Free PDF Quiz 2026 AZ-104: Microsoft Azure Administrator Accurate New Real Test

As we all know, there are many reasons for the failure of the AZ-104 exam, such as chance, the degree of knowledge you master. Although the AZ-104 exam is an exam to test your mastery of the knowledge of AZ-104, but there are so many factor to influence the result. As long as you choose our AZ-104 exam materials, you never have to worry about this problem. Because we will provide you a chance to replace other exam question bank if you didn't pass the AZ-104 Exam at once. What's more important it's that also free of charge only if you provide relevant proof. It is very convenient to replace and it's not complicated at all. It will not cause you any trouble.

Microsoft Azure Administrator Sample Questions (Q297-Q302):

NEW QUESTION # 297

Hotspot Question

You have an Azure subscription that contains the virtual networks shown in the following table.

☐ The subscription contains the private DNS zones shown in the following table.

☐ You add virtual network links to the private DNS zones as shown in the following table.

☐ For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

☐ Explanation:

Box 1: Yes

No registration zone for VNET2.

Box 2: Yes

You can link VNET1 to Zone3.com A private DNS zone can have multiple registration virtual networks. However, every virtual network can only have one registration zone associated with it.

Box 3: No

Auto registration is already enabled on Zone 1. When you add a link from VNET2 to Zone.

NEW QUESTION # 298

You have an Azure Active Directory (Azure AD) tenant named contoso.com that contains the users shown in the following table:

☐ User3 is the owner of Group1.

Group2 is a member of Group1.

You configure an access review named Review1 as shown in the following exhibit:

☐ For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

☐ Explanation:

In the Users section, specify the users that the access review applies to. Access reviews can be for the members of a group or for users who were assigned to an application. You can further scope the access review to review only the guest users who are members (or assigned to the application), rather than reviewing all the users who are members or who have access to the application.

☐ Present Use Case:

Group2 is a member of Group1 and User3 is the owner of Group1 So User3 can review both Group 1 and 2.

But for review the scope says only Guest.

Solution:

User1 is a member not a guest so 1st statement ==> NO

UserA is member not the guest so 2nd statement ==> No

UserB is a guest so 3rd statement ==> Yes

<https://docs.microsoft.com/en-us/azure/active-directory/governance/create-access-review>

NEW QUESTION # 299

You plan to use Azure Network Watcher to perform the following tasks:

Task1: Identify a security rule that prevents a network packet from reaching an Azure virtual machine Task2: Validate outbound connectivity from an Azure virtual machine to an external host Which feature should you use for each task? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

☐ Reference:

<https://docs.microsoft.com/en-us/azure/network-watcher/network-watcher-monitoring-overview>

<https://docs.microsoft.com/en-us/azure/network-watcher/network-watcher-ip-flow-verify-overview>

<https://docs.microsoft.com/en-us/azure/network-watcher/network-watcher-connectivity-overview>

NEW QUESTION # 300

You have an Azure subscription named Subscription1. Subscription1 contains two Azure virtual machines named VM1 and VM2. VM1 and VM2 run Windows Server 2016.

VM1 is backed up daily by Azure Backup without using the Azure Backup agent.

VM1 is affected by ransomware that encrypts data.

You need to restore the latest backup of VM1.

To which location can you restore the backup? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

□ Reference:

<https://docs.microsoft.com/en-us/azure/backup/backup-azure-arm-restore-vms>

<https://docs.microsoft.com/en-us/azure/backup/backup-azure-restore-files-from-vm#system-requirements>

NEW QUESTION # 301

You have an Azure subscription.

You plan to use an Azure Resource Manager template to deploy a virtual network named VNET1 that will use Azure Bastion.

How should you complete the template? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

□

Answer:

Explanation:

□ Explanation:

When deploying Azure Bastion using an Azure Resource Manager (ARM) template, Microsoft requires that the subnet dedicated to Bastion follows strict configuration guidelines. According to the Microsoft Azure Administrator documentation, the Azure Bastion service must be deployed within a specifically named subnet called "AzureBastionSubnet".

This subnet name is case-sensitive and mandatory - any deviation from this name (e.g., "BastionSubnet" or "AzureBastion") will cause deployment failure.

Additionally, the subnet must have a minimum prefix of /27 to provide sufficient IP addresses for the Bastion- managed instances and scaling operations. Subnets smaller than /27 (such as /28 or /29) are not supported because Bastion requires multiple internal IP addresses for operations like scaling, management, and secure connectivity.

In the ARM template structure:

```
{
  "type": "Microsoft.Network/virtualNetworks",
  "name": "VNET1",
  "apiVersion": "2019-02-01",
  "location": "[resourceGroup().location]",
  "properties": {
    "addressSpace": {
      "addressPrefixes": ["10.10.10.0/24"]
    },
    "subnets": [
      {
        "name": "AzureBastionSubnet",
        "properties": {
          "addressPrefix": "10.10.10.0/27"
        }
      },
      {
        "name": "LAN02",
        "properties": {
          "addressPrefix": "10.10.10.128/25"
        }
      }
    ]
  }
}
```

This ensures that Azure Bastion can be deployed properly within the virtual network VNET1, providing secure RDP/SSH connectivity to VMs without exposing public IPs.

Extract from Microsoft Documentation:

"Azure Bastion must be deployed in a dedicated subnet named 'AzureBastionSubnet'. The subnet must be at least /27 or larger (/26, /25, etc.). This subnet is used exclusively by the Bastion host and cannot contain other resources." (Source: Microsoft Learn - Deploy Azure Bastion using Azure Resource Manager templates, and Azure Bastion service configuration requirements)

NEW QUESTION # 302

.....

Before you really attend the AZ-104 exam and choose your materials, we want to remind you of the importance of holding a certificate like this one. Obtaining a AZ-104 certificate likes this one can help you master a lot of agreeable outcomes in the future, like higher salary, the opportunities to promotion and being trusted by the superiors and colleagues. All these agreeable outcomes are no longer dreams for you. And with the aid of our AZ-104 Exam Preparation to improve your grade and change your states of life and get amazing changes in career, everything is possible. It all starts from our AZ-104 learning questions.
