1 / 9

P.S. Free & New JN0-351 dumps are available on Google Drive shared by ActualVCE: <https://drive.google.com/open?id=1K0LKV5O9yZpGzSokADMigvtNauXMFobx>

We promise that using JN0-351 certification training materials of ActualVCE, you will pass JN0-351 exam in your first try. If not or any problems in JN0-351 certification training materials, we will refund fully. What's more, after you purchase our JN0-351 Certification Training materials, ActualVCE will offer update service in one year.

Our test engine is an exam simulation that makes our candidates feel the atmosphere of JN0-351 actual test and face the difficulty of certification exam ahead. It reminds you of your mistakes when you practice JN0-351 vce dumps next time and you can set your test time like in the formal test. Our JN0-351 Training Materials cover the most content of the real exam and the accuracy of our JN0-351 test answers is 100% guaranteed.

Latest JN0-351 Test Online, New JN0-351 Practice Materials

Juniper Enterprise Routing and Switching, Specialist (JNCIS-ENT) evolves swiftly, and a practice test may become obsolete within weeks of its publication. We provide free updates for Juniper JN0-351 exam questions for three months after the purchase to ensure you are studying the most recent solutions. Furthermore, ActualVCE is a very responsible and trustworthy platform dedicated to

certifying you as a specialist. We provide a free sample before purchasing Juniper JN0-351 valid questions so that you may try and be happy with its varied quality features. Learn for your Juniper with confidence by utilizing the ActualVCE JN0-351 study guide, which is always forward-thinking, convenient, current, and dependable.

Juniper Enterprise Routing and Switching, Specialist (JNCIS-ENT) Sample Questions (Q115-Q120):

NEW QUESTION # 115

Which two statements about BGP facilitate the prevention of routing loops within an autonomous system? (Choose two.)

- A. IBGP sessions must be configured as a physical full mesh.
- B. IBGP sessions must be configured as a logical full mesh.
- C. Routes learned from IBGP neighbors are not readvertised to other IBGP neighbors.
- D. Routes learned from IBGP neighbors are only advertised to other IBGP neighbors.

Answer: B,C

NEW QUESTION # 116

In addition to the MAC addresses, what information is stored in the bridging table? (Choose two.)

- A. MAC learned time
- B. interface details
- C. ether type details
- D. preamble of Ethernet packet

Answer: A,B

NEW QUESTION # 117

You are a network operator troubleshooting BGP connectivity.

Which two statements are correct about the output shown in the exhibit? (Choose two.)

```

user@R1> show bgp neighbor
Peer: 10.32.1.2+63645 AS 65401 Local: 10.32.1.1+179 AS 65400
  Description: EBGp peering to 10.32.1.2
  Group: IPCLOS_eBGP      Routing-Instance: master
  Forwarding routing-instance: master
  Type: External   State: Established   Flags: <Sync>Last
  State: OpenConfirm   Last Event: RecvkeepAlive
  Last Error: None
  Export: [ IPCLOS_BGP_EXP ] Import: [ IPCLOS_BGP_IMP ]
  Options: <Preference PeerAS Multipath LocalAS Refresh>
  Options: <VpnApplyExport MtuDiscovery MultipathAs BfdEnabled>
  Holdtime: 90 Preference: 170 Local AS: 65400 Local System AS: 0
  Number of flaps: 0
  Peer ID: 10.52.100.2 Local ID: 10.52.100.1 Active Holdtime: 90
  Keepalive Interval: 30 Group index: 0 Peer index: 0  SNMP
index: 0
  I/O Session Thread: bgpio-0 State: Enabled
  BFD: enabled, up
  Local Interface: ge-0/0/1.0
  NLRI for restart configured on peer: inet-unicast
  NLRI advertised by peer: inet-unicast
  NLRI for this session: inet-unicast
  Peer supports Refresh capability (2)
  Stale routes from peer are kept for: 300
  Peer does not support Restarter functionality
  Restart flag received from the peer: Notification
  NLRI that restart is negotiated for: inet-unicast
  NLRI of received end-of-rib markers: inet-unicast
  NLRI of all end-of-rib markers sent: inet-unicast
  Peer does not support LLGR Restarter functionality
  Peer supports 4 byte AS extension (peer-as 65401)
  Peer does not support Addpath
  Table inet.0 Bit: 20000
    RIB State: BGP restart is complete
    Send state: in sync
    Active prefixes:          6
    Received prefixes:        9
    Accepted prefixes:        9
    Suppressed due to damping: 0
    Advertised prefixes:      22
  Last traffic (seconds): Received 22 Sent 10 Checked 69617
  Last Input messages: Total 2568 Updates 4 Refreshes 0 Octets 48991
  Output messages:      Total 2572 Updates 8 Refreshes 0 Octets 49362
  Output Queue[1]: 0      (inet.0, inet-unicast)

