

Nutanix NCP-DB-6.10 Valid Exam Sample, Exam NCP-DB-6.10 Pass Guide

Being a social elite and making achievements in your own field may be the dream of all people. However, only a very few people seize the initiative in their life. Perhaps our research data will give you some help. As long as you spend less time on the game and spend more time on learning, the NCP-DB-6.10 study materials can reduce your pressure so that users can feel relaxed and confident during the preparation and certification process. It is believed that many users have heard of the NCP-DB-6.10 Study Materials from their respective friends or news stories. So why don't you take this step and try? You will not regret your wise choice.

Having a good command of professional knowledge for customers related to this NCP-DB-6.10 exam is of superior condition. However, that is not certain and sure enough to successfully pass this exam. You need efficiency and exam skills as well. Actually, a great majority of exam candidates feel abstracted at this point, wondering which one is the perfect practice material they are looking for. To make things clear, we will instruct you on the traits of our NCP-DB-6.10 real materials one by one. Here we recommend our NCP-DB-6.10 guide question for your reference.

Pass Guaranteed 2026 NCP-DB-6.10: Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 –The Best Valid Exam Sample

One of the best ways to prepare for the Nutanix NCP-DB-6.10 exam is to study the Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 (NCP-DB-6.10) exam questions. Familiarizing yourself with the NCP-DB-6.10 certification using practice test on real-world data sets can help you build your confidence and prepare you for the exam. Additionally, taking NCP-DB-6.10 Exam Questions and quizzes can help you identify areas where you need to improve and gauge your understanding of the material.

Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 Sample Questions (Q174-Q179):

NEW QUESTION # 174

Which storage technology in Nutanix AOS enables Time Machine to efficiently maintain multiple snapshots with minimal space usage?

- **A. Redirect-on-Write (ROW) Snapshots**
- B. RAID 10 Data Striping
- C. Erasure Coding
- D. Synchronous Replication

Answer: A

Explanation:

Nutanix AOS uses Redirect-on-Write (ROW) snapshots, allowing NDB Time Machine to create frequent snapshots without copying entire datasets, dramatically saving time and space.

NEW QUESTION # 175

An administrator needs to add multiple databases to an existing PostgreSQL instance. How should the administrator satisfy this requirement?

- A. Modify parameter profile using NDB CLI.
- B. Modify parameter profile using post script.
- C. Modify parameter profile using ncli.
- **D. Modify parameter profile using the GUI.**

Answer: D

Explanation:

To add multiple databases to an existing PostgreSQL instance managed by NDB, the administrator should use the NDB graphical user interface (GUI). The GUI provides a user-friendly way to modify the parameter profile associated with the PostgreSQL instance, allowing the addition of new databases by adjusting settings such as database names, sizes, or configurations. This process typically involves navigating to the "Databases" or "Instances" section, selecting the PostgreSQL instance, and editing the parameter profile to include additional databases.

NEW QUESTION # 176

An administrator needs to protect a database with a Point In Time Recovery (PITR) SLA that provides a minimum of seven days of log recovery.

What is the minimum Default SLA that meets this requirement?

- A. DEFAULT_008 BRONZE SLA
- B. DEFAULT_008 BRASS SLA
- **C. DEFAULT_008 SILVER SLA**
- D. DEFAULT_008 GOLD SLA

Answer: C

Explanation:

Nutanix Era (NDB) utilizes DEFAULT_008 SLAs with varying frequencies for snapshots and log backups to achieve different recovery point objectives (RPOs). Here's how they compare:

DEFAULT_008 GOLD SLA: Typically has frequent log backups (e.g., every 15 minutes) and snapshots every few hours. This is designed for critical databases with very low RPOs.

DEFAULT_008 SILVER SLA: Offers a balance between protection and resource usage. Log backups might occur every hour with snapshots less frequently. This SLA is often suitable for databases requiring a good RPO without being overly resource-intensive.

DEFAULT_008 BRONZE SLA: Has less frequent log backups (e.g., every few hours) and less frequent snapshots. This is used for databases with less stringent RPO requirements. DEFAULT_008 BRASS SLA: This has infrequent log backups and is usually considered the least protective SLA with the longest potential RPO

NEW QUESTION # 177

Which port should be opened to ensure the NDB server, NDB agent, and NDB database agent can communicate with the registered cluster via REST API calls?

- A. 0
- B. 1
- **C. 2**
- D. 3

Answer: C

Explanation:

To ensure the NDB server, NDB agent, and NDB database agent can communicate with the registered cluster via REST API calls, port 2009 must be opened. This port is used by NDB components to facilitate RESTful communication with the Nutanix cluster (e.g., Prism Element or Prism Central) for operations such as provisioning, monitoring, and management. Proper firewall configuration to allow traffic on this port is a prerequisite for NDB's integration with the cluster.

NEW QUESTION # 178

How is a software profile created?

- A. Create a software profile from a registered Database Server VM.
- B. Clone a software profile provided by Era and modify as needed.
- C. In the Era CLI select Profiles Software, and then a template VM.
- **D. In the Era CLI select Profiles Software, and then a database engine, OS version, and database version,**

Answer: D

Explanation:

Nutanix Database Automation (NCP-DB) simplifies database provisioning using predefined profiles customized to your environment. Software profiles, which are templates of the OS and database engine, allow you to maintain consistent software versions. You then use additional profiles to customize that deployment.

NEW QUESTION # 179

.....

To develop a new study system needs to spend a lot of manpower and financial resources, first of all, essential, of course, is the most intuitive skill learning materials, to some extent this greatly affected the overall quality of the learning materials. Our Nutanix Certified Professional - Database Automation (NCP-DB) v6.10 study training dumps do our best to find all the valuable reference books, then, the product we hired experts will carefully analyzing and summarizing the related materials, such as: Nutanix NCP-DB-6.10 exam, eventually form a complete set of the review system. Experts before starting the compilation of "the NCP-DB-6.10 Latest Questions", has put all the contents of the knowledge point build a clear framework in mind, though it needs a long wait, but product experts and not give up, but always adhere to the effort, in the end, they finished all the compilation. So, you're lucky enough to meet our NCP-DB-6.10 test guide I, and it's all the work of the experts. If you want to pass the qualifying exam with high quality, choose our products. We are absolutely responsible for you. Don't hesitate!
