## Salesforce Certified Sharing and Visibility Architect Sample Questions (Q14-Q19):

### NEW QUESTION # 14

A custom ServiceFeedback object is used to collect partner feedback.

ServiceFeedback records should be available to all internal employees. The organization-wide default (OWD) is set to Private for external users so partners cannot see feedback from other partner users.

How should the architect give access to all internal employees?

- A. Create an owner based sharing rule for all Service Feedback records owned by partners.
- **B. Set the OWD for Internal Users to Public Read-Only.**
- C. Ensure all the internal users are above the partners in the Role Hierarchy.

**Answer: B**

### NEW QUESTION # 15

A Visualforce controller has a requirement to be written with "Without Sharing" at the top level; however, certain methods within the page still need to enforce the user permissions for creating records and accessing certain fields. Which two methods below would be used to enforce this requirements?

Choose 2 answers.

- A. `Schema.DescribeFieldResult`
- B. `UserInfo.getProfileID`
- C. `Schema.getGlobalDescribe`
- D. `Schema.DescribeSObjectResult`

**Answer: A,D**

Explanation:

Explanation

The two methods that would be used to enforce this requirement are A and D. `Schema.DescribeFieldResult` and `Schema.DescribeSObjectResult` can be used to check the user permissions for creating records and accessing certain fields, even if the Visualforce controller is written with "Without Sharing". The other options are either not related to field or object permissions, or not sufficient to enforce them.

### NEW QUESTION # 16

At Universal Containers, there's a team of auditors distributed throughout the organization that all need access to high-value opportunities.

With a Private sharing model, which option should an architect recommend when designing a solution for this requirement?

- A. Create a criteria-based sharing rule to grant a public group access to high-value opportunities.
- B. Put the auditors at the highest level of the Role Hierarchy.
- C. Add the auditors to the default Opportunity Team.

**Answer: A**

### NEW QUESTION # 17

Universal Containers (UC) operates worldwide with offices in more than 100 regions in 10 different countries role hierarchy to control data visibility. In the new fiscal year, UC is planned to reorganize the roles and reassign accounts owners. Which two points should an architect consider in this situation?

Which two point should an Architect consider in this situation?

Choose 2 answers

- A. Replacing Account records ownerships massively can cause data skew.
- B. Using a temporary parking lot account to improve performance.
- C. Changing complex role hierarchy can cause a high level of sharing recalculation.
- D. Restricting the organization-sharing configurations to private.

**Answer: A,C**

### NEW QUESTION # 18

Besides their own team accounts, sales managers at Universal Containers need to have READ access to all accounts of the same segment in other countries. Role hierarchy was implemented accordingly (based on countries), but a sales manager in the US is complaining that he cannot view account records of the same segment in Canada. What should be done to grant access in a proper way?

- A. Create a public group and include all accounts of the same segment and grant access through a permission set.
- B. Create an owner-based sharing rule to grant access to account records that have the same segment to all sales manager roles.
- C. Create criteria-based sharing rules to grant access to account records that have the same segment to all sales manager roles.
