

2V0-11.25 Examinations Actual Questions - New 2V0-11.25 Practice Questions

P.S. Free 2026 VMware 2V0-11.25 dumps are available on Google Drive shared by RealVCE: https://drive.google.com/open?id=1KEsnCg2RcsxOc1_BAxaDmrFloXHN9diw

Candidates who crack the 2V0-11.25 examination of the VMware 2V0-11.25 certification validate their worth in the sector of information technology. The VMware 2V0-11.25 credential is evidence of their talent. Reputed firms hire these talented people for high-paying jobs. To get the VMware Cloud Foundation 5.2 Administrator (2V0-11.25) certification, it is essential to clear the VMware Cloud Foundation 5.2 Administrator (2V0-11.25) test. For this task, you need to update VMware Cloud Foundation 5.2 Administrator (2V0-11.25) preparation material to get success.

VMware 2V0-11.25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Plan and Design the VMware by Broadcom Solution: There are no testable objectives in this section. Still, it is intended for solution architects who need to plan and design VMware Cloud Foundation deployments, focusing on sizing, architecture selection, and network storage design.
Topic 2	<ul style="list-style-type: none"> Install, Configure, Administrate the VMware by Broadcom Solution: This section of the exam measures skills of the VMware Cloud Foundation administrator and covers the installation and configuration processes for VMware Cloud Foundation components, deploying and configuring management domains, NSX Edge Clusters, and the VMware Aria Suite Lifecycle. It assesses the ability to deploy workload domains, enable vSphere IaaS control plane, create vSphere namespaces, manage stretched clusters, and use VMware Cloud Foundation APIs. Candidates are also tested on scaling deployments, performing Day 2 operations like backup, recovery, lifecycle management, VM lifecycle management, configuring networking and storage, managing ESXi hosts, implementing encryption, and operationalizing VMware NSX, vSAN, and Aria Suite. The section is comprehensive, targeting those responsible for the ongoing administration and optimization of VMware environments.

Topic 3	<ul style="list-style-type: none"> VMware by Broadcom Solution: This section of the exam measures skills of the cloud administrator and covers identifying VMware Cloud Foundation components like vSphere, vSAN, and NSX, as well as their architecture, including stretched configurations. It also assesses knowledge of requirements for implementing private cloud solutions, use cases for VMware Aria Suite components, vSphere IaaS control plane, Data Services Manager, and VMware Cloud Foundation Add-Ons. The focus is on the ability to recognize and apply the correct VMware solutions for various enterprise scenarios.
Topic 4	<ul style="list-style-type: none"> Troubleshoot and Optimize the VMware by Broadcom Solution: This section of the exam measures skills of the cloud infrastructure support engineer and covers diagnosing and resolving technical issues related to VMware Cloud Foundation deployment and operations. It includes troubleshooting the deployment process, vSphere, networking, vSAN, SDDC Manager, and Aria Suite. The section also evaluates the ability to optimize infrastructure performance, manage resources, and ensure efficient operation, focusing on the practical aspects of maintaining and enhancing VMware Cloud Foundation environments.
Topic 5	<ul style="list-style-type: none"> IT Architectures, Technologies, Standards: There are no testable objectives in this section. However, this area establishes the foundational knowledge expected of cloud administrators, such as understanding basic IT infrastructure, virtualization, and cloud models. This section is relevant for cloud administrators and infrastructure engineers.

New 2V0-11.25 Practice Questions, 2V0-11.25 Valid Exam Online

By keeping minimizing weak points and maining strong points, our VMware 2V0-11.25 exam materials are nearly perfect for you to choose. As a brand now, many companies strive to get our VMware Cloud Foundation 5.2 Administrator 2V0-11.25 practice materials to help their staffs achieve more certifications for our quality and accuracy.

VMware Cloud Foundation 5.2 Administrator Sample Questions (Q160-Q165):

NEW QUESTION # 160

As part of the preparation for deploying VMware Aria Suite Lifecycle, an administrator needs to create Application Virtual Networks (AVNs).

Which three steps are necessary to complete the configuration of AVNs? (Choose three.)

- A. Define the IP address ranges for the AVNs.
- B. Configure the AVNs in the NSX Manager.
- C. Enable AVNs in the vCenter Server.
- D. Assign AVNs to specific ESXi hosts.
- E. Setup routing policies for AVNs.

Answer: A,B,D

Explanation:

Configure the AVNs in the NSX Manager: AVNs (Application Virtual Networks) are configured within NSX Manager to define the network segments and ensure proper network segmentation for workloads.

Assign AVNs to specific ESXi hosts: After configuring the AVNs in NSX Manager, they need to be assigned to the appropriate ESXi hosts to ensure they are properly mapped to the compute resources.

Define the IP address ranges for the AVNs: Each AVN must have an associated IP address range to provide network addressing for the workloads deployed on them.

NEW QUESTION # 161

An organization is planning to manage a diverse set of databases across multiple VMware Cloud Foundation (VCF) environments using Data Services Manager.

Which three capabilities of Data Services Manager would help the organization managing these databases efficiently? (Choose three.)

- A. Integration with vSAN for optimized storage management
- B. Automated database migration between on-premises and cloud environments
- C. Policy-based backup and recovery for databases
- D. Centralized monitoring and alerting for all managed databases
- E. Automated database provisioning and deployment

Answer: C,D,E

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

Data Services Manager provides several key capabilities that help organizations efficiently manage databases across VMware Cloud Foundation environments. The official documentation describes the following functions:

Centralized monitoring and alerting for all managed databases (A): Data Services Manager offers a single pane of glass for monitoring health, usage, and generating alerts for all databases under management.

