Microsoft MB-820 Valid Exam Sims - Questions MB-820 Exam

Every working person knows that MB-820 is a dominant figure in the field and also helpful for their career. If MB-820 reliable exam bootcamp helps you pass the exams and get a qualification certificate you will obtain a better career even a better life. Our study MB-820 Guide materials cover most of latest real MB-820 test questions and answers. If you are certainly determined to make something different in the field, a useful certification will be a stepping-stone for your career.

Microsoft MB-820 Exam Syllabus Topics:

Topic	Details
Topic 1	• Develop by using AL: How to Customize the UI experience and Use AL for business central extension is discussed here. It also delves into explaining the essential development standards.
Topic 2	• Install, develop, and deploy for Business Central: It delves into the installation and configuration of a Business Central development environment. Moreover, it discusses creating, debugging, and deploying an extension in Business Central.
Topic 3	• Develop by using AL objects: Building and extending tables and reports is discussed in this topic. It also explains Designing and creating an XMLport. Lastly, it discusses how to work with entitlement and permission set objects.
Topic 4	• Work with development tools: Implementing semi-automated test processes and managing and assessing telemetry are its sub-topics.

Microsoft Dynamics 365 Business Central Developer Sample Questions (Q69-

Q74):

NEW QUESTION # 69

A company is implementing Business Central.

The company has the following requirements for a report:

* The report must be loaded for users in a specific location only.
* Data entered in the request page must be validated before any further processing.
* A filter must be defined for users based on the Department field defined in user setup.

You need to implement the given requirements.

Which triggers should you use? To answer, move the appropriate triggers to the correct requirements. You may use each trigger once, more than once, or not at all. You may need to move the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 70

You have the following XML file sample for the Items list:

You plan to create the next XML file by using an XMLport object.

You need to complete the code segment to export the file in the required format How should you complete the code segment? To answer, select the appropriate options in the answer area.
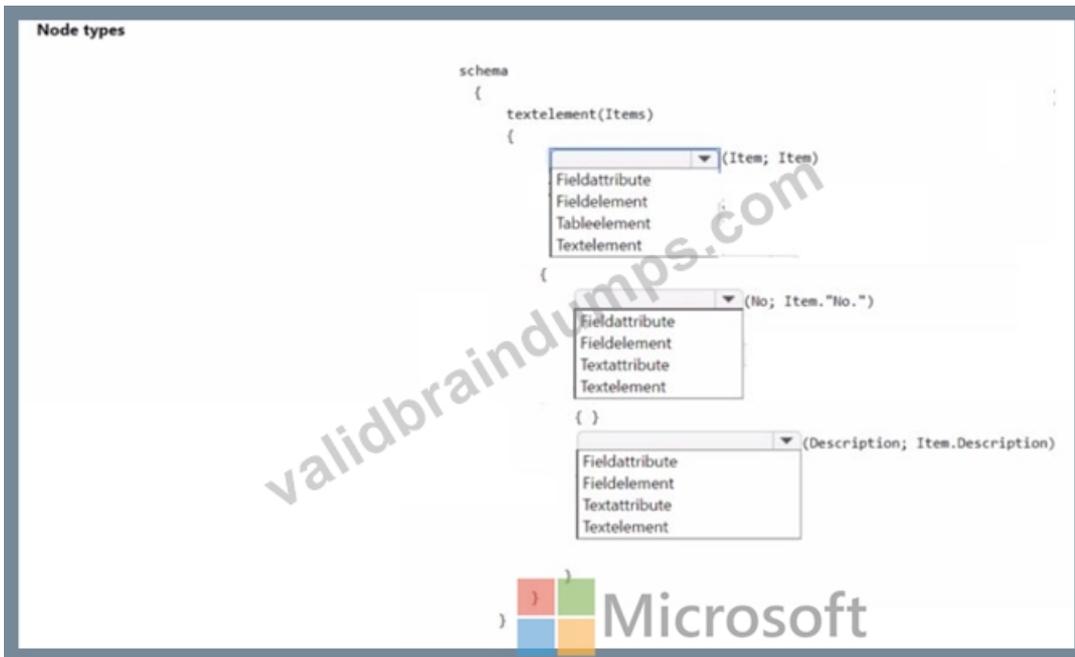

Answer:

