Official HPE2-W12 Study Guide, HPE2-W12 Reliable Dumps Questions

To prepare for HPE2-W12 exam, you do not need read a pile of reference books or take more time to join in related training courses, what you need to do is to make use of our itPass4sure exam software, and you can pass the exam with ease. Our exam dumps can not only help you reduce your pressure from HPE2-W12 Exam Preparation, but also eliminate your worry about money waste. We guarantee to give you a full refund of the cost you purchased our dump if you fail HPE2-W12 exam for the first time after you purchased and used our exam dumps. So please be rest assured the purchase of our dumps.

HP Selling HPE Aruba Networking Solutions Sample Questions (Q48-Q53):

NEW QUESTION # 48

What common challenge for network admins is created by an expanding remote workforce?

- A. Data center networks are not designed to receive so much external traffic.
- B. Home equipment often lacks support for Wi-Fi 6.
- **C. Typical VPN solutions are complex and take a lot of time to support.**
- D. The shift in traffic away from the campus makes optimization difficult.

Answer: C

Explanation:

The correct answer is B because as remote workforces expand, traditional VPN solutions have become a major challenge for IT teams. VPNs are complex to scale, create management overhead, and introduce performance bottlenecks. HPE Aruba Networking highlights that organizations increasingly need to move from VPN-based access to Zero Trust Network Access (ZTNA) and SASE models to simplify operations and improve security.

Relevant extracts from official HPE Aruba Networking documentation:

- * "Traditional VPNs are complex, hard to scale, and increase operational burden for IT teams supporting large remote workforces."
- * "Remote workforce expansion has exposed the limitations of VPN architectures, including poor user experience, difficulty scaling, and excessive troubleshooting requirements."
- * "ZTNA provides a simplified alternative to VPN by offering application-specific access with least privilege, reducing complexity and support requirements."
- * "With Aruba's SSE and ZTNA solutions, organizations can eliminate VPN sprawl while improving both security and user experience." Why the other options are incorrect:
- * A While external traffic does increase, modern data centers are designed to handle distributed traffic patterns-this is not the primary challenge.
- * C Lack of Wi-Fi 6 support at home is a limitation but not a core IT admin challenge.
- * D Traffic shift away from campus is true, but the bigger issue is the complexity of managing VPN solutions for remote users.

References (HPE Aruba Networking Solutions / Study Guides):

NEW QUESTION # 49

Which advantage does HPE Aruba Networking Fabric Composer provide?

- A. It allows IT to provision both HPE Aruba Networking switches and APs.
- B. It uses AI to detect issues and provide recommendations for addressing them.
- C. It dynamically reroutes traffic when bottlenecks occur on the network.
- **D. It provides visibility into both physical and virtual networks.**

Answer: D

Explanation:

The correct answer is C because HPE Aruba Networking Fabric Composer is specifically designed to deliver visibility and simplified management across both physical and virtualized network fabrics in data center environments. It integrates with virtualization platforms (e.g., VMware vSphere, NSX) to extend visibility into workloads and virtual machines, alongside physical switches and fabrics. This unified visibility reduces operational complexity and ensures application performance.

NEW QUESTION # 50

What is one way that an HPE Aruba Networking Central helps to simplify protecting the network?

- **A. By providing policy recommendations that admins can quickly preview and apply.**
- B. By automatically adding rules to role-based access control policies in response to new types of threats.
- C. By integrating with HPE Aruba Networking private 5G solutions to automatically enhance the security for Wi-Fi 5, 6, and 7 devices.
- D. By providing a "sandbox" environment, in which traffic can be safely inspected for malware.

Answer: A

Explanation:

The correct answer is D because Aruba Central simplifies security by offering policy recommendations through AI-powered insights.

These recommendations help IT administrators enforce consistent and adaptive security policies across users, devices, and applications without complex manual configuration.

Admins can review the suggested policies and apply them directly, reducing human error and improving security posture.

Relevant extracts from HPE Aruba Networking documentation:

* "Aruba Central leverages AI insights to provide policy recommendations that can be quickly previewed and applied by administrators."

* "Policy automation simplifies security operations by reducing the manual overhead associated with access control enforcement."

* "With Aruba Central, organizations can streamline role-based access policy deployment, ensuring that best-practice security rules are consistently applied."

* "The solution helps IT scale security controls across distributed environments while reducing operational complexity." Why the other options are incorrect:

* A Aruba Central does not rely on private 5G integration for simplifying network protection; that is part of Aruba private 5G solutions.

* B Sandboxing traffic inspection is a feature of advanced firewall/security platforms, not Aruba Central.

* C Central does not automatically add new access rules without administrator review; instead, it provides recommendations for admins to approve.

NEW QUESTION # 51

Which outcome could the customer achieve with Network Insights in HPE Aruba Networking Central?

- A. Automatically detect any client connecting to the network and block any client with suspicious behavior.
- B. Search for users, endpoints, or locations status; provide a status report; and automatically resolve any issues detected.
- **C. Identify performance issues and follow recommendations for resolving the issue.**
- D. Detect and profile Internet of Things (IoT) devices connected to the network.

Answer: C

Explanation:

The correct answer is A because Aruba Network Insights, a feature of Aruba Central's AI-powered operations (AIOps), focuses on identifying performance issues and providing actionable, prescriptive recommendations to resolve them. This enables IT teams to proactively address network issues before they impact end users, improving operational efficiency and minimizing downtime.

Relevant extracts from official HPE Aruba Networking documentation:

* "Aruba Central AIOps with Network Insights provides actionable recommendations to resolve network performance issues."

* "AI/ML-based analytics continuously monitor network health, identifying anomalies and performance degradations."

* "By offering prescriptive guidance, Central reduces mean time to resolution (MTTR) and empowers IT teams to optimize the network."

* "Network Insights transforms reactive troubleshooting into proactive operations by identifying issues early and suggesting corrective actions." Why the other options are incorrect:

* B Blocking suspicious clients is part of ClearPass Policy Manager and Zero Trust enforcement, not Network Insights.

* C Searching for users and endpoints with automated resolution aligns more with ClearPass and Client Insights, not Network Insights.

* D IoT profiling is handled by Device Insight, not Network Insights.

NEW QUESTION # 52

A customer needs to deploy IoT more securely. How can HPE Aruba Networking solutions help the customer achieve this objective?

- **A. HPE Aruba Networking Central with AI for networking helps customers discover and monitor all the devices connected**

to their network.

- B. HPE Aruba Networking Fabric Composer helps customers build secure tunnels between IoT devices and the data center.
- C. HPE Aruba Networking offers agents that can easily be installed on IoT devices to encrypt communications.
- D. HPE Aruba Networking is the only vendor to offer IoT-centric security solutions without incorporating partnerships.

Answer: A

Explanation:

The correct option is B because HPE Aruba Networking Central, combined with AI-powered insights, provides visibility into all devices on the network, including IoT. This allows customers to discover, classify, and monitor IoT endpoints and enforce security policies. HPE emphasizes that IoT devices are often difficult to secure due to their diversity and lack of built-in protections, so network-based discovery and monitoring is critical.

NEW QUESTION # 53

.....

People need to increase their level by getting the HP HPE2-W12 certification. If you take an example of the present scenario in this competitive world, you will find people struggling to meet their ends just because they are surviving on low-scale salaries. Even if they are thinking about changing their jobs, people who are ready with a better skill set or have prepared themselves with HP HPE2-W12 Certification grab the chance.
