

# JN0-336 Interactive Testing Engine, JN0-336 Latest Test Pdf

2025 Latest Braindumpsqa JN0-336 PDF Dumps and JN0-336 Exam Engine Free Share: <https://drive.google.com/open?id=13v6MZwpIOsFbgBeAB0dy86iuJLB-I3HE>

Our JN0-336 exam torrents enjoy both price and brand advantage at the same time. We understand you not only consider the quality of our Security, Specialist (JNCIS-SEC) prepare torrents, but price and after-sales services and support, and other factors as well. So our Security, Specialist (JNCIS-SEC) prepare torrents contain not only the high quality and high accuracy JN0-336 Test Braindumps but comprehensive services as well. With the assistance of our JN0-336 exam torrents, you will be more distinctive than your fellow workers, because you will learn to make full use of your fragmental time to achieve your goals.

Our JN0-336 study materials are designed carefully. We have taken all your worries into consideration. Also, we adopt the useful suggestions about our JN0-336 study materials from our customers. Now, our study materials are out of supply. Thousands of people will crowd into our website to choose the JN0-336 study materials. So people are different from the past. Learning has become popular among different age groups. Our JN0-336 Study Materials truly offer you the most useful knowledge. You can totally trust us. We are trying our best to meet your demands. Why not give our Juniper study materials a chance? Our products will live up to your expectations.

## 100% Pass 2026 Juniper JN0-336 –High-quality Interactive Testing Engine

There is no doubt that among our three different versions of JN0-336 guide torrent, the most prevalent one is PDF version, and this is particularly suitable and welcomed by youngsters. There are some features of this version: first of all, PDF version of our JN0-336 prep guide can be printed into paper, though which you are able to do some note-writing and highlight the important exam points. There is an old saying goes, good memory is inferior to sodden ability to write, so we believe that it is a highly productive way for you to memory the knowledge point and review the reference books more effectively. Besides our JN0-336 Exam Torrent support free demo download, as we mentioned before, it is an ideal way for you to be fully aware of our JN0-336 prep guide and then purchasing them if suitable and satisfactory.

## Juniper Security, Specialist (JNCIS-SEC) Sample Questions (Q70-Q75):

### NEW QUESTION # 70

On an SRX Series firewall, what are two ways that Encrypted Traffic Insights assess the threat of the traffic? (Choose two.)

- A. It reviews the timing and frequency of the connections.
- B. It validates the certificates used.
- C. It decrypts the data to validate the hash.
- D. It decrypts the file in a sandbox.

**Answer: A,B**

Explanation:

Encrypted Traffic Insights is a feature that enables the SRX Series firewall and the ATP Cloud to detect malicious threats that are hidden in encrypted traffic without decrypting the traffic. It does so by analyzing the metadata and connection patterns of the encrypted sessions.

Two ways that Encrypted Traffic Insights assess the threat of the traffic are:

It validates the certificates used: The SRX Series firewall extracts the server certificate from the encrypted session and compares its signature with a blocklist of known malicious certificates provided by ATP Cloud. If there is a match, the session is blocked and reported as a threat.

It reviews the timing and frequency of the connections: The SRX Series firewall sends the connection details, such as source and destination IP addresses, ports, protocols, and timestamps, to ATP Cloud.

ATP Cloud applies behavior analysis and machine learning algorithms to detect anomalous or suspicious patterns of connections, such as high frequency, low duration, or unusual timing. Reference: = Juniper Networks Expands Connected Security Portfolio with Encrypted Traffic Analysis for Juniper Advanced Threat Prevention and SecIntel for Mist Wireless, Encrypted Traffic Insights Overview, Configure Encrypted Traffic Insights

### NEW QUESTION # 71

Exhibit

```
[edit security policies from-zone trust to-zone untrust]
user@host# show
policy permit-http {
    match {
        source-address 172.25.11.0/24;
        destination-address any;
        application http;
    }
    then {
        permit;
    }
}
[edit security policies from-zone trust to-zone untrust]
user@host# commit
[edit security policies from-zone trust to-zone untrust policy permit-http match
application]
'http
application or application-set must be defined
error: commit failed: (statements constraint check failed)
```

You are trying to create a security policy on your SRX Series device that permits HTTP traffic from your private 172.25.11.0/24 subnet to the Internet. You create a policy named permit-http between the trust and untrust zones that permits HTTP traffic. When you issue a commit command to apply the configuration changes, the commit fails with the error shown in the exhibit.

