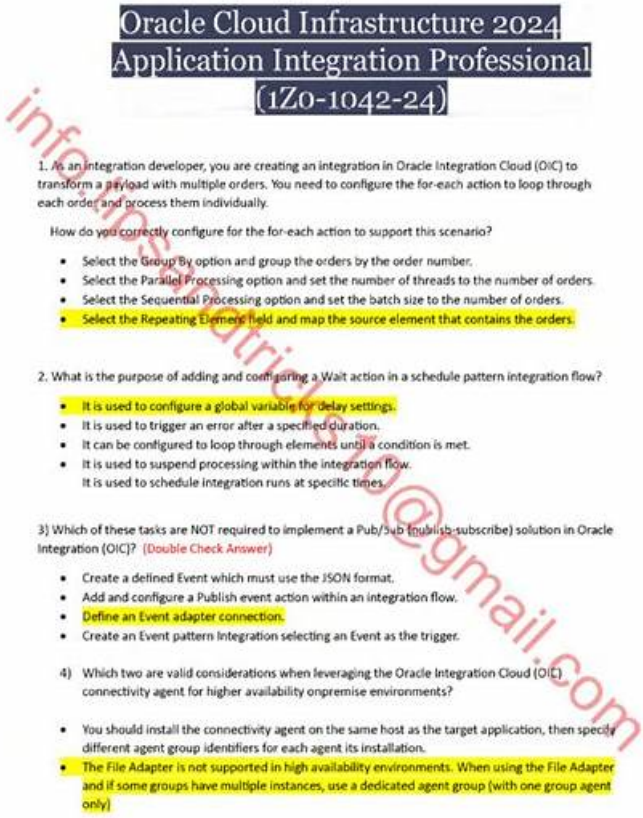
1z0-1042-24 Latest Test Practice & 1z0-1042-24 Latest Mock Exam



P.S. Free 2026 Oracle 1z0-1042-24 dumps are available on Google Drive shared by ValidVCE: https://drive.google.com/open?id=1SvTh7LH9FvClz2Bq39IAeL-myQxBvuO3

Passing the 1z0-1042-24 exam and obtaining the certification mean opening up a new and fascination phase of your professional career. Just imagine that what a brighter future will be with the 1z0-1042-24 certification! You may be employed by a bigger enterprise and get a higher position. The income will be doubled for sure. And Our 1z0-1042-24 study braindumps enable you to meet the demands of the actual certification exam within days. We can claim that with our 1z0-1042-24 practice guide for 20 to 30 hours, you are able to attend the exam with confidence.

Oracle 1z0-1042-24 Exam Syllabus Topics:

Topic	Details
Topic 1	• Creating Orchestrated Integrations: This part of the exam evaluates the candidate's skills in creating and managing orchestrated integrations using OIC. Candidates should be able to manage OIC lookups, use the OIC Data Mapper, and incorporate custom JavaScript libraries into their integrations.
Topic 2	• Testing, Monitoring, and Troubleshooting Integrations: This section assesses candidates abilities in testing, monitoring, and troubleshooting integrations within the OIC.

Topic 3	• Creating Scheduled Integrations: In this section of the exam, candidates are evaluated based on their skills in managing scheduled integrations. This includes converting scheduled integrations to app-driven integrations and understanding the scheduling options within the OIC.
Topic 4	• Getting Started with OIC Integrations: This section tests the ability of IT professionals and integration specialists to understand the fundamental components and concepts of Oracle Integration Cloud (OIC). Candidates are expected to describe the key features of OIC integration and explain core integration concepts.
Topic 5	• Using OIC Connections & Adapters: Candidates must demonstrate their ability to create and configure OIC connections, including trigger and invoke connections. They should be familiar with the Connectivity Agent, which facilitates on-premises connectivity to OIC services.

Oracle 1z0-1042-24 Latest Mock Exam - 1z0-1042-24 Valid Dumps Sheet

Our Software version of 1z0-1042-24 study materials has the advantage of simulating the real exam. The timing function in this Software of our 1z0-1042-24 guide questions helps them adjust their speeds to answer the questions and the function of stimulating the 1z0-1042-24 Exam can help the learners adapt themselves to the atmosphere and pace of the exam. Thus the learners can master our 1z0-1042-24 practice engine fast, conveniently and efficiently.

Oracle Cloud Infrastructure 2024 Application Integration Professional Sample Questions (Q50-Q55):

NEW QUESTION # 50
In addition to REST trigger connection-based integrations, what other type of integration can you run from the Test page in Oracle Integration?

- A. File trigger connection-based integrations
- B. Event pattern integrations
- C. Schedule pattern integrations
- D. SOAP trigger connection-based integrations

Answer: D

Explanation:
Comprehensive and Detailed Explanation:
Test Page:
* C:True-SOAP triggers testable.

NEW QUESTION # 51
You receive a status code: 502 Proxy Error.
Which is a possible event cause for this error?

