最新的 CCES 156-536 免費考試真題 (Q13-Q18):

問題 #13

What do Push Operations allow?

- A. Allow the Endpoint Security Management Server to push operations to client computers without installing policy
- B. Allow the Management Console to operate without installing policy
- C. Allow the Endpoint clients to push operations to other client computers without installing policy
- D. Allows the Endpoint Security Management Server to operate independently of the Security Management Server

答案：A

解題說明：

The Check Point Harmony Endpoint documentation explicitly defines Push Operations as operations that the Endpoint Security Management Server (EMS) directly sends to client computers without requiring a policy installation. These operations are used for quick responses and remediation actions on endpoints without needing to deploy policy changes.

Exact Extract from Official Document:

"Push operations are operations that the server pushes directly to client computers with no policy installation required."
