

New AP-211 Study Plan & AP-211 Pass Exam

Week	Learning in Class	Content to Review	Prep to Complete
1	Unit 6: Properties of integrals and integration techniques	Make flashcards and do practice problems on Unit 1: Limits and Continuity	Look over some old free-response questions and a few sample multiple-choice questions
2	Unit 7: Sketching slope fields and families of solution curves	Make flashcards and do practice problems on Unit 2: Differentiation: Definition and Fundamental Properties	Fully solve a practice free-response question (no calculator) and give back to your teacher to score
3	Unit 7: Solving separable differential equations to find general and particular solutions	Make flashcards and do practice problems on Unit 3: Differentiation: Composite, Implicit and Inverse Functions	Fully solve a practice free-response question (with calculator) and give back to your teacher to score
4	Unit 7: Deriving and applying a model for exponential growth and decay	Make flashcards and do practice problems on Unit 4: Contextual Applications of Differentiation	Take complete timed multiple-choice section (no calculator)
5	Unit 8: Determining the average value of a function using definite integrals	Make flashcards and do practice problems on Unit 5: Analytical Applications of Differentiation	Take complete timed multiple-choice section (with calculator)
6	Unit 8: Modeling particle motion	Make flashcards and do practice problems on Unit 6: Integration and Accumulation of Change	Review calculator features and usage
7	Unit 8: Solving accumulation problems	Make flashcards and do practice problems on Unit 7: Differential Equations	Practice free response questions (both with and without calculator)
8	Unit 8: Finding the area between curves	Make flashcards and do practice problems on Unit 8: Applications of Integration	Take complete timed multiple-choice section (with and without calculator)
9	Unit 8: Determining volume with cross-sections, the disc method, and the washer method	Review flashcards and practice problems	Take a complete practice exam
10	In class-review	Review flashcards and practice problems	Final practice free response question (with calculator)
11	In class-review	Review flashcards and practice problems	Final practice free response question (no calculator)
12 (test week!)	Final review and test prep!	Final review of flashcards and practice problems	Rest up!

BONUS!!! Download part of NewPassLeader AP-211 dumps for free: https://drive.google.com/open?id=1GPNXvYUPybZQk17s5u0DAp59v_i0gSC

If you buy NewPassLeader exam dumps, you will obtain free update for a year. Once the dumps update, NewPassLeader will immediately send the latest AP-211 Certification AP-211 training materials to your mailbox. You can also request we provide you with the latest dumps at any time. If you want to know the latest exam questions, even if you have passed the certification test, NewPassLeader will also free update exam dumps for you.

If you do not quickly begin to improve your own strength, the next one facing the unemployment crisis is you. The time is very tight, and choosing our AP-211 study materials can save you a lot of time. And our AP-211 Exam Questions can really save you time and efforts. If you study with our AP-211 learning guide for 20 to 30 hours, then you will be able to pass the exam and get the certification.

AP-211 Pass Exam - Guaranteed AP-211 Passing

Download the free AP-211 demo of whatever product you want and check its quality and relevance by comparing it with other available study contents within your access. AP-211 study guides will prove their worth and excellence. Check also the feedback of our clients to know how our products proved helpful in passing the exam. NewPassLeader ensures your success with money back assurance. There is no chance of losing the exam if you rely on AP-211 Study Guides. If you do not get through the exam, you take back your money. The money offer is the best evidence on the remarkable content of AP-211.

Salesforce Health Cloud Accredited Professional Sample Questions (Q32-Q37):

NEW QUESTION # 32

A payer receives faxes for clinical review as part of the determination process. The payer needs Health Cloud to automatically capture the data from the documents received from patients and manage the end-to-end approval process.

Which two Health Cloud capabilities should a consultant recommend as a way to build this process?

Choose 2 answers

- A. Intelligent Document Automation
- B. Integrated Care Management
- C. Care Authorizations
- D. Utilization Management

Answer: A,D

Explanation:

Step-by-Step Explanation:

Intelligent Document Automation:

Exact Extract:

"Intelligent Document Automation in Health Cloud automatically extracts data from incoming documents, including faxes, and creates structured data for downstream workflows." Reference:

Utilization Management:

Exact Extract:

"Utilization Management provides workflows and automation to support end-to-end approval processes, including clinical review and authorizations." Why Not Other Options?

Integrated Care Management: Focuses on care plans and assessments, not document automation or clinical approval processes.

Care Authorizations: Part of Utilization Management but not the capability for document ingestion and process automation.

NEW QUESTION # 33

Bloomington Caregivers has replaced its legacy Contact Center application with Health Cloud. During user acceptance testing (UAT), the call center team is reporting differences between current Identity Verification business processes and what was built in Health Cloud.

The call center manager has requested the following changes:

* Birth Date be available in results and as an optional verifier, but no longer required for verification purposes

* Add 'Bloomington ID', a custom field on Account, to search results and as a required verifier What should a consultant do to meet these requirements?

- A. Add two new Identity Verification Process Field records for 'Bloomington' to one with the Field Type set to Result Field and one with Field Type set Optional Verifier. Delete the Birth Date record which has the Field Type value Required Verifier.
- B. Add two new Identity Verification Process Field records for 'Bloomington' one with Field Type set to Result Field and one with Field Type set to Required Verifier. Change the Birth Date record with Field Type value Required Verifier to Optional Verifier.
- C. Add 'Bloomington ID' to the picklist choices within the Identity Verification flow and mark it as required. Remove the Birth Date record from the required fields picklist and add Birth Date to the optional verifiers picklist.
- D. Add two new Identity Verification Process Field records for 'Bloomington' Set the Field Type to Result Field and set the Required field to true.

