It's time to take the CWNP CWSP-208 practice test for self-assessment once you have prepared with CWSP-208 PDF questions. Taking ExamTorrent's web-based CWNP CWSP-208 practice test is the best method to feel the real CWNP CWSP-208 Exam scenario. ExamTorrent offers the customizable web-based CWNP CWSP-208 practice test that is compatible with all browsers like MS Edge, Chrome, Firefox, etc.

CWNP CWSP-208 is a difficult subject which is hard to pass, but you do not worry too much. If you take right action, passing exam easily is not also impossible. Do you know which method is available and valid? Yes, it couldn't be better if you purchasing CWSP-208 Training Kit. We help many candidates who are determined to get IT certifications. Our good CWSP-208 training kit quality and after-sales service, the vast number of users has been very well received.

Practice CWSP-208 Exam Online & Test CWSP-208 Engine Version

ExamTorrent provides updated and valid CWNP Exam Questions because we are aware of the absolute importance of updates, keeping in mind the dynamic Certified Wireless Security Professional (CWSP) exam syllabus. We provide you update checks for 1

year after purchase for absolutely no cost. We also give a 30% discount on all CWNP CWSP-208 Dumps.

CWNP Certified Wireless Security Professional (CWSP) Sample Questions (Q91-Q96):

NEW QUESTION # 91

What wireless security protocol provides mutual authentication without using an X.509 certificate?

- **A. EAP-FAST**
- B. EAP-TTLS
- C. EAP-MD5
- D. EAP-TLS
- E. PEAPv1/EAP-GTC
- F. PEAPv0/EAP-MSCHAPv2

Answer: A

Explanation:

EAP-FAST (Flexible Authentication via Secure Tunneling) provides:

Mutual authentication using Protected Access Credentials (PACs).

Does not require X.509 certificates for either client or server (although optional for servers).

Is faster and easier to deploy in environments lacking a PKI.

Incorrect:

B). EAP-MD5 provides no mutual authentication.

C). EAP-TLS requires client and server certificates.

D). PEAPv0/EAP-MSCHAPv2 requires a server certificate.

E). EAP-TTLS requires a server certificate.

F). PEAPv1/EAP-GTC still requires a server certificate.

NEW QUESTION # 92

In the basic 4-way handshake used in secure 802.11 networks, what is the purpose of the ANonce and SNonce? (Choose 2)

- A. They are used to pad Message 1 and Message 2 so each frame contains the same number of bytes.
- **B. They allow the participating STAs to create dynamic keys while avoiding sending unicast encryption keys across the wireless medium.**
- **C. They are input values used in the derivation of the Pairwise Transient Key.**
- D. They are added together and used as the GMK, from which the GTK is derived.
- E. The IEEE 802.11 standard requires that all encrypted frames contain a nonce to serve as a Message Integrity Check (MIC).

Answer: B,C

Explanation:

In the 802.11 4-Way Handshake:

D: The ANonce (from the AP) and SNonce (from the STA) are critical entropy values used along with the PMK, MAC addresses, etc., to derive the PTK securely.

E: This process ensures both parties derive the same PTK without ever transmitting the key over the air, mitigating interception risk.

Incorrect:

A). Nonces are not padding bytes.

B). Nonces are not the MIC; MIC is a separate integrity mechanism.

C). GMK and GTK are for group keys, not derived from nonces.

NEW QUESTION # 93

Given: ABC Corporation's 802.11 WLAN is comprised of a redundant WLAN controller pair (N+1) and 30 access points implemented in 2004. ABC implemented WEP encryption with IPSec VPN technology to secure their wireless communication because it was the strongest security solution available at the time it was implemented. IT management has decided to upgrade the WLAN infrastructure and implement Voice over Wi-Fi and is concerned with security because most Voice over Wi-Fi phones do not support IPSec.

As the wireless network administrator, what new security solution would be best for protecting ABC's data?

- A. Migrate all 802.11 data devices to WPA-Personal, and implement a secure DHCP server to allocate addresses from a segmented subnet for the Voice over Wi-Fi phones.
- **B. Migrate corporate data and Voice over Wi-Fi devices to WPA2-Enterprise with fast secure roaming support, and segment Voice over Wi-Fi data on a separate VLAN.**
- C. Migrate corporate data clients to WPA-Enterprise and segment Voice over Wi-Fi phones by assigning them to a different frequency band.
- D. Migrate to a multi-factor security solution to replace IPSec; use WEP with MAC filtering, SSID hiding, stateful packet inspection, and VLAN segmentation.