```

- A. Peer 10.32.1.2 is configured for AS 63645.
- B. The BGP session is not established.
- C. The routers are exchanging IPv4 routes.
- D. The R1 is configured for AS 65400.

Answer: C,D

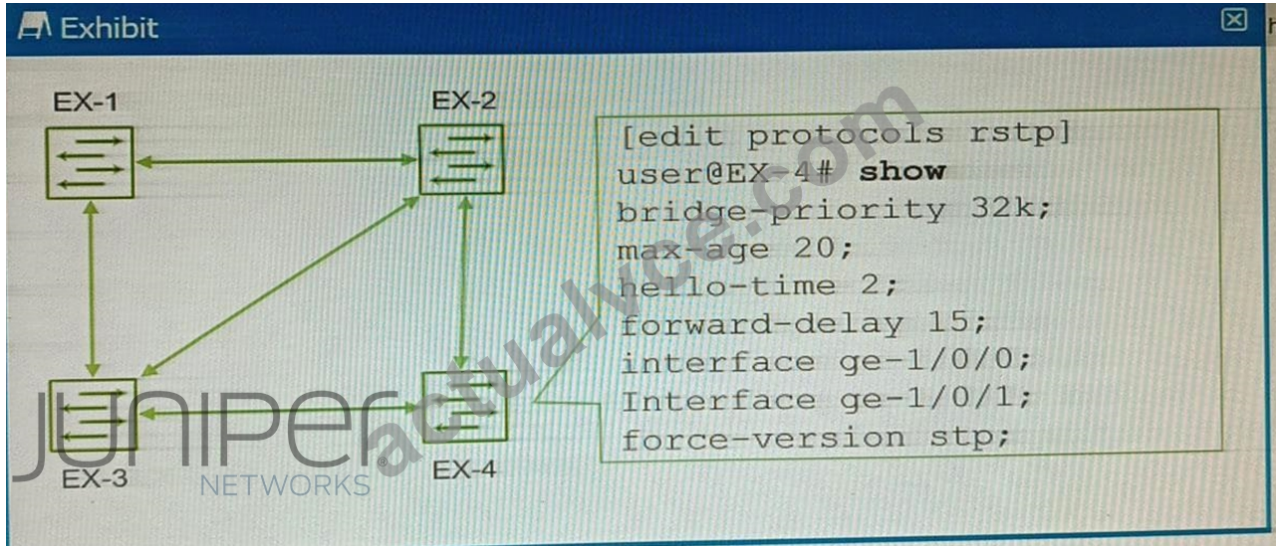

Explanation:

The local AS is 65400, as indicated by "Local AS: 65400".

The output shows "NLRI for this session: inet-unicast", which indicates that the routers are exchanging IPv4 unicast routes.

NEW QUESTION # 118

Exhibit.

You have configured the four EX Series switches with RSTP, as shown in the exhibit. You discover that whenever a link between switches goes up or down, the switches take longer than expected for RSTP to converge, using the default settings. In this scenario, which action would solve the delay in RSTP convergence?

