C_THR92_2505 인기 자격증 시험 대비 자료 시험 준비에 가장 좋은 시험 기출문제

SAP 인증 C_THR92_2505 시험은 IT 인증 시험 중 가장 인기 있는 시험입니다. SAP 인증 C_THR92_2505 시험 패스는 모든 IT 인사의 로망입니다. Pass4Test의 완벽한 SAP 인증 C_THR92_2505 덤프로 시험 준비하여 고득점으로 자격증을 따보세요.

SAP C_THR92_2505 시험 요약:

주제	소개
주제 1	<ul style="list-style-type: none"> Report Consumers: This domain evaluates the understanding of a Business User and focuses on how report consumers interact with and utilize generated reports. It highlights user roles, permissions, and effective report sharing practices to ensure reports serve decision-making needs.

주제 2	<ul style="list-style-type: none"> Table Reports: This part measures the skills of a Data Analyst and involves creating, managing, and running Table Reports. It focuses on designing tabular data presentations that facilitate straightforward access to detailed workforce analytics information.
주제 3	<ul style="list-style-type: none"> Detailed Reporting Tool with Live Data: This section assesses the skills of an Advanced Report Developer and involves working with detailed reports that use live data feeds. It includes building customizable queries and using reporting tools to deliver real-time, actionable data to stakeholders.
주제 4	<ul style="list-style-type: none"> Story Reports: This section of the exam measures skills of a Report Creator and covers the creation and management of Story Reports within SAP SuccessFactors. It emphasizes designing queries, configuring pages with widgets, and managing report permissions to generate insightful visualizations.

최신 SAP Certified Associate C_THR92_2505 무료샘플문제 (Q40-Q45):

질문 # 40

What permission type applied to table reports is defined by a combination of the user's View permissions and Target Population in role-based permissions?

- A. Row level permission
- B. Cell level permission
- C. Field level permission
- D. Run report permission

정답: A

설명:

* Row Level Permissions Overview:

* In SAP SuccessFactors Table Reports, row-level permissions control which rows of data a user can access based on their role-based permissions (RBP).

* These permissions depend on the combination of the user's View permissions (fields they are allowed to see) and Target Population (the subset of employees they are authorized to access).

* How It Works:

* The system evaluates both the target population and the view permissions to determine the rows visible to the user in a table report.

* For example, if a manager has access to employees in their team but no view permissions for compensation fields, the data rows related to compensation will not be visible.

질문 # 41

In addition to any chart filter you may have applied to your chart, which other filters may be affecting the chart filter, due to the Cascading effect in a Story? Note: There are 2 correct answers to this question.

- A. Table
- B. Story
- C. Query
- D. Page

정답: B,D

설명:

* Cascading Effect in Story Filters

* Story filters, page filters, and chart filters can influence each other due to cascading logic. Filters applied at higher levels (e.g., Story or Page) cascade down to affect lower levels (e.g., charts).

* Explanation of Correct Answers

* B (Page): Filters applied at the page level affect all charts on that page.

* C (Story): Filters applied at the story level cascade to all pages and charts within the story.

* Why Other Options are Incorrect

* A (Table): Table filters do not cascade to charts.

* D (Query): Query filters are independent and do not cascade.

질문 # 42

As a report owner, you want to share a table report with a user. What must you configure to ensure the user can access data? Note: There are 2 correct answers to this question.

- A. Report creation People step
- B. Report creation User Prompted Filters step
- C. Reports Permission: Run Report
- D. Reports Permission: Create Report

정답: A,C

설명:

* Sharing Table Reports

* To ensure a user can access data in a shared table report, two configurations are required:

* Reports Permission: Run Report: This allows the user to run the shared report.

* Report creation People step: The report owner must ensure that the user is included in the People step during report creation to grant access to the data.

* Why Other Options are Incorrect

* A. Create Report: This permission is for report creation, not running or accessing shared reports.

* C. User Prompted Filters step: This is unrelated to sharing or data access configuration.

질문 # 43

A user wants to build a pivot chart based on a list report that has a run-time filter. What must the user do?

- A. Create a filter group within the run-time filter before building the report.
- B. Create the run-time filter before building the report.
- C. Create the pivot chart after adding the run-time filter.
- D. Create the pivot chart before adding the run-time filter.

정답: C

설명:

* Pivot Chart Creation Process

* To build a pivot chart based on a list report with a run-time filter, the filter must first be added to ensure the data being visualized reflects the selected filter criteria.

* Explanation of Correct Answer

* A pivot chart dynamically organizes and summarizes data. Adding the run-time filter beforehand ensures the chart is based on the filtered dataset.

* Creating the chart after applying the filter allows for a more accurate representation of the desired data.

* Why Other Options are Incorrect

* A: Filter groups are unrelated to this scenario.

* B: Creating the chart before the filter would lead to inaccurate results.

* C: While adding the filter first is correct, the chart must be created after this step.
