The CloudSec-Pro PDF Questions of Prep4King are authentic and real. These Palo Alto Networks Cloud Security Professional (CloudSec-Pro) exam questions help applicants prepare well prior to entering the actual Palo Alto Networks Cloud Security Professional (CloudSec-Pro) exam center. Due to our actual CloudSec-Pro Exam Dumps, our valued customers always pass their Palo Alto Networks CloudSec-Pro exam on the very first try hence, saving their precious time and money too.

## Palo Alto Networks CloudSec-Pro Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Cloud Runtime Security: This domain addresses the protection of cloud workloads during active operation, covering cloud workload protection, detection and response, web application and API security, and vulnerability management. It also includes the processes involved in deploying and managing security agents.</li></ul>
Topic 2	<ul style="list-style-type: none"><li>• Cloud Posture Security: This domain examines the tools and practices used to assess and manage cloud security posture, spanning CSPM, KSPM, AI-SPM, and DSPM. It also covers agentless scanning, identity security, vulnerability management, unified compliance, and the role of Posture Security Management Modules.</li></ul>
Topic 3	<ul style="list-style-type: none"><li>• Application Security: This domain covers security practices integrated throughout the software development lifecycle, including application security posture management, CI</li><li>• CD pipeline security, software composition analysis, IaC security, and secrets scanning. It also explores real-world application security use cases and scan management.</li></ul>
Topic 4	<ul style="list-style-type: none"><li>• Security Operations Center (SOC) Fundamentals: This domain covers the foundational components of a SOC, including team roles, tools, and technologies used in day-to-day security operations. It also addresses how AI</li><li>• ML and threat intelligence support incident response, categorization, and prioritization.</li></ul>
Topic 5	<ul style="list-style-type: none"><li>• Cortex Fundamentals: This domain focuses on the core features of the Cortex Cloud platform, including indicator types, log management, asset inventory, compliance, and data protection. It also covers how to create reports and dashboards and how data sources are ingested into the platform.</li></ul>

## Palo Alto Networks CloudSec-Pro New Exam Braindumps & Test CloudSec-Pro Centres

For candidates who buy CloudSec-Pro exam bootcamp online, they may have the concern about the money safety. We apply the international recognition third party for the payment, and it will protect the interests of you. Therefore you put your mind at rest if you buy CloudSec-Pro exam bootcamp from us. In addition, we have free demo for you to have a try, so that you can have a deeper understanding the complete version of the CloudSec-Pro Exam Dumps. If you have any other questions, just contact us, and we will do what we can do to help you.

### Palo Alto Networks Cloud Security Professional Sample Questions (Q96-Q101):

#### NEW QUESTION # 96

The development team is building pods to host a web front end, and they want to protect these pods with an application firewall. Which type of policy should be created to protect this pod from Layer7 attacks?

- A. The development team should create a WAAS rule targeted at all resources on the host.
- **B. The development team should create a WAAS rule targeted at the image name of the pods.**
- C. The development team should create a runtime policy with networking protections.
- D. The development team should create a WAAS rule for the host where these pods will be running.

**Answer: B**

Explanation:

To protect the pods hosting a web front end from Layer 7 attacks, the development team should create a Web Application and API Security (WAAS) rule targeted at the image name of the pods. This approach allows the policy to specifically protect the applications running within the pods against sophisticated attacks that target the application layer.

[https://docs.paloaltonetworks.com/prisma/prisma-cloud/prisma-cloud-admin-compute/waas/deploy\\_waas](https://docs.paloaltonetworks.com/prisma/prisma-cloud/prisma-cloud-admin-compute/waas/deploy_waas)

#### NEW QUESTION # 97

A customer is reviewing Container audits, and an audit has identified a cryptominer attack. Which three options could have generated this audit? (Choose three.)

- A. The mined currency is associated with a user token.
- **B. Common cryptominer process name was found.**
- **C. Common cryptominer port usage was found.**
- D. The value of the mined currency exceeds \$100.
- **E. High CPU usage over time for the container is detected.**

**Answer: B,C,E**

Explanation:

In the case of identifying a cryptominer attack through container audits, the options that could have generated this audit include B. High CPU usage over time for the container is detected, which is a common indicator of cryptomining activity as it consumes significant computational resources, C. Common cryptominer process name was found, which directly indicates the presence of cryptomining based on known malicious processes, and E. Common cryptominer port usage was found, suggesting cryptomining activity based on network behavior typical of such attacks.

#### NEW QUESTION # 98

Which three Orchestrator types are supported when deploying Defender? (Choose three.)

- **A. Amazon ECS**
- B. Docker Swarm
- C. Azure ACS
- **D. Kubernetes**

- E. Red Hat OpenShift

**Answer: A,D,E**

Explanation:

Kubernetes, Openshift, ECS <https://docs.paloaltonetworks.com/prisma/prisma-cloud/prisma-cloud-admin-compute/install/deploy-defender/orchestrator> Prisma Cloud supports integration with multiple orchestrators to facilitate the deployment of its Defender component in various environments. The supported orchestrators include Red Hat OpenShift, Amazon ECS, and Kubernetes. These platforms are supported because they provide robust environments for container orchestration, allowing Prisma Cloud to efficiently manage security operations across different cloud-native technologies.

#### NEW QUESTION # 99

What is the purpose of Incident Explorer in Prisma Cloud Compute under the "Monitor" section?

- A. To correlate individual events to identify potential attacks and provide a sequence of process, file system, and network events for a comprehensive view of an incident
- B. To identify and suppress all audit events generated by the defender
- C. To sort through large amounts of audit data manually in order to identify developing attacks
- D. To store large amounts of forensic data on the host where Console runs to enable a more rapid and effective response to incidents

**Answer: A**

Explanation:

The purpose of Incident Explorer in Prisma Cloud Compute under the "Monitor" section is to provide a comprehensive view of incidents by correlating individual events. This helps identify potential attacks through a sequence of processes, file system, and network events, thereby giving a complete picture of an incident's timeline and impact.

<https://docs.prismacloud.io/en/classic/compute-admin-guide/runtime-defense/incident-explorer>

#### NEW QUESTION # 100

Which three fields are mandatory when authenticating the Prisma Cloud plugin in the IntelliJ application?

(Choose three.)

- A. Asset Name
- B. Access Key
- C. Prisma Cloud API URL
- D. Secret Key
- E. Tags

**Answer: B,C,D**

Explanation:

Reference: <https://docs.paloaltonetworks.com/prisma/prisma-cloud/prisma-cloud-admin/prisma-cloud-devops-security/use-the-prisma-cloud-plugin-for-intellij.html> When authenticating the Prisma Cloud plugin in the IntelliJ application, the mandatory fields are the Secret Key, Prisma Cloud API URL, and Access Key. These credentials are required to securely authenticate and enable the plugin to communicate with the Prisma Cloud API, ensuring that the plugin can perform its intended functions within the development environment.

#### NEW QUESTION # 101

.....

The Palo Alto Networks CloudSec-Pro certification brings multiple career benefits. Reputed firms happily hire you for well-paid jobs when you earn the Palo Alto Networks Cloud Security Professional. If you are already an employee of a tech company, you get promotions and salary hikes upon getting the CloudSec-Pro credential. All these career benefits come when you crack the Palo Alto Networks CloudSec-Pro certification examination. To pass the CloudSec-Pro test, you need to prepare well from updated practice material such as real Palo Alto Networks CloudSec-Pro Exam Questions.