- A. When the proxy setup is incorrect.
- B. While adding proxy for an enterprise application device.
- C. While the proxy server is not responding to the request.
- D. While registering a large number of devices using the Batch Registration feature under the Devices menu.

Answer: D

Explanation:
A 502 Proxy Error can occur when the proxy server is overloaded or unresponsive due to a large number of concurrent requests, such as during the Batch Registration feature in the Oracle IoT Cloud. Incorrect proxy setup and server unresponsiveness can also cause the error.

NEW QUESTION # 52
When creating integrations in Oracle Integration Cloud (OIC), a visual mapper enables you to map element nodes between applications by dragging source element nodes onto target element nodes.
Which statement is NOT true about the OIC Data Mapper functionality?

- A. The data structure for the target service is always displayed on the right side in the Designer view.
- B. When you navigate to the mapper and select a target element, Expression Builder launches in a user- friendly mode by default.
- C. In the Designer view, the Sources section contains data structures of all available data objects, which includes integration metadata, tracking variables, global variables, and integration property values.
- D. All transformation mappings use eXtensible Stylesheet Language (XSL).
- E. All Source and Target data objects are represented internally as JSON structures.

Answer: E

Explanation:
Not all Source and Target data objects are represented as JSON structures in OIC; XML and other data formats are also supported. The rest of the statements are true regarding the OIC data mapper functionality.

NEW QUESTION # 53
Which APIs does Oracle Internet of Things (IoT) Cloud Service use to perform an analysis?

- A. Big Data APIs
- B. Native Spark Java APIs
- C. JavaScript APIs
- D. SQL Queries

Answer: B

Explanation:
Oracle IoT Cloud Service uses native Spark Java APIs to perform analytics. This allows efficient processing of large datasets generated by IoT devices.

NEW QUESTION # 54
A company has been using Oracle Integration (OIC) to integrate its business applications, such as Oracle HCM Cloud, Oracle ERP Cloud, and Salesforce. However, they are planning to migrate all integration workloads from their current OIC instance to a new instance in a different region to comply with data sovereignty regulations. Which task is NOT required when you need to clone archives of design-time metadata to export and import between Oracle Integration instances?

- A. Construct the storage URL for an Object Storage bucket.
- B. Create a dynamic group.
- C. Create export and import jobs.
- D. Enable public visibility for the Object Storage bucket.

Answer: D

Explanation:
Comprehensive and Detailed Explanation:
Migrating OIC integrations across instances for data sovereignty involves exporting and importing design- time metadata (e.g., integrations, connections) using Oracle Cloud Infrastructure (OCI) Object Storage. Let's dissect each task with exhaustive detail:
* Option A: Enable public visibility for the Object Storage bucket.
* Not Required (Answer):Public visibility is unnecessary and insecure for this process. OIC export /import jobs use pre-authenticated requests or IAM policies to access a private bucket, ensuring data security. Making the bucket public exposes sensitive integration artifacts (e.g., connection details) to unauthorized access, violating sovereignty and security best practices. For example, a bucket storing HR integration metadata should remain private, accessible only via OIC credentials.
* Option B: Create a dynamic group.
* Required:A dynamic group in OCI groups OIC instances, allowing them to access resources like Object Storage via IAM policies. For instance, you'd define a rule like ALL {instance.

compartment.id = 'ocid1.compartment...'} to include your OIC instances, granting them bucket access without static credentials. This is a foundational step for secure automation.
* Option C: Create export and import jobs.
* Required:In the OIC console, you explicitly create export jobs to generate archive files (IAR /PAR) and import jobs to ingest them into the target instance. For example, exporting an "HCM- to-Salesforce" package creates a PAR file, which the import job then processes in the new region.
This is the core mechanism of migration.
* Option D: Construct the storage URL for an Object Storage bucket.
* Required:The OIC export/import process needs the bucket's URL (e.g., https://objectstorage.us- ashburn-1.oraclecloud.com/n/namespace/b/bucket/o/) to locate and store/retrieve archives. You construct this in the OCI console or via CLI, ensuring OIC knows where to read/write files.
Why A is the answer:Public visibility isn't part of the standard workflow and contradicts security principles, especially for regulated data. Private access via IAM and pre-authenticated URLs suffices.
Edge Case:If a third-party tool needed public access (unlikely), it'd still be a non-standard, risky workaround.
Use Case Example:Migrating a private bucket of integrations from US to EU region uses B, C, D, but not A.

NEW QUESTION # 55
.....

ValidVCE is a reliable platform to provide candidates with effective study braindumps that have been praised by all users. For find a better job, so many candidate study hard to prepare the Oracle Cloud Infrastructure 2024 Application Integration Professional, it is not an easy thing for most people to pass the 1z0-1042-24 Exam, therefore, our website can provide you with efficient and convenience learning platform, so that you can obtain as many certificates as possible in the shortest time.
