Oracle 1Z0-1126-1 Exam Syllabus Topics:

Topic	Details
Topic 1	• Project Phase 1: Focus: This phase involves defining the OGL project plan, including governance structures that oversee implementation and ensure alignment with business objectives. OGL training, learning paths, and business processes play a vital role in equipping users with the necessary skills and knowledge for efficient adoption. Identifying essential resources, including key team members, lays the foundation for a successful rollout. OGL Cloud Service activation is a critical step, allowing organizations to manage users within the OGL console, ensuring secure and streamlined access. Proper documentation is essential for content building, testing, and customization, forming the basis for a structured and scalable deployment.
Topic 2	• Introduction to OGL Content: OGL plays a crucial role in enabling organizations to efficiently manage learning content, ensuring seamless deployment and accessibility. It provides a structured framework for organizing, delivering, and tracking learning materials to enhance workforce skills. The OGL Deployment approach outlines a structured implementation process that organizations follow to integrate OGL within their systems. Organizations nest within this deployment approach by aligning their training objectives, resources, and processes with OGL's capabilities, ensuring a smooth adoption and effective utilization of learning content.
Topic 3	• Continuous Improvement: Mature: Ongoing refinement is essential for maintaining the effectiveness of OGL content. Organizations plan for quarterly updates, refreshes, and necessary changes to keep learning materials relevant and up to date. Reviewing OGL analytics provides valuable insights into content performance, enabling continuous optimization and improvement. This phase ensures that the learning framework remains dynamic and aligned with evolving business needs, maximizing the long-term impact of OGL deployment.
Topic 4	• Project Phase 3: Enable: This phase focuses on finalizing resources, documentation, and deadlines for implementation sign-off. Deploying content to production is a crucial step, marking the transition from testing to live usage. Go-live support and hypercare processes are put in place to ensure a smooth transition, providing immediate assistance and troubleshooting to address any issues. This stage ensures that the OGL deployment is stable and fully functional, ready to deliver value to the organization.

Topic 5	• Project Phase 2: Refine: At this stage, organizations refine their project scope, estimate timelines, and ensure alignment with strategic objectives. Selecting appropriate OGL content from libraries helps tailor learning materials to organizational needs. Deployment considerations, including defining the environment, test users, and data requirements, ensure a robust testing phase before full implementation. The process of building, testing, and customizing OGL content is refined to optimize effectiveness. Planning for optional activities, such as activation and role conditions or display groups, ensures flexibility and adaptability in deployment.

Oracle Guided Learning Project Management Foundations Associate - Rel 1 Sample Questions (Q29-Q34):

NEW QUESTION # 29
What analytics data is not displayed on the Feedback dashboard?

- A. Rating
- B. Date/Time
- C. Guide name
- D. Search terms

Answer: D

Explanation:
The Feedback dashboard in the OGL console is designed to display data related to user feedback on guides, such as Date/Time (option B) of submissions, Guide name (option C) to identify the content, and Rating (option D) to gauge user satisfaction. These metrics help administrators and developers assess guide effectiveness and user experience. However, Search terms (option A) are not typically part of the Feedback dashboard, as they relate to how users search for content rather than their feedback on it. Search-related data is more likely found in a Search Terms dashboard or similar analytics tool focused on user navigation behavior, not feedback analysis. Excluding search terms from the Feedback dashboard keeps its focus on evaluative insights rather than discovery patterns, ensuring clarity in its purpose.

NEW QUESTION # 30
What is the standard use of a Base Guide?

- A. You want clear, step-by-step instructions for essential tasks.
- B. You want to familiarize the project team with overall business processes.
- C. You want targeted assistance for specific areas of the host application.

Answer: A

Explanation:
A Base Guide in Oracle Guided Learning (OGL) is a content type designed to deliver clear, step-by-step instructions for completing essential tasks within a host application. It differs from Business Process Training, which focuses on familiarizing teams with overarching processes (option A), and Use Cases, which provide targeted assistance for specific areas (option B). Base Guides are practical tools aimed at enabling end users to perform critical functions efficiently, making them a cornerstone of task-oriented guidance in OGL.

NEW QUESTION # 31
Which analytics dashboard is used to provide insight about user behavior in the application?

- A. Smart Tips dashboard
- B. Optimization dashboard
- C. Process guides dashboard
- D. Hotspots dashboard

Answer: D

Explanation:
The Hotspots dashboard in OGL is specifically designed to provide insights into user behavior within the host application by tracking where users click, hover, or encounter difficulties. It uses heatmaps or similar visualizations to highlight high-interaction areas, revealing patterns like frequent errors or popular navigation paths. This behavioral focus sets it apart from other dashboards: a Smart Tips dashboard (option A) would focus on tip-specific usage (not a standard OGL dashboard), a Process guides dashboard (option C) isn't a recognized entity in OGL analytics, and an Optimization dashboard (option D) is vague and not standard. The Hotspots dashboard's ability to map user interactions makes it invaluable for optimizing content placement and improving user experience, directly addressing the question's intent.

NEW QUESTION # 32
Which resource needs to be knowledgeable about how to build and test OGL content items?

- A. OGL Content Developers
- B. Project Managers
- C. OGL Administrators

Answer: A

Explanation:
OGL Content Developers are the resources tasked with building and testing OGL content items, requiring deep knowledge of content creation tools, guide construction, and testing protocols (option C). Project Managers (option A) oversee planning and coordination, not hands-on content work, while OGL Administrators (option B) manage console setup and permissions, not content development. Developers' expertise ensures guides are functional, accurate, and user-ready, making them the technical backbone of content production. Their role involves using the Content Editor, applying best practices, and validating functionality, distinguishing them from other resources in this specialized task.

NEW QUESTION # 33
How can OGL users with access to the OGL console provide content item and step-level feedback?

- A. Through email
- B. By calling the developer
- C. Directly in the OGL console

Answer: C

Explanation:
Users with console access can provide feedback directly in the OGL console (e.g., via Comments fields), ensuring efficiency and context. Calling (option A) or emailing (option B) are less integrated methods.

NEW QUESTION # 34