Which two actions would correct the error? (Choose two.)

- A. Create a custom application named http at the [edit applications] hierarchy.
- B. Modify the security policy to use the built-in Junos-http applications.
- C. Execute the Junos commit full command to override the error and apply the configuration.
- D. Issue the rollback 1 command from the top of the configuration hierarchy and attempt the commit again.

**Answer: A,B**

Explanation:

The error message indicates that the Junos-http application is not defined, so you need to either create a custom application or modify the security policy to use the built-in Junos-http application. Doing either of these will allow you to successfully commit the configuration.

#### NEW QUESTION # 72

Which two statements are correct about SSL proxy server protection? (Choose two.)

- A. You must import the root CA on the servers.
- B. You do not need to configure the servers to use the SSL proxy the function on the SRX Series device.
- C. You must load the server certificates on the SRX Series device.
- D. The servers must be configured to use the SSL proxy function on the SRX Series device.

**Answer: B,C**

Explanation:

When using SSL proxy, the servers themselves do not require any special configuration to utilize the SSL proxy function on the SRX device. The SSL proxy operates transparently, intercepting and decrypting SSL/TLS traffic before it reaches the servers.

For the SSL proxy to function effectively, especially in server protection mode where it impersonates the server to the client, it is necessary to load the server's certificates onto the SRX device. This allows the SRX to establish a trusted connection with the client using the server's credentials.

#### NEW QUESTION # 73

You want to set up JSA to collect network traffic flows from network devices on your network.

Which two statements are correct when performing this task? (Choose two.)

- A. Statistical sampling increases processor utilization
- B. BGP FlowSpec is used to collect traffic flows from Junos OS devices.
- C. Superflows reduce traffic licensing requirements.
- D. Statistical sampling decreases event correlation accuracy.

**Answer: C,D**

Explanation:

Statistical sampling involves collecting a representative subset of data rather than examining all traffic.

While this method decreases processor utilization by reducing the volume of data that must be analyzed and stored, it can also lead to decreased accuracy in event correlation because not all events are captured.

Superflows in JSA are aggregated flow records that represent summaries of multiple flow records. This aggregation reduces the number of flows that need to be processed and stored, which can help in managing licensing requirements related to the volume of traffic being analyzed, especially in environments with high traffic volumes.

#### NEW QUESTION # 74

What are three capabilities of AppQoS? (Choose three.)

- A. assign a forwarding class
- B. reserve bandwidth
- C. re-write DSCP values
- D. re-write the TTL
- E. rate-limit traffic

**Answer: A,C,E**

Explanation:

AppQoS can modify the DSCP (Differentiated Services Code Point) values in IP packet headers. This is crucial for defining the level of service for each packet, influencing how network devices prioritize traffic.

It can assign traffic to specific forwarding classes. This feature allows network administrators to group different types of traffic (e.g., VoIP, streaming, bulk data) into categories that are treated differently based on predefined network policies, ensuring that critical applications receive the necessary bandwidth and priority.

AppQoS is capable of rate-limiting traffic, which involves setting a maximum bandwidth limit for certain types of traffic. This ensures that no single application or service consumes more bandwidth than allocated, thus preventing network congestion and ensuring fair bandwidth distribution among all applications.

These features are essential for managing network performance and ensuring that critical applications receive the necessary resources to function effectively. AppQoS does not inherently include capabilities to re-write TTL (Time To Live) values or reserve bandwidth as primary functions, but it manages bandwidth usage through rate limiting and priority settings.

## NEW QUESTION # 75

.....

Braindumpsqa JN0-336 product in above-mentioned three formats carries most probable real exam questions. Every person who attempts the exam has different preparation style. Some want to do in-depth study while some prefer quick Security, Specialist (JNCIS-SEC) test preparation. Braindumpsqa has introduced these three formats so every applicant of the test can prepare as per unique learning styles. In addition, we offer up to 1 year of free questions updates, free demos, discounts, and a 24/7 customer support. Don't miss these incredible offers. Purchase real exam questions today.
