**CPQ-301 Test Simulator | Test CPQ-301 Question**

You don't need to worry about wasting your precious time but failing to get the CPQ-301 certification. Many people have used our CPQ-301 study materials and the pass rate of the exam is 99%. If any incident happens and you don't pass the CPQ-301 exam, we will give you a full refund. Our sincerely stems are from the good quality of our products. We will give you one year's free update of the exam study materials you purchase and 24/7 online service. Now just make up your mind and get your CPQ-301 Exam Torrent!

CPQ-301 Exam Quick Prep - CPQ-301 Test Simulator

Achieving success in the Salesforce Mule-Dev-301 certification exam opens doors to lucrative job opportunities and career advancements. The Salesforce Certified MuleSoft Developer II (Mule-Dev-301) credential is highly valuable in today's industry. However, many candidates face the frustration of exam failure and wasted time and resources by relying on outdated Salesforce Mule-Dev-301 Practice Questions. To save both time and money, it is crucial to prepare with the most up-to-date and reliable Mule-Dev-301 exam questions.

Our Mule-Dev-301 study materials will be very useful for all people to improve their learning efficiency. If you do all things with efficient, you will have a promotion easily. If you want to spend less time on preparing for your Mule-Dev-301 exam, if you want to pass your exam and get the certification in a short time, our Mule-Dev-301 learning braindumps will be your best choice to help you achieve your dream. Don't hesitate, you will be satisfied with our Mule-Dev-301 exam questions!

## Quiz Trustable Mule-Dev-301 - Salesforce Certified MuleSoft Developer II Latest Test Report

Our Mule-Dev-301 study guide design three different versions for all customers. These three different versions include PDF version, software version and online version, they can help customers solve any problems in use, meet all their needs. Although the three

major versions of our Mule-Dev-301 exam dumps provide a demo of the same content for all customers, they will meet different unique requirements from a variety of users based on specific functionality. The most important feature of the online version of our Mule-Dev-301 Learning Materials are practicality. The online version is open to all electronic devices, which will allow your device to have common browser functionality so that you can open our products. At the same time, our online version of the Mule-Dev-301 study guide can also be implemented offline, which is a big advantage that many of the same educational products are not able to do on the market at present.

## Salesforce Certified MuleSoft Developer II Sample Questions (Q52-Q57):

### NEW QUESTION # 52

What is the MuleSoft recommended method to encrypt sensitive property data?

- A. The encryption key should be identical for all environments
- **B. The encryption key and sensitive data should be different for each environment**
- C. The encryption key should be identical for all environments and the sensitive data should be different for each environment
- D. The encryption key should be different for each environment and the sensitive data should be the same for all environments

**Answer: B**

Explanation:

The MuleSoft recommended method to encrypt sensitive property data is to use the Secure Properties Tool that comes with Anypoint Studio. This tool allows encrypting properties files with a secret key and then decrypting them at runtime using the same key. The encryption key and sensitive data should be different for each environment to ensure security and avoid accidental exposure of sensitive data. Reference: <https://docs.mulesoft.com/mule-runtime/4.3/secure-configuration-properties>

### NEW QUESTION # 53

Two APIs are deployed to a two-node on-prem cluster. Due to a requirements change, the two APIs must communicate to exchange data asynchronously.

- A. Instead of using the VM Connector use <flow-ref> directly
- **B. If the two APIs use the same domain, the VM Connector can be leveraged**
- C. The VM Connector is used to inter-application communication, so it is not possible to use the VM Connector
- D. It is not possible to use the VM Connector since the APIs are running in a cluster mode and each mode has its own set of VM Queues

**Answer: B**

Explanation:

To communicate asynchronously between two APIs deployed to a two-node on-prem cluster, the developer can use the VM Connector if the two APIs use the same domain. The VM Connector allows passing messages between different Mule applications within a single Mule runtime instance or across different instances using shared memory or persistent storage. If two APIs are deployed under the same domain, they can share resources such as VM queues and communicate asynchronously using VM Connector operations. Reference: <https://docs.mulesoft.com/mule-runtime/4.3/vm-connector> <https://docs.mulesoft.com/mule-runtime/4.3/shared-resources>

### NEW QUESTION # 54

In a Mule project, Flow-1 contains a flow-ref to Flow-2 depends on data from Flow-1 to execute successfully.

