ISACA COBIT 2019 Foundation Sample Questions (Q128-Q133):

NEW QUESTION # 128

Before designing an enterprise IT governance system, an organization should FIRST review and understand:

- A. the enterprise's risk profile.
- **B. the enterprise's strategy.**
- C. current IT-related issues.

Answer: B

Explanation:

Explanation

According to the COBIT 2019 Design Guide, before designing an enterprise IT governance system, an organization should first review and understand the enterprise's strategy. The enterprise's strategy defines the vision, mission, goals and objectives of the organization, and provides the direction and context for IT governance. The enterprise's strategy also identifies the key stakeholders, their needs and expectations, and the value proposition of IT to the business. 1, p. 16-17 References: 1: COBIT 2019 Design Guide: Designing an Information and Technology Governance Solution

NEW QUESTION # 129

Which of the following would be an appropriate metric associated with an enterprise goal of "Business service continuity and availability?"

- A. Ratio of significant incidents that were not identified in risk assessments vs. total incidents
- B. Satisfaction levels of board and executive management with business process capabilities
- **C. Number of business processing hours lost due to unplanned service interruptions**

Answer: C

Explanation:

The number of business processing hours lost due to unplanned service interruptions would be an appropriate metric associated with an enterprise goal of business service continuity and availability. A metric is a quantifiable measure that is used to track and assess the status of a specific process or activity. Business service continuity and availability is one of the 17 generic enterprise goals defined by COBIT that describes the desired outcome of ensuring that critical business services are delivered at agreed levels and are resilient to disruptions. The number of business processing hours lost due to unplanned service interruptions is a metric that reflects how well this outcome is achieved. 1 3 References: COBIT 2019 Framework:

NEW QUESTION # 130

Which of the following enterprise risk management concepts is MOST important to fully understand prior to finalizing the design of an IT governance system?

- A. The enterprise's risk appetite
- **B. The enterprise's risk profile**
- C. The enterprise's risk tolerance

Answer: B

Explanation:

The enterprise's risk profile is the most important enterprise risk management concept to fully understand prior to finalizing the design of an IT governance system. Enterprise risk management is the process of identifying, analyzing, evaluating, treating, monitoring, and communicating risks that affect the achievement of enterprise objectives. Enterprise risk management concepts include risk appetite (the amount and type of risk that an enterprise is willing to accept), risk tolerance (the acceptable variation in outcomes related to specific performance measures), risk profile (the overall exposure or level of risk that an enterprise faces), etc. The enterprise's risk profile is the most important concept to fully understand prior to finalizing the design of an IT governance system because it helps to determine the appropriate level of risk optimization for each governance objective. 1 4 References: COBIT 2019 Framework:

NEW QUESTION # 131

Enterprise governance of information and technology (EGIT) is an integral part of:

- A. corporate governance.
- B. risk governance.
- C. financial governance.

Answer: A

NEW QUESTION # 132

Which of the following is a KEY principle of an enterprise governance system?

- A. It should focus only on technology and information processing that takes place within the IT function.
- B. It should focus only on technology and information processing that takes place in cost centers
- C. It should focus on all technology and information processing, regardless of where processing takes place.

Answer: C

Explanation:

A governance system should cover the enterprise end to end, focusing not only on the IT function but on all technology and information processing the enterprise puts in place to achieve its goals, regardless where the processing is located in the enterprise.