Policy-based backup and recovery for databases (C): The platform allows administrators to define policies for backup and restore operations, ensuring data protection and compliance across all managed databases.

Automated database provisioning and deployment (E): Administrators can automate the deployment, scaling, and lifecycle management of databases, streamlining the operational process.

While Data Services Manager integrates with VMware storage and supports operational automation, it does not provide built-in, automated migration between on-premises and cloud environments, nor does it specifically require direct integration with vSAN for its optimized storage management features.

NEW QUESTION # 162

An administrator is tasked with migrating a set of virtual machines between data centers using HCX.

To minimize downtime and ensure data consistency, which two HCX migration options should be considered? (Choose two.)

- A. HCX vMotion
- B. HCX Network Extension
- C. HCX Bulk Migration
- D. HCX Cold Migration
- E. HCX Replication Assisted vMotion (RAV)

Answer: B

Explanation:

VM storage policies in a VMware vSphere environment are used to define and enforce specific storage requirements for virtual machines, such as performance (e.g., IOPS), availability (e.g., RAID levels), and redundancy. These policies ensure that VMs are placed on storage that meets their particular needs and that storage resources are utilized effectively.

NEW QUESTION # 163

Following an update to the Information Security policy, an administrator has been reviewing the status SSL certificates within the VMware Cloud Foundation (VCF) solution.

The new Information Security Policy states:

All SSL certificates must be generated and signed from the shared Microsoft Certificate Authority (CA).

The administrator has discovered the following:

All Aria Suite Components already use CA-signed Subject Alternate Name (SAN) SSL certificates.

All other VCF-based SSL certificates are either self-signed or generated using the VMware Certificate Authority (VMCA).

Which three steps must the administrator take to ensure the VCF solution remains compliant and managed by SDDC Manager? (Choose three.)

- A. In SDDC Manager, replace the SSL certificates for vCenter, NSX Manager, SDDC Manager and Aria Suite Lifecycle.
- B. In Aria Suite Lifecycle, replace the VMware Identity Manager, Aria Automation, Aria Operations and Aria Operations for Logs SSL certificates.
- C. Integrate the OpenSSL CA into SDDC Manager.
- D. In SDDC Manager, replace the SSL certificates for vCenter, ESXi, NSX Manager, SDDC Manager and Aria Suite Lifecycle.
- E. In VMware vCenter, replace the ESXi SSL certificates.
- F. Integrate the Microsoft CA into SDDC Manager.

Answer: A,D,F

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

As per the VMware Cloud Foundation Administration Guide, the official and supported process for moving all solution certificates under a Microsoft Certificate Authority, while keeping management and lifecycle operations compliant with SDDC Manager, is as follows:

C . Integrate the Microsoft CA into SDDC Manager.

Exact Extract:

"To replace SSL certificates for VMware Cloud Foundation components using SDDC Manager, you must first integrate your Microsoft CA with SDDC Manager. This allows SDDC Manager to automate the certificate signing process using the organization's enterprise CA." F . In SDDC Manager, replace the SSL certificates for vCenter, ESXi, NSX Manager, SDDC Manager and Aria Suite Lifecycle.

Exact Extract:

"With Microsoft CA integration, you can use SDDC Manager to generate and replace SSL certificates for all key solution components, including vCenter, ESXi, NSX Manager, SDDC Manager, and Aria Suite Lifecycle. This process ensures full visibility and management through SDDC Manager." D . In SDDC Manager, replace the SSL certificates for vCenter, NSX Manager, SDDC Manager and Aria Suite Lifecycle.

Exact Extract:

"Certificate replacement workflows in SDDC Manager allow you to select which managed components have their certificates replaced with CA-signed certificates. You must select and update all components that are not already using compliant CA-signed certificates." Why Not the Other Options?

A: ESXi certificate replacement should be managed via SDDC Manager for compliance, not directly in vCenter.

B: OpenSSL CA is not part of the company's security policy or supported by the current workflow.

E: Aria Suite Lifecycle and its components already use CA-signed certificates, so this action is not needed.

Summary:

To ensure compliance with the updated security policy and maintain management with SDDC Manager, the administrator must:

Integrate the Microsoft CA into SDDC Manager (C),

Use SDDC Manager to replace all relevant solution SSL certificates for vCenter, ESXi, NSX Manager, SDDC Manager, and Aria Suite Lifecycle (F), And use SDDC Manager's certificate replacement workflow to update any components still requiring CA-signed certificates (D).

These steps are mandated and supported by VMware Cloud Foundation official documentation.

NEW QUESTION # 164

Which command verifies the successful installation of the Tanzu CLI tools on a developer workstation?

- A. `tanzu version`
- B. `vsphere -v`
- C. `vcli --check`
- D. `vcli version`

Answer: A

Explanation:

To verify the successful installation of the Tanzu CLI tools, you can use the `tanzu version` command. This command displays the version of the Tanzu CLI, confirming that the tools are properly installed on the developer workstation.

NEW QUESTION # 165

.....

With the rapid development of the world economy and frequent contacts between different countries, looking for a good job has become more and more difficult for all the people. So it is very necessary for you to get the 2V0-11.25 certification, you have to increase your competitive advantage in the labor market and make yourself distinguished from other job-seekers. Our 2V0-11.25 Exam Questions can help you make it. As the most professional 2V0-11.25 study guide, we have helped numerous of our customer get a better career and live a better life now.
