

Cisco 300-710 Valid Exam Voucher: Securing Networks with Cisco Firepower - ActualTestsQuiz 100% Latest Products for your choosing

Securing Networks: Your Ultimate Cisco Firepower 300-710 Exam Companion

In the ever-changing world that is cybersecurity, being ahead of the curve is not just a matter of goal, but essential. [Securing Networks with Cisco Firepower 300-710 Exam Practice Questions](#) is an important step in gaining a thorough understanding of network security. This comprehensive guide is your complete guide, offering tips, techniques, strategies and questions that will help you succeed in securing networks.

Understanding Cisco Firepower 300-710 Exam

Before diving into the intricacies of exam questions we must first understand the fundamentals. The Cisco Firepower 300-710 Exam is designed to assess your skills in the implementation of advanced firewalls, including setup, and troubleshooting of Cisco security equipment. This test will testify to your ability to provide solid security for your network using Cisco Firepower Threat Defense technology.

Key exam objectives

- 1. Firepower Threat Defense Architecture:** Learn about the structure and deployment methods that comprise Firepower Threat Defense (FTD).
- 2. Deployment:** Manage the use of Firepower Threat defense devices. Also, establish high-availability.

Role of Cisco 300-710 Exam Real Questions in Exam Success

For candidates who will buy 300-710 learning materials online, they may care more about the quality of the exam dumps. We have a professional team to collect the latest information of the 300-710 exam dumps, therefore the quality can be guaranteed. Moreover, we have online and offline chat service staff, who have professional knowledge for 300-710 Learning Materials. If you have any questions, you can consult us. We will give you reply as soon as possible. Free demo for 300-710 exam dumps will also be offered, and you can have a try before purchasing.

Cisco Securing Networks with Cisco Firepower Sample Questions (Q24-Q29):

NEW QUESTION # 24

An engineer plans to reconfigure an existing Cisco FTD from transparent mode to routed mode.

Which additional action must be taken to maintain communication between the two network segments?

- A. Assign a unique VLAN ID for the interface in each segment.
- B. Deploy inbound ACLs on each interface to allow traffic between the segments.
- C. Configure a NAT rule so that traffic between the segments is exempt from NAT.
- **D. Update the IP addressing so that each segment is a unique IP subnet.**

Answer: D

NEW QUESTION # 25

What are the minimum requirements to deploy a managed device inline?

- **A. inline interfaces, MTU, and mode**
- B. passive interface, MTU, and mode
- C. passive interface, security zone, MTU, and mode
- D. inline interfaces, security zones, MTU, and mode

Answer: A

Explanation:

Reference:

https://www.cisco.com/c/en/us/td/docs/security/firepower/650/configuration/guide/fpmc-config_guide-v65/ips_device_deployments_and_configuration.html

NEW QUESTION # 26

An administrator is setting up Cisco Firepower to send data to the Cisco Stealthwatch appliances.

The NetFlow_Set_Parameters object is already created, but NetFlow is not being sent to the flow collector. What must be done to prevent this from occurring?

- A. Create a Security Intelligence object to send the data to Cisco Stealthwatch
- B. Add the NetFlow_Send_Destination object to the configuration
- **C. Add the NetFlow_Add_Destination object to the configuration**
- D. Create a service identifier to enable the NetFlow service

Answer: C

NEW QUESTION # 27

A network engineer wants to disable the HTTP response page and interactive blocking of the entire access control policy in Cisco Secure Firewall Management Center. What must be selected in Block Response Page and Interactive Block Response Page?

- A. Custom
- B. System
- **C. None**
- D. View

Answer: C

Explanation:

In Cisco Secure Firewall Management Center, to disable the HTTP response page and interactive blocking of the entire access control policy, the engineer must select None for both the Block Response Page and Interactive Block Response Page settings. This configuration prevents the firewall from displaying any HTTP response page or offering interactive blocking features when a policy action is triggered, such as blocking traffic based on access control rules.

NEW QUESTION # 28

An organization is configuring a new Cisco Firepower High Availability deployment. Which action must be taken to ensure that failover is as seamless as possible to end users?

- A. Set the same FQDN for both chassis.
- **B. Set up a virtual failover MAC address between chassis.**
- C. Use a dedicated stateful link between chassis.
- D. Load the same software version on both chassis.

Answer: B

Explanation:

Configuring virtual MAC addresses on an FTD HA pair is beneficial to the availability of a network. Virtual MAC addresses allow the primary and secondary FTD to maintain consistent MAC addresses which prevents certain traffic disruptions.