- A. The max-age must be increased to 20
- B. The hello-time must be increased.
- **C. The force-version must be removed.**
- D. The bridge priority for EX-4 must be set at 4000.

Answer: C

Explanation:

The exhibit shows the configuration of RSTP on EX-4, which has the command `force-version stp`. This command forces the switch to use the legacy STP protocol instead of RSTP, even though the switch supports RSTP¹. This means that EX-4 will not be able to take advantage of the faster convergence and enhanced features of RSTP, such as edge ports, link type, and proposal/agreement sequence².

The other switches in the network are likely to be running RSTP, as it is the default protocol for EX Series switches³. Therefore, there will be a compatibility issue between EX-4 and the other switches, which will result in longer convergence times and suboptimal performance. The switch will also generate a warning message that says "Warning: STP version mismatch with neighbor" when it receives a BPDU from a RSTP neighbor¹.

To solve this problem, the `force-version` command must be removed from EX-4, so that it can run RSTP natively and interoperate with the other switches in the network. This will enable faster convergence and better stability for the network topology. To remove the command, you can use the `delete protocols rstp force-version` command in configuration mode¹.

NEW QUESTION # 119

Which two actions are performed by the firewall filter shown in the exhibit? (Choose two.)

```

[edit firewall]
user@switch# show
family ethernet-switching {
    filter mac-address {
        term one {
            from {
                source-mac-address 88:05:00:29:3c:de/48;
            }
            then {
                log;
            }
        }
        term two {
            then accept;
        }
    }
}

```

- A. Term two requires a from statement.
- B. Frames with the 88:05:00:29:3c:de source MAC address are accepted and logged.
- C. Frames without the 88:05:00:29:3c:de source MAC address are discarded and logged.
- D. All traffic is permitted.

Answer: B,D

NEW QUESTION # 120

.....

Hence, memorizing them will help you get prepared for the Juniper JN0-351 examination in a short time. The product of ActualVCE comes in PDF, desktop practice exam software, and Enterprise Routing and Switching, Specialist (JNCIS-ENT) (JN0-351) web-based practice test. To give you a complete understanding of these formats, we have discussed their features below.

Latest JN0-351 Test Online: <https://www.actualvce.com/Juniper/JN0-351-valid-vce-dumps.html>

Now let's discuss the benefits you can get upon buying our Enterprise Routing and Switching, Specialist (JNCIS-ENT) (JN0-351) exam material today. Second, you can get our JN0-351 practice test only in 5 to 10 minutes after payment, which enables you to devote yourself to study with our JN0-351 exam questions as soon as possible. Taking ActualVCE's web-based Juniper JN0-351 practice test is the best method to feel the real Juniper JN0-351 exam scenario. Candidates will find all kinds of JN0-351 exam dumps and study guide and training courses at ActualVCE ActualVCE JN0-351 exam dumps are guaranteed to pass.

At this point, if no topics existed, the script JN0-351 would break out of the 'if.else' construct and be over with. Using the Graphic Equalizer on a final mix. Now let's discuss the benefits you can get upon buying our Enterprise Routing and Switching, Specialist (JNCIS-ENT) (JN0-351) exam material today.

Actual Juniper JN0-351 Exam Questions – Key To Success

Second, you can get our JN0-351 practice test only in 5 to 10 minutes after payment, which enables you to devote yourself to study with our JN0-351 exam questions as soon as possible.

Taking ActualVCE's web-based Juniper JN0-351 practice test is the best method to feel the real Juniper JN0-351 exam scenario. Candidates will find all kinds of JN0-351 exam dumps and study guide and training courses at ActualVCE ActualVCE JN0-351 exam dumps are guaranteed to pass.

We have been specializing JN0-351 exam dumps many years and have a great deal of long-term old clients, and we would like to be a reliable cooperator on your learning path and in your further development.
