FreeDumps Cisco 350-701 exam training materials praised by the majority of candidates is not a recent thing. This shows FreeDumps Cisco 350-701 exam training materials can indeed help the candidates to pass the exam. Compared to other questions providers, FreeDumps Cisco 350-701 exam training materials have been far ahead. uestions broad consumer recognition and reputation, it has gained a public praise. If you want to participate in the Cisco 350-701 Exam, quickly into FreeDumps website, I believe you will get what you want. If you miss you will regret, if you want to become a professional IT expert, then quickly add it to cart.

Each IT person is working hard for promotion and salary increases. It is also a reflection of the pressure of modern society. We should use the strength to prove ourselves. Participate in the Cisco 350-701 exam please. In fact, this examination is not so difficult as what you are thinking. You only need to select the appropriate training materials. FreeDumps's Cisco 350-701 Exam Training materials is the best training materials. Select the materials is to choose what you want. In order to enhance your own, do it quickly.

## High Pass-Rate Cisco 350-701 Latest Test Vce Are Leading Materials & Reliable 350-701: Implementing and Operating Cisco Security Core Technologies

The passing rate of our 350-701 study materials is the issue the client mostly care about and we can promise to the client that the passing rate of our product is 99% and the hit rate is also high. Our 350-701 study materials are selected strictly based on the real 350-701 exam and refer to the exam papers in the past years. Our expert team devotes a lot of efforts on them and guarantees that each answer and question is useful and valuable. We also update frequently to guarantee that the client can get more 350-701 learning resources and follow the trend of the times. So if you use our study materials you will pass the test with high success probability.

## Cisco Implementing and Operating Cisco Security Core Technologies Sample Questions (Q369-Q374):

### NEW QUESTION # 369

How does Cisco Umbrella archive logs to an enterprise owned storage?

- A. by using the Application Programming Interface to fetch the logs
- B. by the system administrator downloading the logs from the Cisco Umbrella web portal
- C. by being configured to send logs to a self-managed AWS S3 bucket
- D. by sending logs via syslog to an on-premises or cloud-based syslog server

**Answer: C**

Explanation:

The Cisco Umbrella Multi-Org console has the ability to upload, store, and archive traffic activity logs from your organizations' Umbrella dashboards to the cloud through Amazon S3. CSV formatted Umbrella logs are compressed (*gzip*) and uploaded every ten minutes so that there's a minimum of delay between traffic from the organization's Umbrella dashboard being logged and then being available to download from an S3 bucket.

By having your organizations' logs uploaded to an S3 bucket, you can then download logs automatically to keep in perpetuity in backup storage.

### NEW QUESTION # 370

What is the purpose of the certificate signing request when adding a new certificate for a server?

- A. It provides the server information so a certificate can be created and signed
- B. It is the password for the certificate that is needed to install it with.
- C. It provides the certificate client information so the server can authenticate against it when installing
- D. It is the certificate that will be loaded onto the server

**Answer: A**

Explanation:

Explanation

Explanation

A certificate signing request (CSR) is one of the first steps towards getting your own SSL Certificate. Generated on the same server you plan to install the certificate on, the CSR contains information (e.g. common name, organization, country) that the Certificate Authority (CA) will use to create your certificate. It also contains the public key that will be included in your certificate and is signed with the corresponding private key

### NEW QUESTION # 371

An organization is trying to improve their Defense in Depth by blocking malicious destinations prior to a connection being established. The solution must be able to block certain applications from being used within the network Which product should be used to accomplish this goal?

- A. Cisco Umbrella
- B. AMP
- C. Cisco Firepower
- D. ISE

**Answer: C**

Explanation:

Explanation

Cisco Umbrella uses the internet's infrastructure to block malicious destinations before a connection is ever established. Umbrella uses DNS to stop threats over all ports and protocols – even direct-to-IP connections. Stop malware before it reaches your endpoints or network.

### NEW QUESTION # 372

What is a characteristic of Cisco ASA Netflow v9 Secure Event Logging?

- A. It provides stateless IP flow tracking that exports all records of a specific flow.
- B. Its events match all traffic classes in parallel.
- **C. It tracks flow-create, flow-teardown, and flow-denied events.**
- D. It tracks the flow continuously and provides updates every 10 seconds.

**Answer: C**

Explanation:

Explanation The ASA and ASASM implementations of NetFlow Secure Event Logging (NSEL) provide a stateful, IP flow tracking method that exports only those records that indicate significant events in a flow. The significant events that are tracked include flow-create, flow-teardown, and flow-denied (excluding those flows that are denied by EtherType ACLs). Reference:

<https://www.cisco.com/c/en/us/td/docs/security/asa/asa92/configuration/general/asa-general-cli/monitor-nse.html> The ASA and ASASM implementations of NetFlow Secure Event Logging (NSEL) provide a stateful, IP flow tracking method that exports only those records that indicate significant events in a flow.

The significant events that are tracked include flow-create, flow-teardown, and flow-denied (excluding those flows that are denied by EtherType ACLs).

### NEW QUESTION # 373

Refer to the exhibit.

```
Info: New SMTP ICID 30 interface Management (192.168.0.100)
address 10.128.128.200 reverse dns host unknown verified no
Info: ICID 30 ACCEPT SG SUSPECTLIST match sbrs[none] SBRS None
Info: ICID 30 TLS success protocol TLSv1 cipher
DHE-RSA-AES256-SHA
Info: SMTP Auth: (ICID 30) succeeded for user: cisco using
AUTH mechanism: LOGIN with profile: ldap_smtp
Info: MID 80 matched all recipients for per-recipient policy
DEFAULT in the outbound table
```

Which type of authentication is in use?

- A. SMTP relay server authentication
- B. external user and relay mail authentication
- **C. LDAP authentication for Microsoft Outlook**
- D. POP3 authentication

**Answer: C**

Explanation:

The TLS connections are recorded in the mail logs, along with other significant actions that are related to messages, such as filter actions, anti-virus and anti-spam verdicts, and delivery attempts. If there is a successful TLS connection, there will be a TLS success entry in the mail logs. Likewise, a failed TLS connection produces a TLS failed entry. If a message does not have an associated TLS entry in the log file, that message was not delivered over a TLS connection.

Reference: <https://www.cisco.com/c/en/us/support/docs/security/email-security-appliance/118844-technoteesa-00.html> The exhibit in this Q shows a successful TLS connection from the remote host (reception) in the mail log.

### NEW QUESTION # 374

.....

For candidates who are going to buy the exam dumps for the exam, the quality must be one of the most standards while choosing the exam dumps. 350-701 exam dumps are high quality and accuracy, since we have a professional team to research the first-rate information for the exam. We have reliable channel to ensure that 350-701 Exam Materials you receive is the latest one. We offer you free update for one year, and the update version for 350-701 exam materials will be sent to your automatically. We have online
