

# Cisco Braindumps 300-620 Downloads: Implementing Cisco Application Centric Infrastructure - LatestCram Instant Download

2026 Latest LatestCram 300-620 PDF Dumps and 300-620 Exam Engine Free Share: [https://drive.google.com/open?id=1zGeN\\_dZXzd7uhbHDGGxueuBaz\\_ChR8-p](https://drive.google.com/open?id=1zGeN_dZXzd7uhbHDGGxueuBaz_ChR8-p)

If you want to pass the Implementing Cisco Application Centric Infrastructure exam as shortly as possible, we will provide you the 300-620 exam dumps to help you to pass it. You only need to practice the Implementing Cisco Application Centric Infrastructure exam dumps for about 20 to 70 hours, you can pass it successfully. Our Implementing Cisco Application Centric Infrastructure exam braindumps will save your time as well as improve your efficiency. Since the skilled professionals will guide you through your practice 300-620 the exam dumps.

## Conclusion

Earning a certification is a good opportunity for you to upgrade yourself, and the certificates offered by Cisco can easily boost your marketability. Pass 300-620 Exam to improve and validate your skills, improve your confidence, and gain extra recognition for your competence. With its related specialist-level and CCNP accreditations, you can opt for a variety of lucrative jobs, so go for it!

## Verified 300-620 Answers & Pass Leader 300-620 Dumps

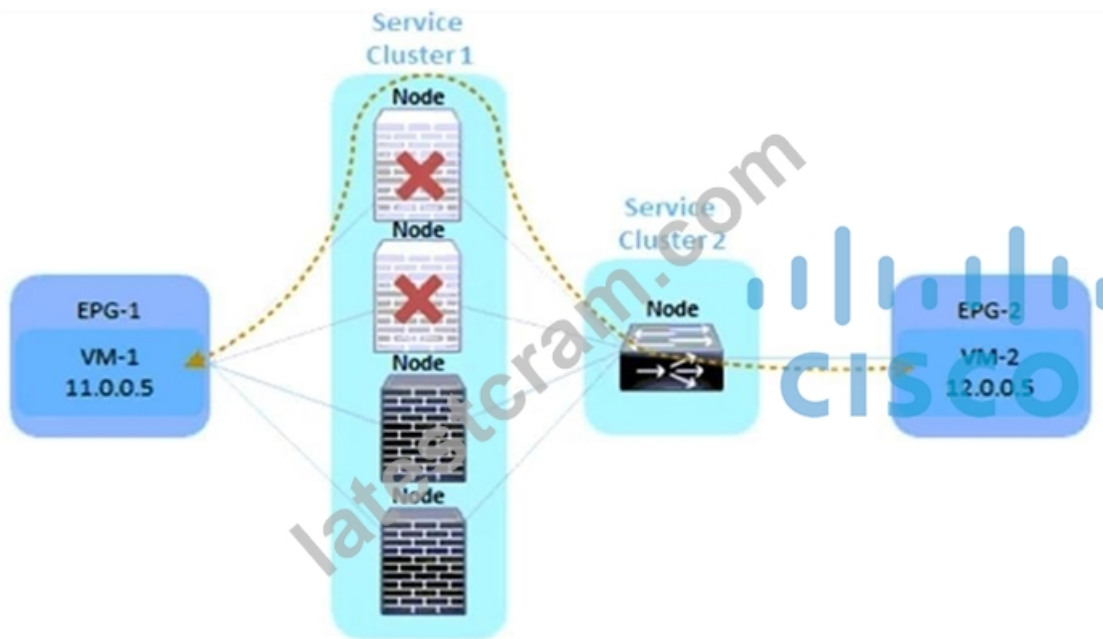

The exam outline will be changed according to the new policy every year, and the 300-620 questions torrent and other teaching software, after the new exam outline, we will change according to the syllabus and the latest developments in theory and practice and revision of the corresponding changes, highly agree with outline. The 300-620 Exam Questions are the perfect form of a complete set of teaching material, teaching outline will outline all the knowledge points covered, comprehensive and no dead angle for the 300-620 candidates presents the proposition scope and trend of each year.

To pass the Cisco 300-620 exam, candidates need to demonstrate their understanding of ACI architecture, policies, and operations, as well as their ability to configure and troubleshoot ACI fabric components, such as switches, routers, and controllers. 300-620 Exam also covers topics related to automation and orchestration, including the use of APIs and scripting languages to automate routine tasks and the integration of ACI with other IT systems and services.

## Cisco Implementing Cisco Application Centric Infrastructure Sample Questions (Q180-Q185):

### NEW QUESTION # 180

Refer to the exhibit. An engineer must divert the traffic between VM-1 and VM-2 by using a Multi-Node service graph. The solution should prevent an insufficient number of available Layer 4 to Layer 7 devices in the first cluster. Which configuration set accomplishes this goal?

- A. PBR node tracking  
tracking threshold with action bypass  
symmetric PBR  
resilient hashing
- B. PBR node tracking  
tracking threshold with action permit  
unidirectional PBR  
resilient hashing
- C. PBR node tracking  
tracking threshold with action permit  
symmetric PBR  
resilient hashing
- D. PBR node tracking  
tracking threshold with action deny  
symmetric PBR  
unidirectional PBR

**Answer: A**

Explanation:

#### Down action

PBR node tracking offers a configurable behavior for the case in which the number of available PBR destinations in the PBR policy falls below the minimum percentage set as the threshold, as explained in the previous section. This configurable behavior is called down action. Available down action options are listed in [Table 17](#).

**Table 17.** Down action options

Down action	Cisco ACI release when first introduced	Behavior	Use case
Permit (default)	2.2(3j)	Traffic directly goes to destination without PBR.	Skip over optional service node in 1 node service graph.
Deny	3.1	Traffic is dropped.	Mandate service insertion.
Bypass	4.1.2	Traffic is redirected to next PBR node in the service graph.	Skip over optional service node in Multi nodes service graph.

#### NEW QUESTION # 181

Refer to the exhibit. VM1 and VM2 are in Cisco ACI POD1 and communication takes place. Which event is triggered when VM2 is live migrated from POD1 to POD2?

- A. Spines from POD2 send an MP-BGP EVPN update to the leaves in POD1 about the new location of VM2.
- B. Leaf 102 installs a bounce entry for VM2 pointing to the PTEP address of leaf 201.
- C. An MP-BGP EVPN update is received by spines in POD1 announcing the reachability of VM2 via the proxy VTEP address of the spines in POD2.
- **D. Leaf 201 creates a tunnel with leaf 102 because of the bounced traffic that is destined to VM2.**

**Answer: D**

#### NEW QUESTION # 182

What represents the unique identifier of an ACI object?

- **A. distinguished name**
- B. universal resource identifier (URI)
- C. management information tree
- D. application programming interface

**Answer: A**

#### NEW QUESTION # 183

In the context of VMM, which protocol between ACI leaf and compute hosts ensures that the policies are pushed to the leaf switches for immediate and on demand resolution immediacy?

- **A. VXLAN**
- B. STP
- C. ISIS
- D. LLDP

**Answer: A**
