Examcollection HPE7-J02 Dumps | HPE7-J02 Relevant Questions

We all have the right to pursue happiness. Also, we have the chance to generate a golden bowl for ourselves. Now, our HPE7-J02 practice materials can help you achieve your goals. As we all know, the pace of life is quickly in the modern society. So we must squeeze time to learn and become better. With the HPE7-J02 Certification, your life will be changed thoroughly for you may find better jobs and gain higher incomes to lead a better life style. And our HPE7-J02 exam questions will be your best assistant.

The version of APP and PC of our HPE7-J02 exam torrent is also popular. They can simulate real operation of test environment and users can test HPE7-J02 test prep in mock exam in limited time. They are very practical and they have online error correction and other functions. The characteristic that three versions of HPE7-J02 Exam Torrent all have is that they have no limit of the number of users, so you don't encounter failures anytime you want to learn our HPE7-J02 quiz guide. The three different versions can help customers solve any questions and meet their all needs.

Free PDF 2026 HP HPE7-J02: Perfect Examcollection Advanced HPE Storage Integrator Solutions Written Exam Dumps

If you get our HPE7-J02 training guide, you will surely find a better self. As we all know, the best way to gain confidence is to do something successfully. With our HPE7-J02 study materials, you will easily pass the HPE7-J02 examination and gain more confidence. As there are three versions of our HPE7-J02 praparation questions: the PDF, Software and APP online, so you will find you can have a wonderful study experience with your favorite version.

HP Advanced HPE Storage Integrator Solutions Written Exam Sample Questions (Q48-Q53):

NEW QUESTION # 48
While attempting to increase an upstream volume size for an Alletra 6000 Peer Persistence setup from local web management, you are facing an error that prevents you from completing the task.
Which action is required to complete the task successfully?

- A. Remove the upstream volume, volume collection before increasing the upstream volume.
- B. Remove the downstream volume, volume collection before increasing the upstream volume.
- C. Use the Data Services Cloud Console to grow the upstream volume.
- D. Increase the size of the volume in VMware HPE Storage plugin.

Answer: C

Explanation:
Detailed Explanation:
Rationale for Correct Answer:
In Alletra 6000 Peer Persistence environments, operations like resizing Peer Persistence volumes must be performed via the HPE Data Services Cloud Console (DSCC), which manages volume collections and replication consistency groups. Attempting to grow the upstream volume locally will fail because the changes need to propagate across both sites consistently.
Distractors:
A/B: Removing upstream or downstream volumes would break replication and is not required.
D: Expanding in VMware only extends the VMFS datastore, not the underlying replicated volume.
Key Concept: Peer Persistence volume resizing is done in DSCC, not local web GUI.
Reference: HPE Alletra 6000 Peer Persistence Configuration and Management Guide.

NEW QUESTION # 49
You are sizing an HPE Alletra 5030. Unless otherwise indicated by the HPE sizer or the customer's requirements, HPE best practices state that you should default to which minimum FDR calculation?

- A. Below 12% for low-read latency
- B. Above 12% for low-read latency
- C. 23% of the largest drive size
- D. 23% of the smallest drive size

Answer: C

Explanation:
Detailed Explanation:
Rationale for Correct Answer:
In Alletra 5000/6000 sizing, the Failure Domain Reserve (FDR) is used to account for rebuild overhead in case of drive failure. HPE best practices define that, unless otherwise directed by the sizing tool or customer requirements, the minimum FDR value should be set to 23% of the largest drive size. This ensures enough reserve capacity for fault tolerance and sustained performance during rebuilds.
Distractors:
B/C: Low-read latency is influenced by cache and workload profile, not by arbitrary FDR percentages.
D: Using the smallest drive is incorrect - rebuild impact must be sized against the largest drive.
Key Concept: FDR sizing based on 23% of largest drive = HPE best practice.
Reference: HPE Alletra 5000/6000 Sizing and Configuration Guide.

NEW QUESTION # 50
You are working with a customer to upgrade their backup target environment and they are interested in HPE StoreOnce.
Which HPE tool should you use to size and configure a solution for this customer?

- A. HPE CloudPhysics
- B. HPE Ninja Online
- C. HPE NinjaSTARS
- D. One Config Advanced

Answer: C

Explanation:
Detailed Explanation:
Rationale for Correct Answer:
HPE NinjaSTARS (Storage Assessment and Right Sizing) is the dedicated HPE tool for sizing and configuring StoreOnce backup appliances. It evaluates backup datasets, retention policies, deduplication ratios, and replication to recommend the right StoreOnce

model and configuration.
Distractors:
A (CloudPhysics): Used for virtual infrastructure and block storage assessments, not backup target sizing.
C (Ninja Online): General sizing tool, not specific for StoreOnce.
D (OCA): Used for quoting/configuration, but sizing requires NinjaSTARS first.
Key Concept: HPE NinjaSTARS is the StoreOnce sizing tool.
Reference: HPE NinjaSTARS Backup Sizing Tool Guide.

NEW QUESTION # 51

A growing technology company is planning to upgrade its data center infrastructure. Their considerations:
Budget: Predictable monthly payments, no upfront CapEx.
Flexibility: Long-term use, no forced returns.
Ownership: Prefer eventual ownership, spread payments.
Control: Full customization and upgrades.
Which procurement option best meets their needs?

- A. Capital lease
- B. Consumption based
- C. Operating lease
- D. Capital purchase

Answer: A

Explanation:
Detailed Explanation:
Rationale for Correct Answer:
A Capital Lease (also known as a finance lease) spreads costs over time like OpEx, while giving the customer the ability to own the equipment at the end of the lease term. This matches the desire for predictable payments, eventual ownership, and full control.
Distractors:
A (Consumption model): GreenLake provides OpEx flexibility but does not lead to ownership.
B (Operating lease): Pure rental; equipment must be returned, no ownership.
C (Capital purchase): Requires large upfront payment, which the customer wants to avoid.
Key Concept: Capital Lease = predictable payments + ownership path.
Reference: HPE Financial Services Procurement Options.

NEW QUESTION # 52

Refer to the exhibit of Zerto Vault architecture.

Which statement about the Zerto Vault architecture is correct?

- A. Immutable snapshots of all Zerto components are taken at the Replication Target and replicated to the Vault.
- B. Data is replicated via encrypted periodic replication between the Replication Target and the Vault.
- C. Data is replicated via encrypted periodic replication between Production and the Replication Target.
- D. The Resilience Automation Server manages port access between Production and the Replication Target.

Answer: B

Explanation:

Detailed Explanation:

Rationale for Correct Answer:

In the Zerto Vault architecture, production workloads replicate continuously to a Replication Target (secondary site). From there, data is further replicated periodically and encrypted into the Vault (air-gapped, isolated site). This two-step process ensures ransomware resilience and immutability, as the Vault acts as a hardened third copy.

Distractors:

A: Production-to-replication target traffic is continuous synchronous/asynchronous replication, not periodic.

Periodic replication applies to Replication Target # Vault.

C: The Resilience Automation Server (RAS) is responsible for orchestrating failover and immutability enforcement, but it does not control port access between production and replication target.

D: Snapshots of Zerto components are not what is replicated - it's application data VMs/volumes. The Vault ensures immutability of replicated data, not ZVM components.

Key Concept: Zerto Vault = encrypted, periodic replication from replication target to immutable vault.
