

2026 High-quality DP-203 Valid Dumps Book | 100% Free Trusted DP-203 Exam Resource

P.S. Free 2026 Microsoft DP-203 dumps are available on Google Drive shared by ExamTorrent: https://drive.google.com/open?id=1oA8ahn63pxlyg33mJtAWUYmBP_9W0PgF

ExamTorrent has been devoted itself to provide all candidates who are preparing for IT certification exam with the best and the most trusted reference materials in years. With regards to the questions of IT certification test, ExamTorrent has a wealth of experience. ExamTorrent has helped numerous candidates and got their reliance and praise. So, don't doubt the quality of ExamTorrent Microsoft DP-203 Dumps. It is high quality dumps helping you 100% pass DP-203 certification test. ExamTorrent promises 100% FULL REFUND, if you fail the exam. With this guarantee, you don't need to hesitate whether to buy the dumps or not. Missing it is your losses.

To prepare for the DP-203 exam, professionals should have a strong understanding of data engineering concepts and experience with Microsoft Azure. Microsoft offers a variety of resources to help professionals prepare for the exam, including study guides, training courses, and practice exams. Additionally, professionals can gain hands-on experience by working on data engineering projects on Microsoft Azure.

Microsoft DP-203 certification exam is designed to assess the skills and knowledge of data engineers who use Microsoft Azure to build and manage big data and analytics solutions. DP-203 Exam validates the candidate's ability to design and implement data storage, data processing, and data integration solutions using Azure services such as Azure Data Lake Storage, Azure Databricks, Azure Stream Analytics, and Azure Data Factory. DP-203 exam also tests the candidate's knowledge of data security, compliance, and governance in Azure.

Free PDF Microsoft Marvelous DP-203 Valid Dumps Book

The Data Engineering on Microsoft Azure DP-203 certification is a valuable credential earned by individuals to validate their skills and competence to perform certain job tasks. Your Data Engineering on Microsoft Azure DP-203 certification is usually displayed as proof that you've been trained, educated, and prepared to meet the specific requirement for your professional role. The Data Engineering on Microsoft Azure DP-203 Certification enables you to move ahead in your career later.

Microsoft Data Engineering on Microsoft Azure Sample Questions (Q81-Q86):

NEW QUESTION # 81

You have an Azure Synapse Analytics dedicated SQL pool.

You need to create a table named FactInternetSales that will be a large fact table in a dimensional model.

FactInternetSales will contain 100 million rows and two columns named SalesAmount and OrderQuantity.

Queries executed on FactInternetSales will aggregate the values in SalesAmount and OrderQuantity from the last year for a specific product. The solution must minimize the data size and query execution time.

How should you complete the code? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation

Box 1: (CLUSTERED COLUMNSTORE INDEX

CLUSTERED COLUMNSTORE INDEX

Columnstore indexes are the standard for storing and querying large data warehousing fact tables. This index uses column-based data storage and query processing to achieve gains up to 10 times the query performance in your data warehouse over traditional row-oriented storage. You can also achieve gains up to 10 times the data compression over the uncompressed data size. Beginning with SQL Server 2016 (13.x) SP1, columnstore indexes enable operational analytics: the ability to run performant real-time analytics on a transactional workload.

Note: Clustered columnstore index

A clustered columnstore index is the physical storage for the entire table.

Diagram Description automatically generated

To reduce fragmentation of the column segments and improve performance, the columnstore index might store some data temporarily into a clustered index called a deltastore and a B-tree list of IDs for deleted rows. The deltastore operations are handled behind the scenes. To return the correct query results, the clustered columnstore index combines query results from both the columnstore and the deltastore.

Box 2: HASH([ProductKey])

A hash distributed table distributes rows based on the value in the distribution column. A hash distributed table is designed to achieve high performance for queries on large tables.

Choose a distribution column with data that distributes evenly

<https://docs.microsoft.com/en-us/azure/synapse-analytics/sql-data-warehouse/sql-data-warehouse-tables-overview>

<https://docs.microsoft.com/en-us/azure/synapse-analytics/sql-data-warehouse/sql-data-warehouse-tables-distribu>

NEW QUESTION # 82

You are designing an Azure Synapse Analytics dedicated SQL pool.

Groups will have access to sensitive data in the pool as shown in the following table.

You have policies for the sensitive data. The policies vary by region as shown in the following table.

You have a table of patients for each region. The tables contain the following potentially sensitive columns.

You are designing dynamic data masking to maintain compliance.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 83

You have a data model that you plan to implement in a data warehouse in Azure Synapse Analytics as shown in the following exhibit.

All the dimension tables will be less than 2 GB after compression, and the fact table will be approximately 6 TB.

Which type of table should you use for each table? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 84

You plan to create a real-time monitoring app that alerts users when a device travels more than 200 meters away from a designated location.

You need to design an Azure Stream Analytics job to process the data for the planned app. The solution must minimize the amount of code developed and the number of technologies used.

What should you include in the Stream Analytics job? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

□ Explanation

□ Diagram, table Description automatically generated

Input type: Stream

You can process real-time IoT data streams with Azure Stream Analytics.

Function: Geospatial

With built-in geospatial functions, you can use Azure Stream Analytics to build applications for scenarios such as fleet management, ride sharing, connected cars, and asset tracking.

Note: In a real-world scenario, you could have hundreds of these sensors generating events as a stream.

Ideally, a gateway device would run code to push these events to Azure Event Hubs or Azure IoT Hubs.

<https://docs.microsoft.com/en-us/azure/stream-analytics/geospatial-scenarios>

NEW QUESTION # 85

You need to collect application metrics, streaming query events, and application log messages for an Azure Databrick cluster.

Which type of library and workspace should you implement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:
