The Securing Email with Cisco Email Security Appliance certification exam covers various topics such as email security, Cisco Email Security Appliance architecture, message filtering, and message tracking. It also covers the configuration and management of email encryption, antispam, and antivirus features.

Cisco Securing Email with Cisco Email Security Appliance Sample Questions (Q101-Q106):

NEW QUESTION # 101

Which two steps are needed to disable local spam quarantine before external quarantine is enabled? (Choose two.)

- A. Check the External Safelist/Blocklist check box.
- B. Select External Spam Quarantine and click on Configure.
- C. Uncheck the Enable Spam Quarantine check box.
- D. Select Monitor and click Spam Quarantine.
- E. Select Security Services and click Spam Quarantine.

Answer: C,D

NEW QUESTION # 102

A Cisco ESA administrator has several mail policies configured. While testing policy match using a specific sender, the email was not matching the expected policy.

What is the reason of this?

- A. The From* header is checked against all policies in a top-down fashion.
- B. The To " header is checked against all policies in a top-down fashion.
- C. The message header with the highest priority is checked against each policy in a top-down fashion.
- D. The message header with the highest priority is checked against the Default policy in a top-down fashion.

Answer: C

NEW QUESTION # 103

Refer to the exhibit. An engineer needs to change the existing Forged Email Detection message filter so that it references a newly created dictionary named 'Executives'.

```
TEST: if (forged-email-detection ("support", 60)) { fed("from", ""); }
```

What should be done to accomplish this task?

- A. Change "support" to "Executives".
- B. Change "TESF" to "Executives".
- C. Change fed' to "Executives".
- D. Change "from" to "Executives".

Answer: A

NEW QUESTION # 104

```

```

Scan Behavior

Attachment Type Mappings		
Add Mapping...		
Fingerprint/MIME	Type	Edit Delete
Fingerprint	Image	Edit... Delete
Fingerprint	Media	Edit... Delete
MIME Type	audio/*	Edit... Delete
MIME Type	video/*	Edit... Delete
Export List...		

Global Settings	
Action for attachments with MIME types/fingerprints in table above:	Skip
Maximum depth of attachment recursion to scan:	5
Maximum attachment size to scan:	5M
Attachment Metadata scan:	Enabled
Attachment scanning timeout:	30 seconds
Assume attachment matches pattern if not scanned for any reason:	No
Assume zip file to be unscannable if files in the archive cannot be read?	No
Action when message cannot be deconstructed to remove specified attachments:	Deliver
Bypass all filters in case of a content or message filter error:	Yes
Encoding to use when none is specified:	US-ASCII
Convert opaque-signed messages to clear-signed (S/MIME unpacking):	Disabled
Actions for Unscannable Messages due to decoding errors found during URL Filtering	Disabled
Actions:	
Action when a message is unscannable due to extraction failures:	Deliver As Is
Action when a message is unscannable due to RFC violations:	Disabled
Edit Global Settings...	

Refer to the exhibit. Which configuration on the scan behavior must be updated to allow the attachment to be scanned on the Cisco ESA?

- A. Add an additional mapping for attachment type for zip files.
- **B. Increase the maximum attachment size to scan to a larger value.**
- C. Enable assume match pattern if the email was not scanned for any reason.
- D. Increase the maximum recursion depth from 5 to a larger value.

Answer: B

Explanation:

The maximum attachment size to scan is a configuration on the scan behavior that determines the maximum size of an attachment that Cisco ESA will scan for viruses and malware. If an attachment exceeds this size, Cisco ESA will apply the configured action for unscannable messages, such as deliver, drop, or quarantine.

To allow the attachment to be scanned on the Cisco ESA, this configuration must be updated to a larger value than the attachment size, which is 10 MB according to the message header.

The other options are not valid configurations to allow the attachment to be scanned on the Cisco ESA, because they do not affect the maximum attachment size to scan.

NEW QUESTION # 105

Num	Active	Valid	Name
1	Y	Y	Anti_Spoofing
2	N	Y	Skip-filter
3	Y	Y	WHITELIST

Refer to the exhibit. What is the correct order of commands to set filter 2 to active?

- A. filters- > edit- > 2- > Active
- B. filters- > modify- > All- > Active
- C. filters- > set- > 2- > 1
- D. filters- > detail- > 2- > 1

Answer: C

Explanation:

The correct order of commands to set filter 2 to active on the CLI of Cisco ESA is:

- * filters, which enters the message filter mode.
- * set, which sets the status of one or more message filters.
- * 2, which specifies the message filter number.
- * 1, which sets the status of message filter 2 to active.

The other options are not valid orders of commands to set filter 2 to active on the CLI of Cisco ESA, because they use incorrect commands or parameters.
