Free PDF 2026 Microsoft AZ-305: The Best Designing Microsoft Azure Infrastructure Solutions Braindumps Downloads
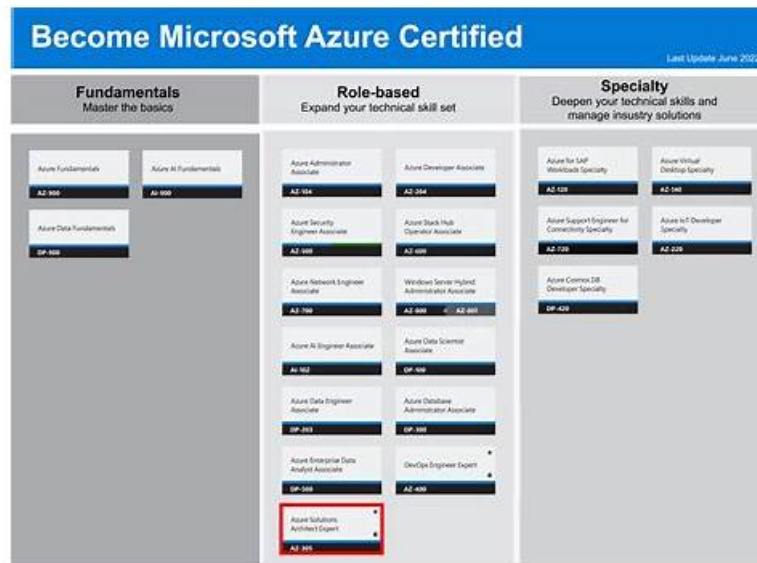

The social situation changes, We cannot change the external environment but only to improve our own strength.While blindly taking measures may have the opposite effect. Perhaps you need help with AZ-305 preparation materials. We can tell you that 99% of those who use AZ-305 Exam Questions have already got the certificates they want. They are now living the life they desire. While you are now hesitant for purchasing our AZ-305 real exam, some people have already begun to learn and walk in front of you!

Microsoft AZ-305 exam covers a wide range of topics related to Azure infrastructure, including designing and implementing Azure compute solutions, designing and implementing Azure storage solutions, designing and implementing Azure networking solutions, and designing and implementing Azure security solutions. Candidates are also tested on their ability to manage Azure resources, configure and manage virtual networks, and implement Azure load balancing and traffic management solutions. AZ-305 exam is intended for professionals who are already familiar with Azure services and have experience working with them.

The Microsoft AZ-305 Exam consists of 40-60 questions that must be completed within 150 minutes. The questions are a mix of multiple-choice, scenario-based, and drag and drop formats. As of September 24, 2020, the exam will be updated to include additional content that covers the latest Azure services and solutions. Candidates who pass the AZ-305 exam will have demonstrated their ability to design secure and reliable solutions on the Azure platform and will be one step closer to becoming a Microsoft Certified: Azure Solutions Architect Expert.

2026 Efficient 100% Free AZ-305 – 100% Free Braindumps Downloads | Reliable AZ-305 Source

We all have same experiences that some excellent people around us further their study and never stop their pace even though they have done great job in their surrounding environment. So it is of great importance to make yourself competitive as much as possible. Facing the AZ-305 exam this time, your rooted stressful mind of the exam can be eliminated after getting help from our AZ-305 practice materials. Among voluminous practice materials in this market, we highly recommend our AZ-305 Study Tool for your reference. Their vantages are incomparable and can spare you from strained condition. On the contrary, they serve like stimulants and catalysts which can speed up you efficiency and improve your correction rate of the AZ-305 real questions during your review progress.

Microsoft AZ-305 Exam is based on the latest Azure platform and covers a range of topics, including Azure virtual machines, Azure

storage, Azure virtual networking, Azure Active Directory, Azure policy, and Azure governance. AZ-305 exam is ideal for IT professionals who want to demonstrate their expertise in designing and implementing Azure solutions, and for those who want to advance their career in cloud computing. AZ-305 Exam is also suitable for developers, architects, and administrators who work with Azure and want to validate their skills and knowledge in the field. Candidates who pass the Microsoft AZ-305 Exam will earn the Microsoft Certified: Azure Solutions Architect Expert certification, which is a highly sought-after credential in the industry.

Microsoft Designing Microsoft Azure Infrastructure Solutions Sample Questions (Q192-Q197):

NEW QUESTION # 192
You have a resource group named RG1 that contains the objects shown in the following table.

You need to configure permissions so that App1 can copy all the secrets from KV1 to KV2. App1 currently has the Get permission for the secrets in KV1.

Which additional permissions should you assign to App1? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

https://docs.microsoft.com/en-us/rest/api/keyvault/

NEW QUESTION # 193
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You need to deploy resources to host a stateless web app in an Azure subscription. The solution must meet the following requirements:
* Provide access to the full .NET framework.
* Provide redundancy if an Azure region fails.
* Grant administrators access to the operating system to install custom application dependencies.

Solution: You deploy two Azure virtual machines to two Azure regions, and you deploy an Azure Application Gateway.
Does this meet the goal?

- A. Yes
- B. No

Answer: B

Explanation:
App Gateway will balance the traffic between VMs deployed in the same region. Create an Azure Traffic Manager profile instead.

NEW QUESTION # 194
You plan to deploy an Azure web app named Appl that will use Azure Active Directory (Azure AD) authentication.
App1 will be accessed from the internet by the users at your company. All the users have computers that run Windows 10 and are joined to Azure AD.
You need to recommend a solution to ensure that the users can connect to App1 without being prompted for authentication and can access App1 only from company-owned computers.
What should you recommend for each requirement? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:
Explanation

Graphical user interface, text, application, chat or text message Description automatically generated
Box 1: An Azure AD app registration
Azure active directory (AD) provides cloud based directory and identity management services. You can use azure AD to manage users of your application and authenticate access to your applications using azure active directory.
You register your application with Azure active directory tenant.
Box 2: A conditional access policy
Conditional Access policies at their simplest are if-then statements, if a user wants to access a resource, then they must complete an action.
By using Conditional Access policies, you can apply the right access controls when needed to keep your organization secure and stay out of your user's way when not needed.
Timeline Description automatically generated

https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/overview
https://docs.microsoft.com/en-us/powerapps/developer/data-platform/walkthrough-register-app-azure-active-dire
"After consenting to use their Dataverse account with the ISV's application, end users can connect to Dataverse environment from external application. The consent form is not displayed again to other users after the first user who has already consented to use the ISV's app. Apps registered in Azure Active Directory are multi-tenant, which implies that other Dataverse users from other tenant can connect to their environment using the ISV's app."

NEW QUESTION # 195
You plan to migrate App1 to Azure.
You need to estimate the compute costs for App1 in Azure. The solution must meet the security and compliance requirements.
What should you use to estimate the costs, and what should you implement to minimize the costs? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

NEW QUESTION # 196
You need to recommend a solution that meets the file storage requirements for App2.
What should you deploy to the Azure subscription and the on-premises network? To answer, drag the appropriate services to the correct locations. Each service may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation
Graphical user interface, application Description automatically generated
Box 1: Azure Files
Scenario: App2 has the following file storage requirements:
* Save files to an Azure Storage account.
* Replicate files to an on-premises location.
* Ensure that on-premises clients can read the files over the LAN by using the SMB protocol.
Box 2: Azure File Sync
Use Azure File Sync to centralize your organization's file shares in Azure Files, while keeping the flexibility, performance, and compatibility of an on-premises file server. Azure File Sync transforms Windows Server into a quick cache of your Azure file share. You can use any protocol that's available on Windows Server to access your data locally, including SMB, NFS, and FTPS. You can have as many caches as you need across the world.
