

Updated ZDTA Reliable Study Notes | Amazing Pass Rate For ZDTA Exam | Marvelous ZDTA: Zscaler Digital Transformation Administrator

BONUS!!! Download part of PrepAwayExam ZDTA dumps for free: <https://drive.google.com/open?id=1nh63wLLgfYh6lz4gMA8-CR3BbWHfkHqi>

The Zscaler Digital Transformation Administrator (ZDTA) questions are available in three easy-to-use forms. The first one is a ZDTA Dumps PDF form, and it is printable and portable. You can print Zscaler Digital Transformation Administrator (ZDTA) questions PDF or can access them by saving them on your smartphones, tablets, and laptops. The Zscaler Digital Transformation Administrator (ZDTA) dumps PDF format can be used anywhere, anytime and is essential for students who like to learn from their smart devices for ZDTA exam.

Zscaler ZDTA Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Cyberthreat Protection Services: This domain targets Cybersecurity Analysts and covers broad cybersecurity fundamentals and advanced threat protection capabilities. Candidates must know about malware protection, intrusion prevention systems, command and control channel detection, deception technologies, identity threat detection and response, browser isolation, and incident detection and response. Data Protection Services

Topic 2	<ul style="list-style-type: none"> • Zscaler Zero Trust Automation: This part measures Automation Engineers on their ability to utilize Zscaler APIs, including the One API framework, for automating zero trust security functions and integrating with broader enterprise security and orchestration tools.
Topic 3	<ul style="list-style-type: none"> • Risk Management: This domain measures skills of Risk Managers and Security Architects in using Zscaler's comprehensive risk management suite. Candidates are expected to understand risk capabilities, dashboards, asset and financial risk insights, vulnerability management, deception tactics, identity protection, and breach prediction analytics.
Topic 4	<ul style="list-style-type: none"> • Access Control Services: This area assesses Security Operations Specialists on implementing access control mechanisms including cloud app control, URL filtering, file type controls, bandwidth controls, and segmentation. It also covers Microsoft 365 policies, private application access strategies, and firewall configurations to protect enterprise resources.
Topic 5	<ul style="list-style-type: none"> • Connectivity Services: This domain evaluates Network Security Engineers on configuring and managing connectivity essentials like device posture assessment, trusted network definitions, browser access controls, and TLS • SSL inspection deployment. It also includes applying policy frameworks focused on authentication and enforcement for internet access, private access, and digital experience.

Reliable ZDTA Test Sample | Reliable ZDTA Test Tutorial

The PrepAwayExam is committed to acing the Zscaler Digital Transformation Administrator (ZDTA) exam questions preparation quickly, simply, and smartly. To achieve this objective PrepAwayExam is offering valid, updated, and real Zscaler ZDTA Exam Dumps in three high-in-demand formats. These Zscaler Digital Transformation Administrator (ZDTA) exam questions formats are PDF dumps files, desktop practice test software, and web-based practice test software.

Zscaler Digital Transformation Administrator Sample Questions (Q120-Q125):

NEW QUESTION # 120

A user is accessing a private application through Zscaler with SSL Inspection enabled. Which certificate will the user see on the browser session?

- **A. Zscaler generated MITM Certificate**
- B. Real Server Certificate
- C. A self-signed certificate from Zscaler
- D. No certificate, as the session is decrypted by the Service Edge

Answer: A

Explanation:

When SSL Inspection is enabled and a user accesses a private application through Zscaler, the user will see a Zscaler generated MITM (Man-In-The-Middle) Certificate on their browser session. Zscaler intercepts and decrypts SSL/TLS traffic at the Service Edge and then re-encrypts it before forwarding it to the client, presenting its own certificate to maintain the security of the connection while enabling inspection.

This allows Zscaler to inspect encrypted traffic for threats and policy enforcement transparently without exposing the original server's certificate. The study guide clarifies this mechanism under SSL Inspection details.

NEW QUESTION # 121

Which of the following DLP components make use of Boolean Logic?

- A. DLP dictionaries
- B. DLP Engines

- C. DLP identifiers
- **D. DLP Rules**

Answer: D

Explanation:

Zscaler DLP separates detection logic from enforcement policy. Dictionaries contain the sensitive-data patterns, keywords, identifiers, regexes, or fingerprinted data that identify protected information. DLP engines use those dictionaries to evaluate content, and DLP rules or policies decide the enforcement action. Option A (DLP Rules) is correct because the detection foundation of a DLP engine is the dictionary content it evaluates against traffic or files.

Why the other options are incorrect:

B). DLP dictionaries: DLP dictionaries hold the sensitive-data patterns, keywords, identifiers, or fingerprinted values used for detection.

C). DLP Engines: DLP Engines evaluate dictionaries and conditions, but Boolean logic is used when rules combine match conditions into policy logic.

D). DLP identifiers: DLP identifiers are individual match elements, while the broader engine/dictionary structure does the content detection work.

NEW QUESTION # 122

What ports and protocols are forwarded to the Zero Trust Exchange when Zscaler Client Connector is using Tunnel 2.0?

- A. TCP ports 80, 443 and 8080 only.
- **B. All TCP and UDP ports as well as ICMP traffic.**
- C. All Web ports as well as FTP and SSH.
- D. Any HTTP/HTTPS traffic as well as DNS.

Answer: B

Explanation:

Zscaler Client Connector's Tunnel 2.0 uses a packet#filter based tunnel that encapsulates all IP traffic - both TCP and UDP on any port, plus ICMP - to the Zero Trust Exchange

NEW QUESTION # 123

What is the main purpose of Sandbox functionality?

- **A. Identify Zero-Day Threats**
- B. Block malware that we have previously identified
- C. Balance threat detection across customers around the world
- D. Build a test environment where we can evaluate the result of policies

Answer: A

Explanation:

Cloud Sandbox is built for unknown and suspicious files, especially when static signatures are not enough.

The file is detonated in an isolated environment so Zscaler can observe behavior and assign a verdict before allowing it to reach users. Option C (Identify Zero-Day Threats) is correct because sandboxing is most valuable for identifying zero-day threats and advanced malware behavior.

Why the other options are incorrect:

A). Block malware that we have previously identified: Known-malware blocking is signature/reputation enforcement. Cloud Sandbox adds value by analyzing unknown files before a known signature exists.

B). Build a test environment where we can evaluate the result of policies: A test environment for policy evaluation is a lab function. Cloud Sandbox is a malware detonation and behavior-analysis service.

D). Balance threat detection across customers around the world: Balancing detection across customers describes cloud-scale operations. Sandbox's student-level purpose is to detonate and classify suspicious files.

NEW QUESTION # 124

You recently deployed an additional App Connector to an existing app connector group. What do you need to do before starting the zpa-connector service?

- A. Monitor the peak CPU and memory utilization of the AC
- B. Schedule periodic software updates for the agg connector group
- C. Check the status of the new App Connector in the administration portal
- D. Copy the group provisioning key to /opt/zscaler/var/provision key

Answer: D

Explanation:

Before you start the zpa-connector service on the new host, you must place the App Connector Group's provisioning key into /opt/zscaler/var/provision_key so it can register with the control plane.

NEW QUESTION # 125

.....

Experts at PrepAwayExam have also prepared Zscaler ZDTA practice exam software for your self-assessment. This is especially handy for preparation and revision. You will be provided with an examination environment and you will be presented with actual exam Zscaler ZDTA Exam Questions. This sort of preparation method enhances your knowledge which is crucial to excelling in the actual certification exam.
