adobe Experience Manager DevOps Engineer Expert Sample Questions (Q45-Q50):

NEW QUESTION # 45

A DevOps engineer wants to migrate a project code base into Cloud Manager. Which two actions must the DevOps engineer take to make sure the migration is successful? (Choose two.)

- A. Run the source code through a local static code quality checker and analyze the report to identify any potential issues.
- B. Build and deploy the source code repository to a local environment using the latest version of the SDK.
- C. Review the source code and make sure it meets the required standards and that all the classes have unit tests.
- D. Run the Dispatcher validator to make sure there are no errors in the Dispatcher configuration.

Answer: B,D

Explanation:

When migrating an existing AEM code base to AEM as a Cloud Service (AEMaaS), the structure and rules are strictly enforced by the Cloud Manager pipeline. Before pushing code, a DevOps engineer must validate the code locally against the AEM as a

Cloud Service SDK to ensure OSGi bundles resolve and mutable /immutable content separations are respected (Option B). Additionally, the Dispatcher configuration has migrated from an Apache-based structure to a strict AEMaaCS format. Running the local Dispatcher Validator CLI tool (Option C) is mandatory to ensure there are no syntax or structural errors in the dispatcher configurations, which would otherwise immediately fail the Cloud Manager build pipeline.

NEW QUESTION # 46

The most recent Non-Production pipeline failed for an AEM as a Cloud Service program.

The DevOps engineer is investigating and observes the following:

The pipeline failed during the Functional Testing phase.

The pipeline step log indicates a timeout error when replicating paths under a "/content/test-site" root.

The dev environment error logs and the Distribution page on Author indicate that the distribution queues are blocked on a content package.

What is causing the issue?

- A. The sling-distribution user has insufficient permissions in the Author Service.
- B. The sling-distribution user has insufficient permissions in the dev environment.
- C. Increase the timeout threshold in Cloud Manager settings.
- **D. The sling-distribution-importer user has insufficient permissions in the Publish Service.**

Answer: D

NEW QUESTION # 47

A DevOps engineer notices that the Online Revision Garbage collection is not running as part of the daily maintenance tasks. After inspecting the server's error log, the following shows up during the maintenance schedule:

"Revision GC will not run: Size delta is N% or N/N (N/N bytes), so skipping compaction for now" The DevOps engineer needs to make sure that the revision garbage collection runs during the scheduled maintenance task. Which additional step should the DevOps engineer take?

- A. Increase the size of the TarMK segment files.
- B. Set full compaction schedule property for com.adobe.granite.maintenance.crx.impl.RevisionCleanupTask to a preferred day.
- C. Invoke startRevisionGC() for SegmentRevisionGarbageCollection MBean in the JMX console.
- **D. Disable the estimation phase in the Apache Jackrabbit Oak segment-Tar Nodestore Factory.**

Answer: D

Explanation:

The Oak Segment NodeStore (TarMK) includes an "estimation phase" before running Revision Garbage Collection (Compaction). This phase calculates if enough "garbage" (unreferenced data) has accumulated to justify the heavy I/O cost of compaction. If the size delta doesn't meet the threshold, it skips the process to save resources. If a DevOps engineer must force the compaction to run regardless of the delta, they must configure the OSGi configuration for the "Apache Jackrabbit Oak Segment NodeStore Service" and disable the "Estimation Phase" by unchecking/toggling the appropriate property.

NEW QUESTION # 48

Which file is primarily responsible for managing caching rules in AEM Dispatcher?

- **A. dispatcher.any**
- B. repository.xml
- C. httpd.conf
- D. sling.properties

Answer: A

NEW QUESTION # 49

What is the correct method to submit an Adobe support request via the Admin Console?

- A. Modify the AEM error logs and send them to Adobe
- B. Log a request in CRXDE Lite
- C. Email Adobe Support directly
- **D. Use the Support Cases section in the Admin Console**

Answer: D

NEW QUESTION # 50

.....

Many people are afraid of walking out of their comfortable zones. So it is difficult for them to try new things. But you will never grow up if you reject new attempt. Now, our AD0-E124 study quiz can help you have a positive change. It is important for you to keep a positive mind. Our AD0-E124 Practice Guide can become your new attempt. And our AD0-E124 exam braindumps will bring out the most effective rewards to you as long as you study with them.
