NEW QUESTION # 45
How can you make the attributes of a Flex Master Data field reportable?

- A. When the Flex Master Data Template is created, the attributes can be marked as reportable or not.
- B. Create a custom reportable field and use a defaulting expression to set the value of the Flex Master Data attribute
- C. Flex Master Data objects automatically include all attributes as reportable without any additional configuration.
- D. Flex Master Data objects and their attributes cannot be made reportable

Answer: A

Explanation:
When creating a Flex Master Data (FMD) template, you can specify which attributes are reportable by marking them accordingly during template setup. Only attributes marked as reportable will be accessible in reporting tools within SAP Ariba.
While some users employ workarounds by creating custom fields with defaulting expressions to surface FMD attribute values, the direct and supported method is to configure reportability at the attribute level within the FMD template itself.
This capability ensures efficient and accurate reporting without requiring complex custom fields or expressions.
