If you buy our AZ-204 training quiz, you will find three different versions are available on our test platform. According to your need, you can choose the suitable version for you. The three different versions of our AZ-204 study materials include the PDF version, the software version and the online version. We can promise that the three different versions are equipped with the high quality. If you purchase our AZ-204 Preparation questions, it will be very easy for you to easily and efficiently find the exam focus and pass the AZ-204 exam.

Microsoft AZ-204 and Skills Measured

The AZ-204 certification exam is designed to evaluate the candidates' capability to perform specific technical tasks. These include developing Azure solutions; connecting to and utilizing Azure services as well as 3rd-party services; implementing Azure security; monitoring, optimizing, and troubleshooting Azure solutions. The details of these topic areas are enumerated below:

Develop Azure Solutions: 25-30%

- **Developing Azure Application Service Web Applications:** this requires skills in developing Azure App Service Web Apps; allowing diagnostics logging; deploying code to web apps; configuring web app settings, which include connection strings, API, and SSL; implementing auto-scaling rules such as scheduled auto-scaling and scaling by a system or operational metrics.
- **Implementing Azure Functions:** this covers skills, such as implementing output and input binding for functions; implementing function triggers with the use of data operations, webhooks, and timers; implementing Azure Durable Functions.
- **Implementing Infrastructure-as-a-Service (IaaS) Solutions:** the candidates are required to possess competence in providing virtual machines; configuring virtual machines for remote access; creating ARM templates; publishing images to Azure Container Registry; creating container images for solutions with the use of Docker; running containers with the use of Azure Container Instances when Azure Kubernetes Services are not within scope.

Latest Braindumps AZ-204 Ppt & AZ-204 Pdf Version

Since our childhood, we have always been guided to study hard to clear the Microsoft AZ-204 exams but if you still believe in the same pattern for clearing your Developing Solutions for Microsoft Azure AZ-204 certification exam, I must say it's a bad idea. Studying hard is good only when you have enough time and no liability to check. When you are in your professional career, you don't have enough time to study hard but you have time to study smart. The smart study includes to prepare PrepPDF AZ-204 Exam Questions that will help you concentrate on the core study and not follow up on the stories and background.

Microsoft Developing Solutions for Microsoft Azure Sample Questions (Q201-Q206):

NEW QUESTION # 201

You have a web app named MainApp. You are developing a triggered App Service background task by using the WebJobs SDK. This task automatically invokes a function code whenever any new data is received in a queue.

You need to configure the services.

Which service should you use for each scenario? To answer, drag the appropriate services to the correct scenarios. Each service may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

□ Explanation

□ Box 1: WebJobs

A WebJob is a simple way to set up a background job, which can process continuously or on a schedule.

WebJobs differ from a cloud service as it gives you get less fine-grained control over your processing environment, making it a more true PaaS service.

□ Box 2: Flow

NEW QUESTION # 202

You are developing an ASP.NET Core Web API web service that uses Azure Application Insights to monitor performance and track events.

You need to enable logging and ensure that log messages can be correlated to events tracked by Application Insights.

How should you complete the code? To answer, drag the appropriate code segments to the correct locations.

Each code segment may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

□ Explanation

□ Box 1: ApplicationInsightsLoggerOptions

If you want to include the EventId and EventName properties, then add the following to the ConfigureServices method:

```
services
```

```
AddOptions<ApplicationInsightsLoggerOptions>()
```

```
Configure(o => o.IncludeEventId = true);
```

□ Box 2: IncludeEventID

□ Box 3: ApplicationServices

In Asp.Net core apps it turns out that trace logs do not show up in Application Insights out of the box. We need to add the following code snippet to our Configure method in Startup.cs:

```
loggerFactory.AddApplicationInsights(app.ApplicationServices, logLevel);
```

NEW QUESTION # 203

You need to implement the delivery service telemetry data

How should you configure the solution?

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

□ Explanation:

□

NEW QUESTION # 204

You need to resolve the Shipping web site error.

How should you configure the Azure Table Storage service? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation

Box 1: AllowedOrigins

A CORS request will fail if Access-Control-Allow-Origin is missing.

Scenario:

The following error message displays while you are testing the website:

Box

2: http://test-shippingapi.wideworldimporters.com

Syntax: Access-Control-Allow-Origin: *

Access-Control-Allow-Origin: <origin>

Access-Control-Allow-Origin: null

<origin> Specifies an origin. Only a single origin can be specified.

Box 3: AllowedOrigins

Box 4: POST

The only allowed methods are GET, HEAD, and POST. In this case POST is used.

"<Corsrule>" "allowedmethods" Failed to load no "Access-control-Origin" header is present References:

NEW QUESTION # 205

You are building a website to access project data related to terms within your organization. The website does not allow anonymous access. Authentication performed using an Azure Active Directory (Azure AD) app named internal.

The website has the following authentication requirements:

* Azure AD users must be able to login to the website.

* Personalization of the website must be based on membership in Active Directory groups.

You need to configure the application's manifest to meet the authentication requirements.

How should you configure the manifest? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:
