**CIPP-E Studienmaterialien: Certified Information Privacy
Professional/Europe (CIPP/E) - CIPP-E Torrent Prüfung & CIPP-E
wirkliche Prüfung**

Natürlich kennen Sie viele verschiedene Unterlagen, wenn Sie die Prüfungsunterlagen zur IAPP CIPP-E Zertifizierung suchen. Aber Sie können laut Umfrage oder dem persönlichen Probieren finden, dass Prüfungsunterlagen von Zertpruefung für Sie am besten geeignet sind. Die Zertifizierungsfragen zur IAPP CIPP-E Zertifizierung von Zertpruefung werden für die Prüfungsteilnehmer, die sich nicht genug Zeit auf die Zertifizierungsprüfung vorbereiten, speziell konzipiert. Damit können Sie viel Zeit sparen, Und diese CIPP-E Prüfungsunterlagen können Ihnen versprechen, diese Prüfung einmalig zu bestehen. Außerdem sind die Prüfungsfragen von Zertpruefung immer die neuesten und die aktualisiersten. Wenn sich die Prüfungsinhalte verändern, bietet Zertpruefung Ihnen die neuesten Informationen.

Das Erreichen der CIPP/E-Zertifizierung demonstriert ein hohes Maß an Verständnis und Kompetenz in EU-Datenschutzgesetzen und -vorschriften. Die Zertifizierung ist in der Branche sehr angesehen und wird von Organisationen auf der ganzen Welt anerkannt. Fachleute, die die CIPP/E-Zertifizierung besitzen, sind gut gerüstet, um Organisationen in Fragen der DSGVO-Konformität, des Datenschutzes und der Privatsphäre sowie des Risikomanagements zu beraten. Die Zertifizierung eröffnet auch eine Vielzahl von Karriereöglichkeiten im wachsenden Bereich des Datenschutzes und der Privatsphäre.

Die IAPP CIPP-E (Certified Information Privacy Professional/Europe) Prüfung ist ein Zertifizierungsprogramm, das darauf abzielt, ein umfassendes Verständnis der Datenschutzgesetze und -vorschriften in Europa zu etablieren. Dieses Zertifizierungsprogramm ist für Personen konzipiert, die für die Verwaltung und den Schutz personenbezogener Daten verantwortlich sind, wie z.B. Datenschutzbeauftragte, Datenschutzexperten und Rechtsanwälte. Die CIPP-E Prüfung ist weltweit anerkannt und gilt als eine der renommiertesten Zertifizierungen im Bereich des Datenschutzes und der Privatsphäre.

IAPP Certified Information Privacy Professional/Europe (CIPP/E) CIPP-E Prüfungsfragen mit Lösungen (Q242-Q247):

242. Frage

The Universal Declaration of Human Rights (1948) connects the right to a private and family life (Article 12) to which other right?

- A. Freedom to manifest one's religion.
- B. Freedom of assembly and association.
- **C. Freedom of expression.**
- D. Prohibition of discrimination.

Antwort: C

Begründung:

Exact extracts from the UDHR (the primary source relied on in the CIPP/E 3rd ed. when covering foundational human-rights instruments):

* Article 12 (Right to privacy): "No one shall be subjected to arbitrary interference with his privacy, family, home or correspondence, nor to attacks upon his honour and reputation. Everyone has the right to the protection of the law against such interference or attacks."

* Article 19 (Freedom of opinion and expression): "Everyone has the right to freedom of opinion and expression; this right includes freedom to hold opinions without interference and to seek, receive and impart information and ideas through any media and regardless of frontiers." These two UDHR provisions are taught together in CIPP/E as part of the historical foundations of European data protection: privacy (Art. 12) is balanced with freedom of expression (Art. 19). The CIPP/E official textbook (3rd ed.) explicitly situates GDPR within this human-rights framework and covers the UDHR in its introductory chapter on the origins and development of European data protection law.

(Context note frequently emphasized in CIPP/E materials: the UDHR also explains the balancing of rights- why privacy and expression are read together- via Article 29(2): in exercising rights and freedoms, limitations may be imposed by law "solely for the purpose of securing due recognition and respect for the rights and freedoms of others...".)

243. Frage

SCENARIO

Please use the following to answer the next question:

You have just been hired by a toy manufacturer based in Hong Kong. The company sells a broad range of dolls, action figures and plush toys that can be found internationally in a wide variety of retail stores. Although the manufacturer has no offices outside Hong Kong and in fact does not employ any staff outside Hong Kong, it has entered into a number of local distribution contracts. The toys produced by the company can be found in all popular toy stores throughout Europe, the United States and Asia. A large portion of the company's revenue is due to international sales.

The company now wishes to launch a new range of connected toys, ones that can talk and interact with children. The CEO of the company is touting these toys as the next big thing, due to the increased possibilities offered: The figures can answer children's questions on various subjects, such as mathematical calculations or the weather. Each figure is equipped with a microphone and

speaker and can connect to any smartphone or tablet via Bluetooth. Any mobile device within a 10-meter radius can connect to the toys via Bluetooth as well.

The figures can also be associated with other figures (from the same manufacturer) and interact with each other for an enhanced play experience.

When a child asks the toy a question, the request is sent to the cloud for analysis, and the answer is generated on cloud servers and sent back to the figure. The answer is given through the figure's integrated speakers, making it appear as though that the toy is actually responding to the child's question. The packaging of the toy does not provide technical details on how this works, nor does it mention that this feature requires an internet connection. The necessary data processing for this has been outsourced to a data center located in South Africa. However, your company has not yet revised its consumer-facing privacy policy to indicate this.

In parallel, the company is planning to introduce a new range of game systems through which consumers can play the characters they acquire in the course of playing the game. The system will come bundled with a portal that includes a Near-Field Communications (NFC) reader. This device will read an RFID tag in the action figure, making the figure come to life onscreen. Each character has its own stock features and abilities, but it is also possible to earn additional ones by accomplishing game goals. The only information stored in the tag relates to the figures' abilities. It is easy to switch characters during the game, and it is possible to bring the figure to locations outside of the home and have the character's abilities remain intact.

In light of the requirements of Article 32 of the GDPR (related to the Security of Processing), which practice should the company institute?

- A. Encrypt the data in transit over the wireless Bluetooth connection.
- B. Include dual-factor authentication before each use by a child in order to ensure a minimum amount of security.
- C. Insert contractual clauses into the contract between the toy manufacturer and the cloud service provider, since South Africa is outside the European Union.
- D. Include three-factor authentication before each use by a child in order to ensure the best level of security possible.

Antwort: A

244. Frage

What was the aim of the European Data Protection Directive 95/46/EC?

- A. To completely prevent the transfer of personal data out of the European Union.
- B. To implement the OECD Guidelines on the Protection of Privacy and trans-border flows of Personal Data.
- C. To harmonize the implementation of the European Convention of Human Rights across all member states.
- D. To further reconcile the protection of the fundamental rights of individuals with the free flow of data from one member state to another.

Antwort: D

Begründung:

The aim of the European Data Protection Directive 95/46/EC was to establish a common legal framework for the protection of personal data within the European Union, and to ensure the free movement of such data within the internal market. The Directive was based on the recognition that the processing of personal data affects the fundamental rights and freedoms of individuals, especially their right to privacy, and that these rights need to be respected and safeguarded. At the same time, the Directive acknowledged that the free flow of personal data is essential for the economic and social development of the EU, and that the harmonization of data protection laws would facilitate the exchange of information and the provision of services across the member states. Therefore, the Directive aimed to strike a balance between the protection of individuals' rights and the promotion of the internal market, by laying down the key principles, obligations and rights for the processing of personal data, and by providing mechanisms for cooperation and coordination among the national data protection authorities. References: Directive 95/46/EC of the European Parliament and of the Council of 24 October 1995 on the protection of individuals with regard to the processing of personal data and on the free movement of such data, Data Protection Directive - Wikipedia

245. Frage

SCENARIO

Please use the following to answer the next question:

Liem, an online retailer known for its environmentally friendly shoes, has recently expanded its presence in Europe. Anxious to achieve market dominance, Liem teamed up with another eco friendly company, EcoMick, which sells accessories like belts and bags. Together the companies drew up a series of marketing campaigns designed to highlight the environmental and economic benefits of their products. After months of planning, Liem and EcoMick entered into a data sharing agreement to use the same marketing database, MarketIQ, to send the campaigns to their respective contacts.

Liem and EcoMick also entered into a data processing agreement with MarketIQ, the terms of which included processing personal data only upon Liem and EcoMick's instructions, and making available to them all information necessary to demonstrate compliance with GDPR obligations.

Liem and EcoMick then procured the services of a company called JaphSoft, a marketing optimization firm that uses machine learning to help companies run successful campaigns. Clients provide JaphSoft with the personal data of individuals they would like to be targeted in each campaign. To ensure protection of its clients' data, JaphSoft implements the technical and organizational measures it deems appropriate. JaphSoft works to continually improve its machine learning models by analyzing the data it receives from its clients to determine the most successful components of a successful campaign. JaphSoft then uses such models in providing services to its client-base. Since the models improve only over a period of time as more information is collected, JaphSoft does not have a deletion process for the data it receives from clients. However, to ensure compliance with data privacy rules, JaphSoft pseudonymizes the personal data by removing identifying information from the contact information. JaphSoft's engineers, however, maintain all contact information in the same database as the identifying information.

Under its agreement with Liem and EcoMick, JaphSoft received access to MarketIQ, which included contact information as well as prior purchase history for such contacts, to create campaigns that would result in the most views of the two companies' websites. A prior Liem customer, Ms. Inan, received a marketing campaign from JaphSoft regarding Liem's as well as EcoMick's latest products. While Ms. Inan recalls checking a box to receive information in the future regarding Liem's products, she has never shopped EcoMick, nor provided her personal data to that company.

For what reason would JaphSoft be considered a controller under the GDPR?

- A. It makes decisions regarding the technical and organizational measures necessary to protect the personal data.
- B. It determines how long to retain the personal data collected.
- C. It uses personal data to improve its products and services for its client-base through machine learning.
- D. It has been provided access to personal data in the MarketIQ database.

Antwort: A

246. Frage

SCENARIO

Please use the following to answer the next question:

Financially, it has been a very good year at ARRA Hotels: Their 21 hotels, located in Greece (5), Italy (15) and Spain (1), have registered their most profitable results ever. To celebrate this achievement, ARRA Hotels' Human Resources office, based in ARRA's main Italian establishment, has organized a team event for its 420 employees and their families at its hotel in Spain.

Upon arrival at the hotel, each employee and family member is given an electronic wristband at the reception desk. The wristband serves a number of functions:

- . Allows access to the "party zone" of the hotel, and emits a buzz if the user approaches any unauthorized areas
- . Allows up to three free drinks for each person of legal age, and emits a buzz once this limit has been reached
- . Grants a unique ID number for participating in the games and contests that have been planned.

Along with the wristband, each guest receives a QR code that leads to the online privacy notice describing the use of the wristband.

The page also contains an unchecked consent checkbox. In the case of employee family members under the age of 16, consent must be given by a parent.

Among the various activities planned for the event, ARRA Hotels' HR office has autonomously set up a photocall area, separate from the main event venue, where employees can come and have their pictures taken in traditional carnival costume.

The photos will be posted on ARRA Hotels' main website for general marketing purposes.

On the night of the event, an employee from one of ARRA's Greek hotels is displeased with the results of the photos in which he appears. He intends to file a complaint with the relevant supervisory authority in regard to the following:

- . The lack of any privacy notice in the separate photocall area
- The unlawful cross-border processing of his personal data
- . The unacceptable aesthetic outcome of his photos

Which of the following principles has likely been violated in the processing of the photocall photos containing personal data?

- A. Adequacy.
- B. Data minimization.
- C. Transparency.
- D. Lawfulness.

Antwort: C
