CBCI Antworten, CBCI Vorbereitungsfragen

Wollen Sie Ihre IT-Fähigkeiten in kürzester Zeit erhöhen, aber zugleich sorgen Sie noch darum, dass Ihnen geeignete Lernmaterialien fehlen? Machen Sie jetzt keine Sorgen, denn solange Sie über die Fragenkataloge zur BCI CBCI Zertifizierungsprüfung von EchteFrage verfügen, können Sie mit jeder IT-Prüfung leicht fertig werden. Unsere Fragenkataloge zur BCI CBCI Zertifizierungsprüfung sind von den erfahrenen IT-Experten durch langjährige ständige Untersuchung und Erforschung bearbeitet.

EchteFrage wird Ihre beste Wahl sien.

BCI CBCI Prüfungsplan:

Thema	Einzelheiten
Thema 1	• Validation: This final module emphasizes testing and verifying the effectiveness of implemented plans through exercises and reviews—ensuring that what was designed and implemented actually performs as intended under real-world conditions.
Thema 2	• Design: Here, learners explore how to translate analysis into strategic plans by developing continuity designs that mitigate identified risks, ensuring critical operations remain functional or can be quickly restored during disruptions.
Thema 3	• Policy and Programme Management and Embedding: This part guides users through establishing a Business Continuity Management System (BCMS), including how to craft governance, define a policy, and embed these elements into the fabric of an organization for long-term sustainability.
Thema 4	• Analysis This module dives into the analytical stage, focusing on tools such as Business Impact Analysis (BIA) and risk assessment to identify critical functions and vulnerabilities—essential for understanding what the organization must protect and why.

BCI Certificate of the Business Continuity Institute (CBCI) CBCI Prüfungsfragen mit Lösungen (Q47-Q52):

47. Frage

Which of the following is demonstrated where an organization includes Business Continuity in induction processes and sets Business Continuity objectives for personnel?

- A. The use of validation
- B. The organization's approach to risk assessment
- C. The role of the Business Continuity professional
- **D. The organization's Business Continuity culture**

Antwort: D

Begründung:

Embedding Business Continuity into induction and setting objectives for personnel clearly indicates amature Business Continuity culture. The CBCI 7.0 course details that a strong culture is characterized by widespread awareness, commitment, and integration of Business Continuity principles into everyday activities. Including continuity in induction familiarizes new staff with the organization's resilience expectations, while individual objectives reinforce personal accountability. This cultural embedding supports sustainable continuity practices and improves the likelihood of effective responses during disruptions. It reflects a proactive organizational mindset rather than isolated activities or roles.

Reference:CBCI 7.0 Study Guide, Module 4: Business Continuity Culture, pages 65-70.

48. Frage

Which type of exercise is always carried out in the normal operational environment, alternative premises, or command centres and is designed to include everyone that could be involved in the response if the incident were real?

- A. Simulation
- B. Scenario
- C. Discussion-based
- **D. Live**

Antwort: D

Begründung:

The CBCI 7.0 course describeslive exercisesas the most comprehensive type of Business Continuity exercise.

These are conducted in actual or alternate operational environments, including command centres, to simulate real incident conditions as closely as possible. Live exercises involve all personnel who would participate in an actual incident response, testing systems, processes, communication, and physical infrastructure. Their scope, realism, and inclusiveness help identify practical issues that other exercise types may miss. They require significant resources and planning but provide critical assurance of organizational preparedness under authentic conditions.

Reference:CBCI 7.0 Study Guide, Module 6: Exercising and Validation, pages 120-122.

49. Frage

Which of the following would NOT be taken into account when developing and drafting a Business Continuity policy?

- A. Setting expectations for how the BCMS will be operationalized
- B. Using concise and straightforward language that is accessible to all personnel
- C. Designing the policy to be appropriate to the type of organization and to reflect the culture and operating environment
- **D. Providing detailed background information in the introduction to the policy which explains, with examples, how the new approach will be different from past approaches**

Antwort: D

Begründung:

The CBCI 7.0 course indicates that Business Continuity policies should be clear, concise, and focused on the organization's current continuity objectives and governance, rather than including detailed historical background or examples of past approaches. The policy is a guiding document that sets expectations and scope, written in accessible language tailored to the organization's culture and operating environment.

Extensive background details can dilute the clarity and purpose of the policy, making it less effective as a communication tool.

Operationalization expectations and cultural appropriateness are key inclusions.

Reference:CBCI 7.0 Study Guide, Module 1: Policy Development, pages 15-18.

50. Frage

In relation to a disruption to activities, the Minimum Business Continuity Objective (MBCO):

- A. Is the point identified in the risk assessment when risks have been successfully mitigated
- B. Is the point set by top management for mobilizing response teams
- **C. Should be attained either at the same time, or after, the RTO**
- D. Should be the Recovery Time Objective (RTO)

Antwort: C

Begründung:

The CBCI 7.0 course defines the Minimum Business Continuity Objective (MBCO) as the minimum level of services or outputs that must be maintained or restored to avoid unacceptable consequences. The MBCO is achieved either simultaneously with or after the Recovery Time Objective (RTO), as the RTO specifies when recovery should be complete for prioritized activities. MBCO sets a baseline for continuity, focusing on critical minimum outputs, rather than risk assessment milestones or managerial mobilization decisions.

Understanding this sequencing supports realistic and measurable recovery planning.

Reference:CBCI 7.0 Study Guide, Module 3: Recovery Objectives and Impact Analysis, pages 58-60.

51. Frage

Which of the following statements about the methods used to collect information following an exercise is correct?

- **A. Surveys are especially effective if an exercise and its participants are spread out over multiple locations**
- B. A hot debrief should be conducted within one month after the conclusion of an exercise
- C. Only senior level exercise participants should provide opinions during the debrief
- D. One-on-one interviews with all exercise participants should be conducted within one month following the exercise

Antwort: A

Begründung:

Surveys are a practical and efficient way to collect feedback from participants who may be geographically dispersed or involved in

staggered exercise sessions. The CBCI 7.0 course emphasizes that surveys enable broad participation and timely input collection, which can be crucial when participants cannot all meet in person or at the same time. Hot debriefs are typically immediate post-exercise discussions, not extended over a month. One-on-one interviews and limiting input to senior personnel restrict breadth and may delay feedback.
