Splunk SPLK-4001 Latest Braindumps Free & Exam SPLK-4001 Guide Materials

Do you still worry about that you can't find an ideal job and earn low wage? Do you still complaint that your working abilities can't be recognized and you have not been promoted for a long time? You can try to obtain the SPLK-4001 certification and if you pass the exam you will have a high possibility to find a good job with a high income. If you buy our SPLK-4001 questions torrent you will pass the exam easily and successfully. Our SPLK-4001 Study Materials are compiled by experts and approved by professionals with experiences for many years. We provide 3 versions for the client to choose and free update. Different version boosts different advantage and please read the introduction of each version carefully before your purchase.

Splunk O11y Cloud Certified Metrics User Sample Questions (Q22-Q27):

NEW QUESTION # 22
Which of the following are true about organization metrics? (select all that apply)

- A. Organization metrics are included for free.
- B. A user can plot and alert on them like metrics they send to Splunk Observability Cloud.
- C. Organization metrics give insights into system usage, system limits, data ingested and token quotas.
- D. Organization metrics count towards custom MTS limits.

Answer: A,B,C

Explanation:
Explanation
The correct answer is A, C, and D. Organization metrics give insights into system usage, system limits, data ingested and token quotas. Organization metrics are included for free. A user can plot and alert on them like metrics they send to Splunk Observability Cloud.
Organization metrics are a set of metrics that Splunk Observability Cloud provides to help you measure your organization's usage of the platform. They include metrics such as:
Ingest metrics: Measure the data you're sending to Infrastructure Monitoring, such as the number of data points you've sent.
App usage metrics: Measure your use of application features, such as the number of dashboards in your organization.
Integration metrics: Measure your use of cloud services integrated with your organization, such as the number of calls to the AWS CloudWatch API.
Resource metrics: Measure your use of resources that you can specify limits for, such as the number of custom metric time series (MTS) you've created1 Organization metrics are not charged and do not count against any system limits. You can view them in built-in charts on the Organization Overview page or in custom charts using the Metric Finder. You can also create alerts based on organization metrics to monitor your usage and performance1 To learn more about how to use organization metrics in Splunk Observability Cloud, you can refer to this documentation1.

NEW QUESTION # 23
To refine a search for a metric a customer types host: test-*. What does this filter return?

- A. Error
- B. Only metrics with a dimension of host and a value beginning with test-.
- C. Every metric except those with a dimension of host and a value equal to test.
- D. Only metrics with a value of test- beginning with host.

Answer: B

Explanation:
Explanation
The correct answer is A. Only metrics with a dimension of host and a value beginning with test-.
This filter returns the metrics that have a host dimension that matches the pattern test-. For example, test-01, test-abc, test-xyz, etc.
The asterisk () is a wildcard character that can match any string of characters1 To learn more about how to filter metrics in Splunk Observability Cloud, you can refer to this documentation2.
1: https://docs.splunk.com/Observability/gdi/metrics/search.html#Filter-metrics 2: https://docs.splunk.com/Observability/gdi/metrics/search.html

NEW QUESTION # 24
What constitutes a single metrics time series (MTS)?

- A. A series of timestamps that all reflect the same metric.
- B. A set of data points that all have the same metric name and list of dimensions.
- C. A set of metrics that are ordered in series based on timestamp.
- D. A set of data points that use different dimensions but the same metric name.

Answer: B

Explanation:
Explanation
The correct answer is B. A set of data points that all have the same metric name and list of dimensions.
A metric time series (MTS) is a collection of data points that have the same metric and the same set of dimensions. For example, the following sets of data points are in three separate MTS:
MTS1: Gauge metric cpu.utilization, dimension "hostname": "host1" MTS2: Gauge metric cpu.utilization, dimension "hostname": "host2" MTS3: Gauge metric memory.usage, dimension "hostname": "host1" A metric is a numerical measurement that varies over time, such as CPU utilization or memory usage. A dimension is a key-value pair that provides additional information about the metric, such as the hostname or the location. A data point is a combination of a metric, a dimension, a value, and a timestamp1

NEW QUESTION # 25
Which of the following can be configured when subscribing to a built-in detector?

- A. Alerts on a dashboard.
- B. Alerts on team landing page.
- C. Outbound notifications.
- D. Links to a chart.

Answer: C

Explanation:
Explanation
According to the web search results1, subscribing to a built-in detector is a way to receive alerts and notifications from Splunk Observability Cloud when certain criteria are met. A built-in detector is a detector that is automatically created and configured by Splunk Observability Cloud based on the data from your integrations, such as AWS, Kubernetes, or OpenTelemetry1. To subscribe to a built-in detector, you need to do the following steps:
Find the built-in detector that you want to subscribe to. You can use the metric finder or the dashboard groups to locate the built-in detectors that are relevant to your data sources1.
Hover over the built-in detector and click the Subscribe button. This will open a dialog box where you can configure your subscription settings1.
Choose an outbound notification channel from the drop-down menu. This is where you can specify how you want to receive the alert notifications from the built-in detector. You can choose from various channels, such as email, Slack, PagerDuty, webhook, and so on2. You can also create a new notification channel by clicking the + icon2.
Enter the notification details for the selected channel. This may include your email address, Slack channel name, PagerDuty service key, webhook URL, and so on2. You can also customize the notification message with variables and markdown formatting2.
Click Save. This will subscribe you to the built-in detector and send you alert notifications through the chosen channel when the detector triggers or clears an alert.
Therefore, option C is correct.

NEW QUESTION # 26
Which of the following is optional, but highly recommended to include in a datapoint?

- A. Value
- B. Timestamp
- C. Metric type
- D. Metric name

Answer: C

Explanation:
Explanation
The correct answer is D. Metric type.
A metric type is an optional, but highly recommended field that specifies the kind of measurement that a datapoint represents. For example, a metric type can be gauge, counter, cumulative counter, or histogram. A metric type helps Splunk Observability Cloud to interpret and display the data correctly1 To learn more about how to send metrics to Splunk Observability Cloud, you can refer to this documentation2.
