Fortinet FCP_FAZ_AN-7.6 Valid Exam Registration & FCP_FAZ_AN-7.6 Reliable Test Tutorial

We will provide you with three different versions of our FCP_FAZ_AN-7.6 exam questions on our test platform. You have the opportunity to download the three different versions from our test platform. The three different versions of our FCP_FAZ_AN-7.6 test torrent include the PDF version, the software version and the online version. The three different versions will offer you same questions and answers, but they have different functions. According to your needs, you can choose any one version of our FCP_FAZ_AN-7.6 Guide Torrent. For example, if you need to use our products in an offline state, you can choose the online version; if you want to try to simulate the real examination, you can choose the software. In a word, the three different versions of our FCP_FAZ_AN-7.6 test torrent.

Fortinet FCP - FortiAnalyzer 7.6 Analyst Sample Questions (Q93-Q98):

NEW QUESTION # 93

What is the purpose of using data selectors when configuring event handlers?

- A. They filter the types of logs that FortiAnalyzer can accept from registered devices.
- B. They download new filters can be used in event handlers.
- **C. They apply their filter criteria to the entire event handler so that you don't have to configure the same criteria in the individual rules.**
- D. They are common filters that can be applied simultaneously to all event handlers.

Answer: C

NEW QUESTION # 94

Which two methods can you use to send notifications when an event occurs that matches a configured event handler? (Choose two.)

- **A. Send SNMP trap**
- B. Send Alert through FortiSIEM MEA
- C. Send SMS notification
- **D. Send Alert through Fabric Connectors**

Answer: A,D

Explanation:

Send Alert through Fabric Connectors: This method involves creating a Fabric Connector profile and selecting the option "Send Alert through Fabric Connectors" in the event handler notification settings. Notifications are then sent in JSON format to the configured endpoint, such as Microsoft Teams or other integrated platforms.

Send SNMP trap: You can configure SNMP traps to be sent when an event triggers an incident.

This involves setting the SNMP Trap IP address, community string, trap type, and protocol in the system's analytics or incident settings.

NEW QUESTION # 95

Which two statements about exporting and importing playbacks are true? (Choose two.)

- A. You can import a playbook even if there is another one with the same name in the destination
- B. A playbook that was disabled when it was exported will be disabled when it is imported.
- C. You can export only one playbook at a time.
- D. Playbooks can be imported to a different FortiAnalyzer device, but only if the connectors already exist

Answer: A,C

NEW QUESTION # 96

What is the purpose of running the command `diagnose sql status sqlreportd`?

- A. To identify the database log insertion status
- B. To list the current SQL processes running
- C. To view a list of scheduled reports
- D. To display the SQL query connections and hcache status

Answer: D

Explanation:

The command `diagnose sql status sqlreportd` is used in FortiAnalyzer to obtain specific information about the SQL reporting process and caching status. Here's what this command accomplishes and an analysis of each option:

Command Functionality:

`sqlreportd` is the FortiAnalyzer daemon responsible for managing SQL-based reporting processes. The `diagnose sql status sqlreportd` command provides information on active SQL query connections and the hcache (historical cache) status, which helps in monitoring and troubleshooting SQL report generation.

NEW QUESTION # 97

(An analyst is using FortiAI on FortiAnalyzer to simplify certain tasks but is worried about exceeding the monthly token limit. Which query will take the fewest FortiAI tokens? (Choose one answer))

- A. Show logs for 192.168.1.10 (past week)
- B. Can you show me all the log entries for the endpoint 192.168.1.10?
- C. Show all logs from the past week
- D. Show logs for 192.168.1.10

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract of knowledge of FortiAnalyzer 7.6 Study guide documents: The study guide explains that FortiAI token usage includes both the prompt (input) and the response (output), and that "generally, more text in the query and response results in using more tokens." It provides two comparison examples and concludes that the more verbose request for "all the log entries" consumes more tokens because it has more text and also triggers a larger response; whereas limiting the query to a time range (for example, "(past week)") reduces output volume and therefore token usage.

Applying that guidance to the options:

- * C is the most verbose and explicitly requests "all the log entries," which drives higher input and output token usage.
- * B requests "all logs" for the week (broad scope), which typically increases output tokens.
- * D is short, but it does not constrain the time range, which can increase the response size (output tokens).
- * A is concise and includes a time constraint "(past week)," matching the study guide's example of a lower-token query pattern.

NEW QUESTION # 98

.....

In addition to the Fortinet FCP_FAZ_AN-7.6 PDF questions, we offer desktop FCP - FortiAnalyzer 7.6 Analyst (FCP_FAZ_AN-7.6) practice exam software and web-based FCP - FortiAnalyzer 7.6 Analyst (FCP_FAZ_AN-7.6) practice test to help applicants prepare successfully for the actual Building FCP - FortiAnalyzer 7.6 Analyst (FCP_FAZ_AN-7.6) exam. These FCP - FortiAnalyzer 7.6 Analyst (FCP_FAZ_AN-7.6) practice exams simulate the actual FCP_FAZ_AN-7.6 exam conditions and provide an accurate assessment of test preparation.
