Itbraindumps regularly updates its RPA Capstone Experience (CAP-2101-20) questions PDF file to improve the questions and introduce changes when required.

BOMI International RPA Capstone Experience Sample Questions (Q59-Q64):

NEW QUESTION # 59

A property manager is looking to select an elevator service contractor. The property manager is concerned with needing emergency maintenance on weekends. Which assessment criteria would the property manager need to further consider in the selection process?

- A. Financial soundness
- **B. Sufficient workforce**
- C. Facility inventory
- D. Technical expertise

Answer: B

Explanation:

The property manager is specifically worried about availability for emergency maintenance on weekends.

This means they need to be sure the contractor has enough staff (sufficient workforce) available at all times - including off-hours - to respond to emergencies. While technical expertise is important, it won't help if no one is available to show up when needed.

NEW QUESTION # 60

A property manager is determining how much to lease their newly vacant space for. The manager has compiled data from neighboring buildings about their rents, vacancy, amenities, and absorption. The manager should use this data to create what kind of report?

- A. Property assessment
- B. Building analysis
- C. Logistics assessment
- **D. Market comparable**

Answer: D

Explanation:

A market comparable report (or "comps") analyzes similar properties in the area to determine appropriate rental rates and leasing terms. By comparing rents, vacancy rates, amenities, and absorption, the property manager can make informed decisions based on local market conditions.

NEW QUESTION # 61

If the property manager fails to regularly maintain and review water treatment reports and there is an increase in mineral saturation combined with high pH, what potential water use problem can occur?

- A. Corrosion
- **B. Scale**
- C. Dissolved solids
- D. Micro-bacterial growth

Answer: B

Explanation:

Analysis:

* High mineral saturation + high pH typically leads to precipitation of minerals.

* This causes deposits (such as calcium or magnesium) to build up in water systems, pipes, or equipment - commonly referred to as scale.

* Corrosion is usually linked to low pH or acidic conditions.

- * Micro-bacterial growth is influenced more by temperature and disinfection levels.
- * Dissolved solids are a condition, not a problem - scale is the problem caused by them under these conditions.

NEW QUESTION # 62

What is the rentable square footage for the downtown high-rise building rounded to the nearest whole number?

Options:

- A. 458,715
- B. 323,130
- C. 633,335
- D. 42,000

Answer: C

Explanation:

- Usable area = 452,382 sq ft
- R/U (Rentable/Usable) Factor = 1.4

To find rentable square footage:

$$\text{Rentable Sq Ft} = \text{Usable Sq Ft} \times \text{R/U Factor}$$

$$= 452,382 \times 1.4 = 633,334.8 \approx 633,335$$

NEW QUESTION # 63

Which of the following would be the most effective risk management tool for mitigating potential injury claims in a multi-tenant office building?

- A. Reducing the cost of maintenance services to cut expenses.
- B. Conducting monthly safety inspections and addressing any hazards immediately.
- C. Requiring all tenants to purchase their own liability insurance.
- D. Ensuring that the building's insurance policy covers liability for tenant injuries.

Answer: B

NEW QUESTION # 64