Answer: B

Explanation:

Comprehensive Detailed Explanation:

To support real-time applications like Voice over Wi-Fi:

WPA2-Enterprise ensures robust security using 802.1X and AES-CCMP.

Fast secure roaming (802.11r) is essential to maintain voice session quality.

VLAN segmentation improves network performance and security between voice and data devices.

Incorrect:

A). WPA-Enterprise is less secure than WPA2, and frequency band segmentation doesn't address QoS and security together.

C). WEP is deprecated and insecure even with added measures.

D). WPA-Personal lacks centralized authentication and doesn't support enterprise-grade security or fast roaming.

NEW QUESTION # 94

Given: Mary has just finished troubleshooting an 802.11g network performance problem using a laptop-based WLAN protocol analyzer. The wireless network implements 802.1X/PEAP and the client devices are authenticating properly. When Mary disables the WLAN protocol analyzer, configures her laptop for PEAP authentication, and then tries to connect to the wireless network, she is unsuccessful. Before using the WLAN protocol analyzer, Mary's laptop connected to the network without any problems.

What statement indicates why Mary cannot access the network from her laptop computer?

- **A. The protocol analyzer's network interface card (NIC) drivers are still loaded and do not support the version of PEAP being used.**
- B. Mary's supplicant software is using PEAPv0/EAP-MSCHAPv2, and the access point is using PEAPv1/EAP-GTC.
- C. The PEAP client's certificate was voided when the protocol analysis software assumed control of the wireless adapter.
- D. The nearby WIPS sensor categorized Mary's protocol analyzer adapter as a threat and is performing a deauthentication flood against her computer.

Answer: A

Explanation:

Many protocol analyzers require special drivers or place the NIC into monitor/promiscuous mode. When used this way, the original driver stack may be altered or replaced. Afterward, if not correctly reloaded, the adapter may lack full 802.1X support or required encryption features. This is likely the case here - Mary's WLAN adapter is still under the control of or affected by the analyzer's NIC driver, which doesn't support PEAP properly.

"Troubleshooting WLAN Authentication and Driver Conflicts"

NEW QUESTION # 95

Given: You must implement 7 APs for a branch office location in your organization. All APs will be autonomous and provide the same two SSIDs (CORP1879 and Guest).

Because each AP is managed directly through a web-based interface, what must be changed on every AP before enabling the WLANs to ensure proper staging procedures are followed?

- A. Fragmentation threshold
- B. Cell radius
- C. Output power
- **D. Administrative password**

Answer: D

Explanation:

For security and proper management, each autonomous AP must have:

A unique, non-default administrative password.

This ensures attackers cannot guess login credentials and access AP settings.

Especially critical when managing via web interface, which may expose login portals to the local network.

Incorrect:

A). Fragmentation threshold is rarely adjusted except for special performance tuning

C & D. Output power and cell radius settings are adjusted during RF design, but they don't relate to staging /security directly.

NEW QUESTION # 96

.....

If you have the certification, it will be very easy for you to achieve your dream. But it is not an easy thing for many candidates to pass the CWSP-208 exam. By chance, our company can help you solve the problem and get your certification, because our company has compiled the CWSP-208 question torrent that not only have high quality but also have high pass rate. We believe that our CWSP-208 exam questions will help you get the certification in the shortest. So hurry to buy our CWSP-208 exam torrent, you will like our products.

Practice CWSP-208 Exam Online: <https://www.examtorent.com/CWSP-208-valid-vce-dumps.html>

And we will help you on the CWSP-208 study materials if you have any question, Now, let's have detail knowledge of the CWSP-208 study guide vce, For candidates who are going to buying the CWSP-208 exam dumps online, you may concern more about the personal information, We have three packages of the CWSP-208 study materials: the PDF, Software and APP online and each one of them has its respect and different advantages, As the date of the exam approaching, regrettably, some exam candidates lack great means of useful CWSP-208 quiz bootcamp materials and idle away their precious chances.

No wonder, then, that there are so many distributions, How and when to create classes, and how classes encode logic, And we will help you on the CWSP-208 Study Materials if you have any question.

CWSP-208 Valid Exam Dumps - Certified Wireless Security Professional (CWSP) Realistic Practice Exam Online Free PDF

Now, let's have detail knowledge of the CWSP-208 study guide vce, For candidates who are going to buying the CWSP-208 exam dumps online, you may concern more about the personal information.
