If you can't wait getting the certificate, you are supposed to choose our ISO-IEC-27002-Foundation practice test.

PECB ISO-IEC-27002-Foundation Exam Syllabus Topics:

Topic	Details
Topic 1	• Discuss the relationship between ISO • IEC 27001, ISO • IEC 27002, and other standards and regulatory frameworks: This domain examines how ISO • IEC 27002 functions as a code of practice that supports the requirements set out in ISO • IEC 27001, and how both standards interact with other relevant frameworks. It also addresses how organizations align these standards with applicable laws, regulations, and industry-specific requirements.
Topic 2	• Interpret the ISO • IEC 27002 organizational, people, physical, and technological controls in the specific context of an organization: This domain covers the four control categories defined in ISO • IEC 27002 organizational, people, physical, and technological and how each applies to real-world organizational environments. It requires understanding how to read, interpret, and contextualize these controls based on an organization's specific needs, risks, and operating conditions.
Topic 3	• Explain the fundamental concepts of information security, cybersecurity, and privacy based on ISO • IEC 27002: This domain covers the core principles and definitions that underpin information security, including the concepts of confidentiality, integrity, and availability. It focuses on how ISO • IEC 27002 frames cybersecurity and privacy as foundational elements of an organization's overall security posture.

PECB ISO/IEC 27002 Foundation Exam Sample Questions (Q58-Q63):

NEW QUESTION # 58

What does control 5.7 Threat intelligence primarily concern?

- A. Collecting and analyzing information about existing or emerging threats
- B. Defining access control rules
- C. Managing supplier relationships

Answer: A

Explanation:

Threat intelligence involves gathering and analyzing information about threats to help the organization take appropriate mitigation actions.

NEW QUESTION # 59

What is the main purpose of control 5.12 Classification of information of ISO/IEC 27002?

- A. To ensure identification and understanding of protection needs of information based on its importance
- B. To ensure authorized access and prevent unauthorized access to information
- C. To facilitate the communication of classification of information and support automation of information processing and management

Answer: A

Explanation:

Control 5.12 requires information to be classified according to its sensitivity, criticality, and value so that appropriate protection can

be applied.

NEW QUESTION # 60

An organization has established and maintains contact with special interest groups with which it shares and obtains information about security threats, vulnerabilities, trends etc. Based on ISO/IEC 27002, is this a good practice?

- A. Yes, it is recommended for organization to establish and maintain contact with special interest groups regarding security threats, trends, etc.
- B. No, organization should avoid sharing or exchanging information about new threats or vulnerabilities
- C. No, organization should share such information only with the authorities

Answer: A

Explanation:

ISO/IEC 27002 recommends maintaining contact with relevant special interest groups and professional forums to exchange knowledge about threats, vulnerabilities, trends, and security best practices.

NEW QUESTION # 61

What is the primary purpose of control 5.29 Information security during disruption?

- A. To manage supplier contracts
- B. To ensure the organization plans how to maintain information security during disruptive events
- C. To classify business continuity documentation

Answer: B

Explanation:

This control ensures that information security requirements are maintained during a disruption, such as a disaster or crisis situation.

NEW QUESTION # 62

What should the organization do with regard to the information security roles and responsibilities of an employee who is leaving or changing the job role?

- A. It should identify and transfer them to another employee
- B. It should document them in the termination of employment policy
- C. It should outsource them to an external party

Answer: A

Explanation:

The organization should ensure that information security responsibilities are reassigned appropriately when an employee leaves or changes roles, preventing gaps in accountability.