Answer: B

Explanation:

Step 1: Requirement Analysis

Birth Date should be a result field and an optional verifier (not required).

Bloomington ID (a custom field) should appear in search results and be a required verifier.

Step 2: Salesforce Health Cloud Identity Verification Process Configuration The Identity Verification Process Field object in Health Cloud determines which fields are used for search results, required verification, or optional verification during the identity verification process.

You can add multiple records for a field with different purposes (e.g., one as Result Field and another as Required/Optional Verifier).

Extract:

"You can add or modify Identity Verification Process Field records to control which fields are shown as search results, required verifiers, or optional verifiers. For example, to make a field a required verifier, set Field Type to 'Required Verifier'. To make a field show in results, set Field Type to 'Result Field'. You can have more than one record for the same field with different Field Types."

Administer Health Cloud - Identity Verification Process Step 3: Actions Needed For Bloomington ID:

Add a record with Field Type = Result Field (to display in search results) Add another record with Field Type = Required Verifier (to make it a required field for verification) For Birth Date:

Update the current record so that Field Type is changed from Required Verifier to Optional Verifier (to make it not required but still usable as a verifier) Ensure there is a record with Field Type = Result Field if Birth Date should show in the results Step 4: Review of Options A: Incorrect; it says to delete the Birth Date Required Verifier instead of changing it to optional.

B: Not the right object/method; doesn't mention the correct object (Identity Verification Process Field).

C: Correct; matches the best practices and object structure in Health Cloud.

D: Incomplete; does not cover all configuration requirements.

Verified answer:

C: Add two new Identity Verification Process Field records for 'Bloomington one with Field Type set to Result Field and one with Field Type set to Required Verifier. Change the Birth Date record with Field Type value Required Verifier to Optional Verifier.

Health Cloud Identity Verification Process Setup

NEW QUESTION # 34

A consultant is preparing to install Health Cloud in a production org for the first time.

Which three tasks should the consultant ensure are completed prior to installing Health Cloud?

Choose 3 answers

- A. Enable Chatter.
- B. Enable Health Cloud Installation Monitor.
- C. Enable Shield Event Monitoring.
- D. Enable Person Accounts.
- E. Enable Contacts to Multiple Accounts.

Answer: A,D,E

Explanation:

Step-by-Step Explanation:

Salesforce Health Cloud Prerequisites:

Enable Person Accounts:

Required for representing patients and healthcare contacts.

"Person Accounts must be enabled before installing Health Cloud."

- Reference: Health Cloud Installation Prerequisites

Enable Chatter:

Health Cloud uses Chatter for collaboration between care teams.

"Chatter must be enabled to use Health Cloud features like care coordination and notes."

- Reference: Health Cloud Installation Prerequisites

Enable Contacts to Multiple Accounts:

Necessary to relate patients to multiple organizations/providers.

"Enable Contacts to Multiple Accounts to relate contacts (patients) to more than one account (e.g., provider, payer)."

- Reference: Health Cloud Installation Prerequisites

Other Options:

B. Enable Shield Event Monitoring: Not required for Health Cloud installation (but is a best practice for auditing and compliance in some orgs).

D. Enable Health Cloud Installation Monitor: Not a standard Salesforce setting or prerequisite.

Reference:

Health Cloud Installation Prerequisites

NEW QUESTION # 35

Bloomington Caregivers would like to bulk upload information to support Provider Search and Provider Relationship Card.

What are the two best practice recommendations to upload this information?

Choose 2 answers

- A. Use Provider Relationship API.
- B. Use Data Loader.
- C. Use Composite API Request.
- D. Use Provider Card APIL.

Answer: B,C

NEW QUESTION # 36

A MedTech company is implementing Health Cloud to better plan and track surgical case visits, manage device inventory, and run cycle counts.

Which data model should a consultant recommend the company use?

- A. Life Sciences
- **B. Inventory Management**
- C. Provider Engagement
- D. Intelligent Sales

Answer: B

Explanation:

The use case mentions:

Plan and track surgical case visits

Manage device inventory

Run cycle counts

These requirements directly align with the Health Cloud Inventory Management data model.

Inventory Management in Health Cloud is designed for MedTech and Life Sciences companies to track:

Surgical case planning and scheduling

Medical device and implant inventory management

Cycle counts and stock levels across facilities

It supports end-to-end surgical case tracking, ensuring the right devices are available at the right place and time.

Why not the others?

A . Life Sciences - Broader model used for clinical trials, patient programs, and pharma engagement, but not focused on surgical case + device inventory.

B . Provider Engagement - Used for managing provider relationship data (e.g., physician affiliations, facilities), not inventory or surgical planning.

C . Intelligent Sales - Focused on sales optimization and customer engagement, not surgical case or inventory management.

Salesforce Health Cloud Reference:

Salesforce Health Cloud - Inventory Management Guide:

"Use the Inventory Management data model to manage device inventory, surgical case planning, cycle counts, and medical device tracking across healthcare facilities."

NEW QUESTION # 37

.....

Are you preparing for the Salesforce AP-211 certification exam? Whether you're an experienced professional Salesforce AP-211 looking to take your career to the next level or a recent graduate trying to break into the tech field, the road to Salesforce AP-211 Certification can be a long and challenging one. The good news is that you do not have to navigate it alone.
