You may analyze the merits of each version carefully before you purchase our Splunk IT Service Intelligence Certified Admin guide torrent and choose the best version.

## Splunk IT Service Intelligence Certified Admin Sample Questions (Q59-Q64):

### NEW QUESTION # 59

In Episode Review, what is the result of clicking an episode's Acknowledge button?

- A. Change status from New to Acknowledged and assign the current user as owner.
- B. Change status from New to Acknowledged.
- C. Assign the current user as owner.
- D. Change status from New to In Progress and assign the current user as owner.

**Answer: A**

Explanation:

When an episode warrants investigation, the analyst acknowledges the episode, which moves the status from New to In Progress.

Reference: <https://docs.splunk.com/Documentation/ITSI/4.10.2/EA/EpisodeOverview> An episode represents a disruption of service operation causing impact to business operations. It is a deduplicated group of notable events occurring as part of a larger sequence, or an incident or period considered in isolation. In Episode Review, you can manage the episodes and their statuses using various actions. One of the actions is Acknowledge, which changes the status of an episode from New to Acknowledged and assigns the current user as the owner. This action indicates that someone is working on resolving the episode and prevents duplicate efforts from other users. References: Overview of Episode Review in ITSI, [Episode actions in Episode Review]

### NEW QUESTION # 60

Which index will contain useful error messages when troubleshooting ITSI issues?

- A. itsi\_summary
- B. itsi\_notable\_audit
- C. \_introspection
- D. \_internal

**Answer: D**

### NEW QUESTION # 61

Which index will contain useful error messages when troubleshooting ITSI issues?

- A. itsi\_summary
- B. itsi\_notable\_audit
- C. \_introspection
- D. \_internal

**Answer: D**

Explanation:

Reference: <https://docs.splunk.com/Documentation/ITSI/4.10.2/EA/TroubleshootRE> The index that will contain useful error messages when troubleshooting ITSI issues is:

B). \_internal. This is true because the \_internal index contains logs and metrics generated by Splunk processes, such as splunkd and metrics.log. These logs can help you diagnose problems with your Splunk environment, including ITSI components and features.

The other indexes will not contain useful error messages because:

A). \_introspection. This is not true because the \_introspection index contains data about Splunk resource usage, such as CPU, memory, disk space, and so on. These data can help you monitor the performance and health of your Splunk environment, but not

the error messages.

C). `itsi_summary`. This is not true because the `itsi_summary` index contains summarized data for your KPIs and services, such as health scores, severity levels, threshold values, and so on. These data can help you analyze the trends and anomalies of your IT services, but not the error messages.

D). `itsi_notable_audit`. This is not true because the `itsi_notable_audit` index contains audit data for your notable events and episodes, such as creation time, owner

### NEW QUESTION # 62

When changing a service template, which of the following will be added to linked services by default?

- A. New KPIs.
- B. Thresholds.
- C. Entity Rules.
- D. Health score.

**Answer: C**

Explanation:

Explanation

Link multiple services to a service template to manage them collectively in IT Service Intelligence (ITSI). A service can only be linked to one service template at a time. When you link a service to a service template, any existing KPIs in the service are preserved and KPIs in the template are added to the service. You can choose to append, replace, or keep entity rules.

### NEW QUESTION # 63

Which of the following are the default ports that must be configured on Splunk to use ITSI?

- A. SplunkWeb (8405), SplunkD (8519), and HTTP Collector (8628)
- B. SplunkWeb (8000), SplunkD (8089), and HTTP Collector (8088)
- C. SplunkWeb (8089), SplunkD (8088), and HTTP Collector (8000)
- D. SplunkWeb (8088), SplunkD (8089), and HTTP Collector (8000)

**Answer: B**

Explanation:

Reference:

C is the correct answer because ITSI uses the default ports of Splunk Enterprise for its communication and data collection. SplunkWeb uses port 8000, SplunkD uses port 8089, and HTTP Event Collector uses port 8088. These ports can be changed if needed, but they must match the configuration of Splunk Enterprise. Reference: Ports used by ITSI

### NEW QUESTION # 64

.....

From the ExamcollectionPass platform, you will get the perfect match SPLK-3002 actual test for study.