Explanation:
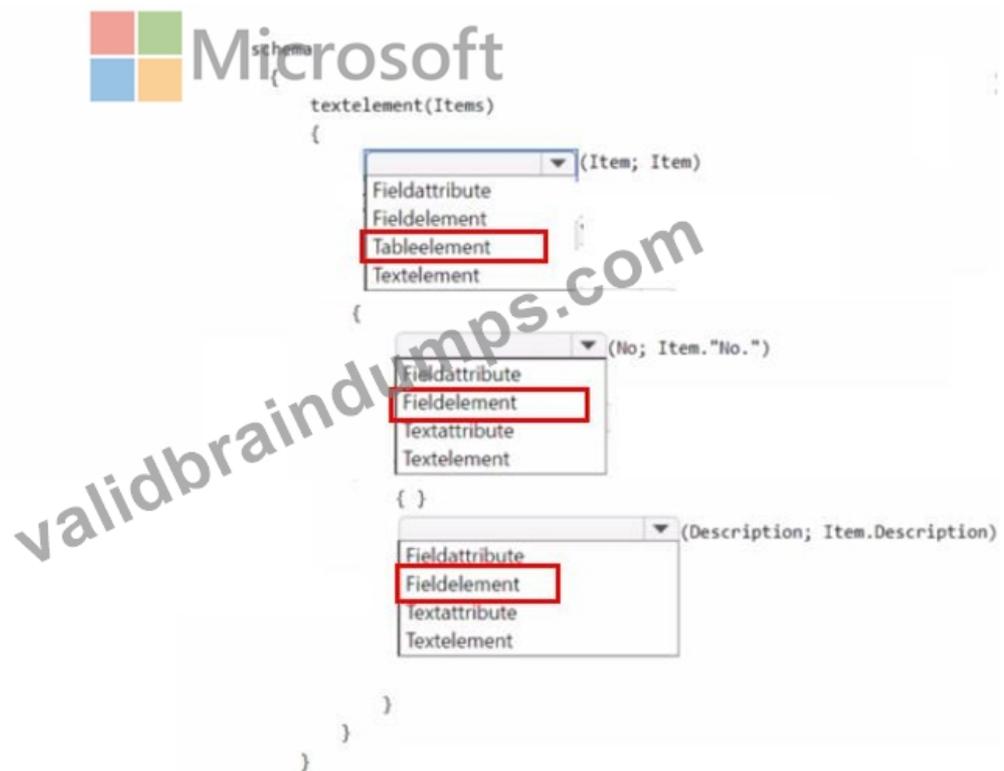

NEW QUESTION # 71
A company has a page named New Job Status connected to a source table named Job. The page has an action named Item Ledger Entries. The company requires the following changes to the page:
* Filter the page to display only jobs with open or quote status.
* Add the following comment for internal use: This page does not include completed jobs.
* Item Ledger Entries action must open the selected job on the page and display it in the Ul for users to modify.
You need to select the property selections to use for each requirement.
Which property selections should you use? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Page modifications

Requirement	Property selection
Display status of open or quote.	SourceTableView = sorting(Status) order(ascending)
	SourceTableView = where(Status = filter(Open | Quote | Planning));
	SourceTableView = where(Status = filter(Open | Quote));
Add a comment for internal use.	Description = 'This page does not include completed jobs';
	ToolTip = 'This page does not include completed jobs';
Action must open selected job on the page.	RunPageLink = "Job No." = FIELD("No.");
	RunPageView = "Job No." = FIELD("No.");

Answer:

Explanation:

	ToolTip = 'This page does not include completed jobs';
Action must open selected job on the page.	RunPageLink = "Job No." = FIELD("No.");
	RunPageView = "Job No." = FIELD("No.");

NEW QUESTION # 72

A company is setting up a sandbox environment.

You observe the following issues in Visual Studio Code:

* When you open the User Settings window, no AL command is available

* In the Problems tab. the error 'The target page Customer List for the extension object is not found' is displayed.

You need to identify a solution for each issue.

Which solutions should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Configure the development environment.

Issue	Solution
No AL command in User Settings	Sign up for Business Central sandbox.
	Set the Type property to al in launch.json.
	Install the AL Language extension.
Error in the Problems tab	In the resource exposure policy, set allowDebugging to true.
	Download Symbols.
	Configure the dependencies property in app.json.

Answer:

Explanation:

Configure the development environment.

| Issue	Solution
No AL command in User Settings	Sign up for Business Central sandbox.
	Set the Type property to al in launch.json.
	Install the AL Language extension.
Error in the Problems tab	
	In the resource exposure policy, set allowDebugging to true.
	Download Symbols.
	Configure the dependencies property in app.json.

Explanation:
No AL command in User Settings:The correct solution is to Install the AL Language extension.
* This issue arises when the AL Language extension is not installed in Visual Studio Code, which is required to work with AL projects in Business Central.
Error in the Problems tab:The correct solution is to Download Symbols.
* This error typically occurs when the symbols (metadata for pages, tables, etc.) are not downloaded, and Visual Studio Code cannot resolve the reference to the Customer List page. Downloading symbols should fix the problem.

NEW QUESTION # 73

You ate creating a test codeumt for a company that uses Business Central. The company requites the following list of choices while posting a sales order:
* Ship
* Invoice
* Ship & Invoice
You must create a test codeunit that automatically selects one of these options. You need to create the test codeunit Which handler should you use?

- A. SessionSettings Handle'
- B. StrMenuHandler
- C. Recall Notification Hand let
- D. SendNotificationHandler

Answer: B

Explanation:
StrMenuHandler is used to simulate the selection of an option from a string-based menu, such as the "Ship," "Invoice," or "Ship & Invoice" options when posting a sales order. This handler allows you to programmatically select an option during automated testing. Other handlers, such as SessionSettingsHandler or SendNotificationHandler, do not simulate the selection of menu choices, which is specifically required in this scenario.
For more details on StrMenuHandler and how it simulates user interaction with menu choices, refer to the Test Handlers in Business Central.

NEW QUESTION # 74

......

The point of every question in our MB-820 exam braindumps is set separately. Once you submit your exercises of the MB-820 learning questions, the calculation system will soon start to work. The whole process only lasts no more than one minute. Then you will clearly know how many points you have got for your exercises of the MB-820 study engine. And at the same time, our system will auto remember the wrong questions that you answered and give you more practice on them until you can master.
