Reliable 156-536 Mock Test - Exam 156-536 Introduction
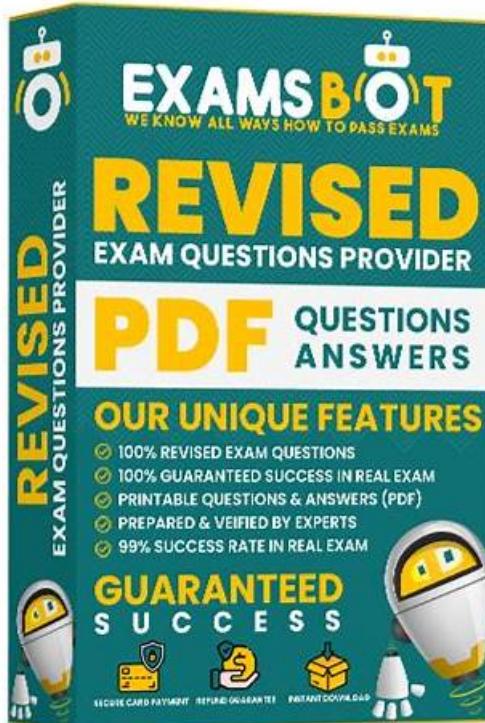

As the world's well-known training website, Pass4SureQuiz CheckPoint 156-536 test questions and test answers are fit to all of the world. You will refer to free demo and pdf. Questions and answers is also the realest. Our Pass4SureQuiz is the springboard which can help IT people to improve their power. The passing rate of Pass4SureQuiz CheckPoint 156-536 braindump is 100%. Therefore, many people choose it to get CheckPoint 156-536 certification.

CheckPoint 156-536 Exam Syllabus Topics:

Topic	Details
Topic 1	• Harmony Endpoint Management as a Service: This section targets Harmony Endpoint Security Professionals, focusing on managing endpoint security as a service. It covers the cloud-based management capabilities of Harmony Endpoint, allowing for scalable deployment and policy management.
Topic 2	• Large-Scale Harmony Endpoint Deployment: This domain is aimed at Harmony Endpoint Security Professionals and addresses the challenges associated with deploying Harmony Endpoint at scale. Candidates will learn about strategies for efficient large-scale implementation while maintaining security standards across numerous devices.
Topic 3	• Introduction to Harmony Endpoint: This section measures the skills of CheckPoint Security Administrators about the fundamental concepts of Harmony Endpoint. It introduces candidates to the capabilities of the Harmony Endpoint solution, which is designed to protect endpoint devices from various cyber threats.
Topic 4	• Deploying Harmony Endpoint Data Security Protection: In this domain, CheckPoint Security Administrators will demonstrate their skills in deploying data security protections within Harmony Endpoint. This includes configuring data loss prevention strategies and ensuring data integrity across endpoints.

Topic 5	• Advanced Threat Prevention: CheckPoint Security Administrators will be assessed in this area, which covers advanced techniques for preventing sophisticated threats. This includes leveraging threat intelligence and proactive measures to safeguard endpoints from emerging cyber risks.
Topic 6	• Harmony Endpoint Security Management: This section focuses on the skills of Harmony Endpoint Security Professionals and covers the management aspects of Harmony Endpoint Security. It emphasizes how to effectively configure and manage security policies across endpoint devices.

Pass Guaranteed Fantastic CheckPoint - 156-536 - Reliable Check Point Certified Harmony Endpoint Specialist - R81.20 (CCES) Mock Test

There are so many features to show that our 156-536 study guide surpasses others. You can have a free try for downloading our 156-536 exam demo before you buy our products. What's more, you can acquire the latest version of 156-536 training materials checked and revised by our exam professionals after your purchase constantly for a year. Besides, the pass rate of our 156-536 Exam Questions are unparalled high as 98% to 100%, you will get success easily with our help.

CheckPoint Check Point Certified Harmony Endpoint Specialist - R81.20 (CCES) Sample Questions (Q32-Q37):

NEW QUESTION # 32
What GUI options do you have to access the Endpoint Security Management Server in a cloud environment?

- A. SmartEndpoint Distributor
- B. SmartConsoleandGaiaWebUI
- C. Nothing, there is no Cloud Support for Endpoint Management Server.
- D. Infinity Portal and Web Management Console

Answer: D

NEW QUESTION # 33
Media Encryption and Port Protection (MEPP) provide strong encryption for removable media, such as?

- A. USB drives and CD/DVDs
- B. External ports only
- C. Cables and Ethernet cords
- D. USB drives, CD/DVDs, and SD cards, and for external ports

Answer: D

Explanation:
Media Encryption and Port Protection (MEPP) in Check Point Harmony Endpoint is a feature designed to secure data on removable media by providing strong encryption and to control access through external ports.
According to theCP_R81.20_Harmony_Endpoint_Server_AdminGuide.pdfonpage 280, under the section
"Media Encryption & Port Protection," it states:
"Protects data stored on the computers by encrypting removable media devices and allowing tight control over computers' ports (USB, Bluetooth, and so on)." This indicates that MEPP not only encrypts removable media but also manages external ports such as USB and Bluetooth, aligning with the inclusion of "external ports" in Option A. Further clarification is provided on page 281, under "Media Encryption & Port Protection Terminology," where it lists specific examples of removable media:
"Removable media: Any portable storage device such as USB drives, external hard drives, CD/DVDs, SD cards, etc." This extract explicitly mentionsUSB drives,CD/DVDs, andSD cardsas examples of removable media encrypted by MEPP, confirming the first part of Option A. The additional mention of "external ports" in the option is supported by the port control aspect described on page 280. Thus,Option Afully captures the scope of MEPP's functionality.
* Option B ("Cables and Ethernet cords")is incorrect because MEPP does not target network cables or Ethernet cords; its focus is

on removable storage devices and port access control.
* Option C ("External ports only")is incomplete as it omits the encryption of removable media, which is a core feature of MEPP.
* Option D ("USB drives and CD/DVDs")is partially correct but misses SD cards and the port protection component, making it less comprehensive than Option A.
