

Pass Guaranteed 2026 Microsoft SC-100: Latest New Microsoft Cybersecurity Architect Test Question

What's more, part of that DumpsMaterials SC-100 dumps now are free: <https://drive.google.com/open?id=1kBwDDdiQ68TvW8mYVIXKtO5O0ZvRM178>

Since the content of the examination is also updating daily, you will need real and latest Microsoft SC-100 Dumps to prepare successfully for the SC-100 Certification Exam in a short time. People who don't study from updated SC-100 questions fail the examination and loss time and money.

Exam SC-100: Microsoft Cybersecurity Architect

Candidates for this exam should have advanced experience and knowledge in a wide range of security engineering areas, including identity and access, platform protection, security operations, securing data, and securing applications. They should also have experience with hybrid and cloud implementations.

Passing score: 700. Learn more about exam scores.

Test SC-100 King | 100% SC-100 Correct Answers

The Microsoft SC-100 certification exam is one of the hottest certifications in the market. This Microsoft SC-100 exam offers a great opportunity to learn new in-demand skills and upgrade your knowledge level. By doing this successful SC-100 Microsoft Cybersecurity Architect exam candidates can gain several personal and professional benefits.

Microsoft Cybersecurity Architect Sample Questions (Q85-Q90):

NEW QUESTION # 85

Hotspot Question

You have an Azure subscription and an on-premises datacenter. The datacenter contains 100 servers that run Windows Server. All the servers are backed up to a Recovery Services vault by using Azure Backup and the Microsoft Azure Recovery Services (MARS) agent.

You need to design a recovery solution for ransomware attacks that encrypt the on-premises servers. The solution must follow Microsoft Security Best Practices and protect against the following risks:

- A compromised administrator account used to delete the backups from Azure Backup before encrypting the servers
- A compromised administrator account used to disable the backups on the MARS agent before encrypting the servers

What should you use for each risk? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Deleted backups:

A security PIN for critical operations
Encryption by using a customer-managed key
Multi-user authorization by using Resource Guard
Soft delete of backups

Disabled backups:

A security PIN for critical operations
Encryption by using a customer-managed key
Multi-user authorization by using Resource Guard
Soft delete of backups

Answer:

Explanation:

Answer Area

Deleted backups:

Microsoft

A security PIN for critical operations
Encryption by using a customer-managed key
Multi-user authorization by using Resource Guard
Soft delete of backups

Disabled backups:

A security PIN for critical operations
Encryption by using a customer-managed key
Multi-user authorization by using Resource Guard
Soft delete of backups

Explanation:

Box 1: Soft delete of backups

How to block intentional or unintentional deletion of backup data?

Enable Soft delete is enabled to protect backups from accidental or malicious deletes.

Soft delete is a useful feature that helps you deal with data loss. Soft delete retains backup data for 14 days, allowing the recovery of that backup item before it's permanently lost.

Box 2: Multi-user authorization by using Resource Guard

Ensure Multi-user authorization (MUA) is enabled for an additional layer of protection.

MUA for Azure Backup uses a new resource called Resource Guard to ensure critical operations, such as disabling soft delete, stopping and deleting backups, or reducing retention of backup policies, are performed only with applicable authorization.

NEW QUESTION # 86

You have a Microsoft 365 tenant.

Your company uses a third-party software as a service (SaaS) app named App1 that is integrated with an Azure AD tenant.

You need to design a security strategy to meet the following requirements:

- Users must be able to request access to App1 by using a self-service request.
- When users request access to App1, they must be prompted to provide additional information about their request.
- Every three months, managers must verify that the users still require access to App1.

What should you include in the design?

- A. Azure AD Application Proxy
- B. access policies in Microsoft Defender for Cloud Apps
- C. Microsoft Entra Identity Governance

- D. connected apps in Microsoft Defender for Cloud Apps

Answer: C

Explanation:

Microsoft Entra Identity Governance allows you to balance your organization's need for security and employee productivity with the right processes and visibility. It provides you with capabilities to ensure that the right people have the right access to the right resources.

NEW QUESTION # 87

You use Azure Pipelines with Azure Repos to implement continuous integration and continuous deployment (CI/CD) workflows. You need to recommend best practices to secure the stages of the CI/CD workflows based on the Microsoft Cloud Adoption Framework for Azure.

What should you include in the recommendation for each stage? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Git workflow: Azure Key Vault

Secure deployment credentials: Protected branches

Azure Key Vault

- Custom roles for build agents
- Protected branches
- Resource locks in Azure

Protected branches

Azure Key Vault

- Custom roles for build agents
- Protected branches**
- Resource locks in Azure

Answer:

Explanation:

Answer Area

Git workflow: Azure Key Vault

Secure deployment credentials: Protected branches

Azure Key Vault

- Custom roles for build agents
- Protected branches**
- Resource locks in Azure

Protected branches

Azure Key Vault

- Custom roles for build agents
- Protected branches**
- Resource locks in Azure

NEW QUESTION # 88

Your company plans to follow DevSecOps best practices of the Microsoft Cloud Adoption Framework for Azure to integrate DevSecOps processes into continuous integration and continuous deployment (CI/CD) DevOps pipelines. You need to recommend which security-related tasks to integrate into each stage of the DevOps pipelines.

What should recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer Area

Infrastructure scanning: Go to production

Build and test

Commit the code

Go to production

Operate

Plan and develop

Static application security testing: Plan and develop

Build and test

Commit the code

Go to production

Operate

Plan and develop

Answer:

Explanation:

NEW QUESTION # 89

You are designing the security standards for a new Azure environment.

You need to design a privileged identity strategy based on the Zero Trust model.

Which framework should you follow to create the design?

- A. Microsoft Security Development Lifecycle (SDL)
- B. Microsoft Operational Security Assurance (OSA)
- C. Enhanced Security Admin Environment (ESAE)
- D. **Rapid Modernization Plan (RaMP)**

Answer: D

Explanation:

This rapid modernization plan (RAMP) will help you quickly adopt Microsoft's recommended privileged access strategy.

NEW QUESTION # 90

.....

DumpsMaterials is the preeminent platform, which offers SC-100 exam materials duly equipped by experts. If you want you spend least time getting the best result, our exam materials must be your best choice. Our SC-100 exam materials are best suited to busy specialized who can learn in their seemly timings. Our study materials have satisfied in PDF format which can certainly be retrieved on all the digital devices. You can install it in your smartphone, Laptop or Tables to use. What most useful is that PDF format of our SC-100 Exam Materials can be printed easily, you can learn it everywhere and every time you like. It is really convenient for candidates who are busy to prepare the exam. You can save so much time and energy to do other things that you will make best use of you time.
