Firstly, you will learn many useful knowledge and skills from our HQT-4160 Exam Guide, which is a valuable asset in your life. After all, no one can steal your knowledge. In addition, you can get the valuable HQT-4160 certificate.

Hitachi HQT-4160 exam is an industry-standard certification exam that is recognized globally. HQT-4160 exam is designed to evaluate the candidate's knowledge and skills in installing the Hitachi Vantara Qualified Professional - VSP 5000 Series. HQT-4160 Exam consists of multiple-choice questions that require the candidate to demonstrate their expertise in different areas of installation, including hardware, software, and firmware.

Hitachi Vantara Qualified Professional - VSP 5000 Series Installation Sample Questions (Q37-Q42):

NEW QUESTION # 37

Which management tool is used to create a Parity Group in a VSP 5000 system?

- A. Maintenance Utility
- B. Web Console
- C. Hitachi Command suite
- D. Storage Navigator 2

Answer: D

Explanation:

Storage Navigator 2 is the primary management tool used for configuring and managing storage on VSP 5000 systems, including the creation of Parity Groups.

NEW QUESTION # 38

A drive in a VSP 5000 series storage system is blocked. The microcode is now searching for a matching spare drive. What are the three requirements for the spare drive? (Choose three.)

- A. It must be located in the same DKU.
- B. It must have the same rotation speed (RPM).
- C. It must be of the same type (NL-SAS, SSD, FMD etc.).
- D. It must have the same or a larger capacity.
- E. It must be defined in the SVP Spare Drive Mapping table.

Answer: B,C,D

Explanation:

It must have the same or a larger capacity.

The spare drive must be equal to or larger in capacity than the failed drive to ensure data can be fully rebuilt.

It must have the same rotation speed (RPM).

Matching rotation speed is required to maintain consistent performance and RAID group behavior.

It must be of the same type (NL-SAS, SSD, FMD etc.).

The spare drive must be the same drive type as the failed drive to ensure compatibility and maintain system reliability.

NEW QUESTION # 39

What is the first step in troubleshooting incidents on VSP 5000 storage systems?

- A. Contacting customer support
- B. Rebooting the system
- C. Upgrading the firmware
- D. Checking the log files

Answer: D

Explanation:

In the Hitachi VSP 5000 storage system, log files are the first source of information when troubleshooting any incident.

Reasons to start with log files:

Identify error messages related to hardware, connectivity, or software issues.

Determine the exact time and nature of failures.

Assist in diagnosing problems without disrupting operations.

Provide detailed information for support escalation if needed.

NEW QUESTION # 40

You need to add another SBX with 4 drive boxes (DBS2) and 16 drives to a VSP 5100. What is the correct procedure?

- A. Insert the drives in the DBs. Mount the DBs in the rack and install them with the Maintenance Utility.
- B. Mount the empty DBs in the rack. Insert the drives in the DBs and install them with the Maintenance Utility.
- C. Insert the drives in the DBs. Mount the DBs in the rack and attach the cables. Install the drives with the Maintenance Utility.
- D. Mount the empty DBs in the rack and attach the cables. Install the DBs with the Maintenance Utility. Insert the drives in the DBs and install them with the Maintenance Utility.

Answer: B

Explanation:

The correct procedure is to first mount the empty drive boxes (DBs) in the rack, then insert the drives into the DBs, and finally use

the Maintenance Utility to install and configure the new hardware. This ensures proper detection and initialization by the system.

NEW QUESTION # 41

Which two steps should you perform before a VSP 5000 system installation? (Choose two.)

- A. Ensure you have a Windows laptop configured as Maintenance laptop prior to the installation.
- B. Use the Maintenance manual to check any power and environmental requirements.
- C. Ensure that you have the 3 CE jumpers required to configure the system.
- D. Use the Administrator manual to provide the customer with a list of suitable IP addresses for their public network.

Answer: A,B

Explanation:

Use the Maintenance manual to check any power and environmental requirements.

Reviewing the Maintenance manual ensures that the installation site meets all necessary power and environmental specifications for the VSP 5000 system.

Ensure you have a Windows laptop configured as Maintenance laptop prior to the installation.

A properly configured Maintenance laptop is essential for system setup, configuration, and troubleshooting during the installation process.

NEW QUESTION # 42
