If you want to have a good employment platform, then take office at the same time there is a great place to find that we have to pay attention to the importance of qualification examination.

Scaled Agile SAFe Practice Consultant SPC (6.0) Sample Questions (Q179-

Q184):

NEW QUESTION # 179

What is the primary purpose of the management meeting at the end of Day 1 of PI Planning?

- A. To evaluate the performance of teams.
- B. To make adjustments to the PI scope and address program challenges.
- C. To assign business value to the teams' draft PI Objectives.
- D. To design the next generation of the product.

Answer: B

NEW QUESTION # 180

(Select 2) The SAFe Economic Framework guides Value Stream investment decisions by: _____.

- A. Prioritizing work by ROI.
- B. Empowering the Product Owners to sequence the Value Stream Backlog.
- C. Finding Value Streams.
- D. Requiring lightweight business cases for Epics.

Answer: A,D

Explanation:

The SAFe Economic Framework supports investment decisions through:

Prioritizing work by ROI (A): Economic prioritization techniques (such as WSJF or ROI) ensure the highest value work is prioritized.

Requiring lightweight business cases for Epics (B): This ensures sound economic reasoning and justification before large investments are made.

Empowering Product Owners to sequence the Value Stream Backlog (C) is not a portfolio-level economic framework action.

Finding Value Streams (D) is part of the implementation roadmap, not ongoing investment decisions.

"The Economic Framework guides decisions by requiring business cases and prioritizing work using economic factors such as ROI."

(Source: SAFe 6.0 Framework: Economic Decision Making; SPC 6.0 Guide "Exploring Lean Portfolio Management")

NEW QUESTION # 181

WSJF is recommended for prioritizing the Team Backlog.

- A. True
- B. False

Answer: B

NEW QUESTION # 182

Backlogs in SAFe behave just like queues.

- A. True
- B. False

Answer: B

NEW QUESTION # 183

You are at a retrospective meeting where a program is trying to address a long-existing problem: unreliable PI commitments. One of the participants suggests that they are working on too many things at a time.

What aspect of the program causes uncontrollable amounts of work in process?

- A. Teams don't do a good job of task-switching.
- B. All program teams are cross-functional, and therefore every team spawns work in multiple areas at the same time.

- C. Backlog items in the Program Backlog are not truly end-to-end Features; they look more like large chunks of work at different layers of the system

Answer: C

Explanation:

When Program Backlog items are not properly split into end-to-end Features, but instead are large chunks of work or technical components, it causes teams to work on too many parallel streams, increasing WIP (Work In Process). SAFe recommends that Program Backlog items be INVEST (Independent, Negotiable, Valuable, Estimable, Small, Testable) Features to ensure flow.

"When backlog items are not end-to-end Features, but rather large technical or architectural pieces, it increases the WIP, causes more dependencies, and makes it difficult for teams to complete work within the PI." (Source: SAFe 6.0 SPC Guide, "Coaching ART Execution" module; Features and Program Backlog best practices.)

NEW QUESTION # 184

.....

To let the clients have an understanding of their mastery degree of our SAFe-SPC guide materials and get a well preparation for the test, we provide the test practice software to the clients.
