UPDATED ECCouncil 312-85 PDF QUESTIONS [2023]- QUICK TIPS TO PASS

Based on the credibility in this industry, our 312-85 study braindumps have occupied a relatively larger market share and stable sources of customers. Such a startling figure --99% pass rate is not common in this field, but we have made it with our endless efforts. As this new frontier of personalizing the online experience advances, our 312-85 exam guide is equipped with comprehensive after-sale online services. It's a convenient way to contact our staff, for we have customer service people 24 hours online to deal with your difficulties. If you have any question or request for further assistance about the 312-85 study braindumps, you can leave us a message on the web page or email us.

HOT Simulations 312-85 Pdf - High Pass-Rate ECCouncil Actual 312-85 Test: Certified Threat Intelligence Analyst

P.S. Free 2026 ECCouncil 312-85 dumps are available on Google Drive shared by ITCertMagic: https://drive.google.com/open?id=1GaAdK6pzX7c-11Zry11DdppijklWyOzE

This ECCouncil braindump study package contains 312-85 latest questions and answers from the real 312-85 exam. These questions and answers are verified by a team of professionals and the content of this 312-85 braindump is taken from the real exam. Since we are 100% sure of the content we provide a Money Back Guarantee offer! We belive taht 312-85 Braindumps can help you pass your 312-85 exam with minimal effort.

We value every customer who purchases our 312-85 test material and we hope to continue our cooperation with you. Our 312-85 test questions are constantly being updated and improved so that you can get the information you need and get a better experience. Our 312-85 test questions have been following the pace of digitalization, constantly refurbishing, and adding new things. I hope you can feel the 312-85 Exam Prep sincerely serve customers. And the pass rate of our 312-85 training guide is high as 99% to 100%, you will be able to pass the 312-85 exam with high scores.

New 312-85 Test Preparation, 312-85 Valid Mock Exam

To prepare for 312-85 exam, you do not need read a pile of reference books or take more time to join in related training courses, what you need to do is to make use of our ITCertMagic exam software, and you can pass the exam with ease. Our exam dumps can not only help you reduce your pressure from 312-85 Exam Preparation, but also eliminate your worry about money waste. We guarantee to give you a full refund of the cost you purchased our dump if you fail 312-85 exam for the first time after you purchased and used our exam dumps. So please be rest assured the purchase of our dumps.

ECCouncil Certified Threat Intelligence Analyst Sample Questions (Q87-Q92):

NEW QUESTION # 87
Joe works as a threat intelligence analyst with Xsecurity Inc. He is assessing the TI program by comparing the project results with the original objectives by reviewing project charter. He is also reviewing the list of expected deliverables to ensure that each of those is delivered to an acceptable level of quality.
Identify the activity that Joe is performing to assess a TI program's success or failure.

- A. Conducting a gap analysis
- B. Identifying areas of further improvement
- C. Determining the fulfillment of stakeholders
- D. Determining the costs and benefits associated with the program

Answer: A

Explanation:
By assessing the Threat Intelligence (TI) program through a comparison of project results with the original objectives, and by ensuring that all expected deliverables have been produced to an acceptable quality level, Joe is conducting a gap analysis. Gap analysis involves identifying the difference between the current state and the desired state or objectives, in this case, the outcomes of the TI program versus its intended goals as outlined in the project charter. This process allows for the assessment of what was successful, what fell short, and where improvements can be made, thereby evaluating the program's overall effectiveness and identifying areas for future enhancement.References:

NEW QUESTION # 88
Mr. Bob, a threat analyst, is performing analysis of competing hypotheses (ACH). He has reached to a stage where he is required to apply his analysis skills effectively to reject as many hypotheses and select the best hypotheses from the identified bunch of hypotheses, and this is done with the help of listed evidence. Then, he prepares a matrix where all the screened hypotheses are placed on the top, and the listed evidence for the hypotheses are placed at the bottom.
What stage of ACH is Bob currently in?

- A. Diagnostics
- B. Inconsistency
- C. Refinement
- D. Evidence

Answer: C

Explanation:
In the Analysis of Competing Hypotheses (ACH) process, the stage where Mr. Bob is applying analysis to reject hypotheses and select the most likely one based on listed evidence, followed by preparing a matrix with screened hypotheses and evidence, is known as the 'Refinement' stage. This stage involves refining the list of hypotheses by systematically evaluating the evidence against each hypothesis, leading to the rejection of inconsistent hypotheses and the strengthening of the most plausible ones. The preparation of a matrix helps visualize the relationship between each hypothesis and the available evidence, facilitating a more objective and structured analysis.References:

NEW QUESTION # 89
In a team of threat analysts, two individuals were competing over projecting their own hypotheses on a given malware. However, to

find logical proofs to confirm their hypotheses, the threat intelligence manager used a de-biasing strategy that involves learning strategic decision making in the circumstances comprising multistep interactions with numerous representatives, either having or without any perfect relevant information.
Which of the following de-biasing strategies the threat intelligence manager used to confirm their hypotheses?

- A. Decision theory
- B. Game theory
- C. Machine learning
- D. Cognitive psychology

Answer: B

NEW QUESTION # 90
Mr. Bob, a threat analyst, is performing analysis of competing hypotheses (ACH). He has reached to a stage where he is required to apply his analysis skills effectively to reject as many hypotheses and select the best hypotheses from the identified bunch of hypotheses, and this is done with the help of listed evidence. Then, he prepares a matrix where all the screened hypotheses are placed on the top, and the listed evidence for the hypotheses are placed at the bottom.
What stage of ACH is Bob currently in?

- A. Diagnostics
- B. Inconsistency
- C. Refinement
- D. Evidence

Answer: C

Explanation:
In the Analysis of Competing Hypotheses (ACH) process, the stage where Mr. Bob is applying analysis to reject hypotheses and select the most likely one based on listed evidence, followed by preparing a matrix with screened hypotheses and evidence, is known as the 'Refinement' stage. This stage involves refining the list of hypotheses by systematically evaluating the evidence against each hypothesis, leading to the rejection of inconsistent hypotheses and the strengthening of the most plausible ones. The preparation of a matrix helps visualize the relationship between each hypothesis and the available evidence, facilitating a more objective and structured analysis.

NEW QUESTION # 91
Jim works as a security analyst in a large multinational company. Recently, a group of hackers penetrated into their organizational network and used a data staging technique to collect sensitive data. They collected all sorts of sensitive data about the employees and customers, business tactics of the organization, financial information, network infrastructure information and so on.
What should Jim do to detect the data staging before the hackers exfiltrate from the network?

- A. Jim should identify the attack at an initial stage by checking the content of the user agent field.
- B. Jim should identify the web shell running in the network by analyzing server access, error logs, suspicious strings indicating encoding, user agent strings, and so on.
- C. Jim should analyze malicious DNS requests, DNS payload, unspecified domains, and destination of DNS requests.
- D. Jim should monitor network traffic for malicious file transfers, file integrity monitoring, and event logs.

Answer: D

Explanation:
In the scenario described, where attackers have penetrated the network and are staging data for exfiltration, Jim should focus on monitoring network traffic for signs of malicious file transfers, implement file integrity monitoring, and scrutinize event logs. This approach is crucial for detecting unusual activity that could indicate data staging, such as large volumes of data being moved to uncommon locations, sudden changes in file integrity, or suspicious entries in event logs. Early detection of these indicators can help in identifying the staging activity before the data is exfiltrated from the network.
