Salesforce Certified Data Architect certification demonstrates that the candidate has the knowledge, skills, and expertise to manage complex data architecture solutions in Salesforce. Salesforce Certified Data Architect certification is also an indicator of the candidate's commitment to professional development and continuous learning.

Salesforce Certified Data Architect Sample Questions (Q258-Q263):

NEW QUESTION # 258
UC has been using SF for 10 years. Lately, users have noticed, that the pages load slowly when viewing Customer and Account list view.
To mitigate, UC will implement a data archive strategy to reduce the amount of data actively loaded.
Which 2 tasks are required to define the strategy? Choose 2 answers:

- A. Identify the recovery time objective.
- B. Identify the data retention requirements
- C. Identify the recovery point objective.
- D. Identify how the archive data will be accessed and used.

Answer: B,D

Explanation:
The two tasks required to define the data archive strategy are to identify how the archive data will be accessed and used, and identify the data retention requirements. Data archiving is the process of moving infrequently used or historical data from active storage to a separate storage location for long-term retention. Data archiving can improve performance, reduce storage costs, and comply with legal or regulatory obligations. To define a data archive strategy, a data architect needs to consider how the archived data will be accessed and used by different users or processes in Salesforce or outside Salesforce, and how long the archived data needs to be retained based on business or legal requirements.

NEW QUESTION # 259
Universal Containers (UC) is planning to move away from legacy CRM to Salesforce. As part of one-time data migration, UC will need to keep the original date when a contact was created in the legacy system. How should an Architect design the data migration solution to meet this requirement?

- A. Enable "Set Audit Fields" and assign the permission to the user loading the data for the duration of the migration.
- B. After the data is migrated, perform an update on all records to set the original date in a standard CreatedDate field.
- C. Create a new field on Contact object to capture the Created Date. Hide the standard CreatedDate field using Field -Level Security.
- D. Write an Apex trigger on the Contact object, before insert event to set the original value in a standard CreatedDate field.

Answer: A

NEW QUESTION # 260
Universal Containers wishes to maintain Lead data from Leads even after they are deleted and cleared from the Recycle Bin. What approach should be implemented to achieve this solution?

- A. Query Salesforce with the queryAll API method or using the ALL ROWS SOQL keywords.
- B. Send data to a Data Warehouse and mark Leads as deleted in that system.
- C. Use a Lead standard report and filter on the IsDeleted standard field.
- D. Use a Converted Lead report to display data on Leads that have been deleted.

Answer: B

NEW QUESTION # 261
Universal Containers (UC) has implemented a master data management strategy, which uses a central system of truth, to ensure the entire company has the same customer information in all systems. UC customer data changes need to be accurate at all times in all of the systems. Salesforce is the identified system of record for this information.
What is the correct solution for ensuring all systems using customer data are kept up to date?

- A. Send customer data nightly to the system of truth in a scheduled batch job.
- B. Send customer record changes from Salesforce to each system in a nightly batch job.
- C. Have each system pull the record changes from Salesforce using change data capture.
- D. Send customer record changes from Salesforce to the system of truth in real time.

Answer: C

NEW QUESTION # 262
Universal Containers has received complaints that customers are being called by multiple Sales Reps where the second Sales Rep that calls is unaware of the previous call by their coworker. What is a data quality problem that could cause this?

- A. Duplicate Activity records on a Contact.
- B. Duplicate Contact records exist in the system.
- C. Missing phone number on the Contact record.
- D. Customer phone number has changed on the Contact record.

Answer: B

Explanation:
A data quality problem that could cause customers to be called by multiple Sales Reps is having duplicate Contact records in the system. Duplicate records can result from data entry errors, data imports, or integrations with other systems. Duplicate records can lead to confusion, inefficiency, and customer dissatisfaction

NEW QUESTION # 263

......

The most interesting thing about the learning platform is not the number of questions, not the price, but the accurate analysis of each year's exam questions. Our Data-Architect guide dump through the analysis of each subject research, found that there are a lot of hidden rules worth exploring, this is very necessary, at the same time, our Data-Architect training materials have a super dream team of experts, so you can strictly control the proposition trend every year. In the annual examination questions, our Data-Architect study questions have the corresponding rules to summarize, and can accurately predict this year's test hot spot and the proposition direction. This allows the user to prepare for the test full of confidence.