Which action ensures the test suites and test cases written for Flow-1 and Flow-2 will execute successfully?

- A. Use 'After Test Case' to produce the data needed from Flow-1 test cases to pass to Flow-2 test cases
- **B. Use "Set Event to pass the input that is needed, and keep the test cases for Flow-1 and Flow-2 independent**
- C. Use "Before Test Case" To collect data from Flow-1 test cases before running Flow-2 test cases
- D. Chain together the test suites and test cases for Flow-1 and Flow-2

**Answer: B**

Explanation:

To ensure the test suites and test cases written for Flow-1 and Flow-2 will execute successfully, the developer should use a Set Event processor to pass the input that is needed by Flow-2, and keep the test cases for Flow-1 and Flow-2 independent. This way,

the developer can isolate the testing of each flow and avoid coupling them together. Reference: <https://docs.mulesoft.com/munit/2.3/munit-test-flow>

#### NEW QUESTION # 55

Which statement is true when working with correlation IDs?

- A. The Anypoint MQ Connector automatically propagates correlation IDs
- **B. The HTTP Listener generates correlation IDs unless a correlation ID is received in the HTTP request**
- C. The VM Connector does not automatically propagate correction IDs
- D. The HTTP Listener regenerates correlation IDs regardless of the HTTP request

**Answer: B**

Explanation:

When working with correlation IDs, the HTTP Listener generates correlation IDs unless a correlation ID is received in the HTTP request. In that case, it propagates the received correlation ID throughout the flow execution. Correlation IDs are used to track events across different flows or applications. Reference: <https://docs.mulesoft.com/mule-runtime/4.3/about-mule-message#message-attributes>

#### NEW QUESTION # 56

An order processing system is composed of multiple Mule application responsible for warehouse, sales and shipping. Each application communication using Anypoint MQ. Each message must be correlated against the original order ID for observability and tracing.

How should a developer propagate the order ID as the correlation ID across each message?

- A. Use the underlying HTTP request of Anypoint MQ to set the 'X-CORRELATION\_ID' header to the order ID
- B. Set a custom Anypoint MQ user property to propagate the order ID and set the correlation ID in the receiving applications.
- C. Use the default correlation ID, Anypoint MQ will automatically propagate it.
- **D. Wrap all Anypoint MQ Publish operations within a With CorrelationID scope from the Tracing module, setting the correlation ID to the order ID**

**Answer: D**

Explanation:

To propagate the order ID as the correlation ID across each message using Anypoint MQ, the developer should wrap all Anypoint MQ Publish operations within a With CorrelationID scope from the Tracing module, setting the correlation ID to the order ID. The With CorrelationID scope allows setting a custom correlation ID for any event that occurs within it. The Tracing module also enables distributed tracing across different Mule applications and services using Anypoint Monitoring. Reference: <https://docs.mulesoft.com/tracing-module/1.0/tracing-module-reference#with-correlation-id-scope>  
<https://docs.mulesoft.com/tracing-module/1.0/tracing-module-concepts>

#### NEW QUESTION # 57

.....

The top personal and professional Salesforce Mule-Dev-301 certification exam benefits are recognition of skills, updated knowledge, more career opportunities, instant promotion, and increase in salary, etc. If your answer is yes first of all you have to enroll in the Salesforce Certified MuleSoft Developer II (Mule-Dev-301) certification exam and put all your efforts to pass this career advancement certification exam. Are you looking for the right and recommended way to pass the Salesforce Mule-Dev-301 exam?
