

Real 350-901 Torrent, 350-901 Exam Assessment

What's more, part of that PracticeVCE 350-901 dumps now are free: https://drive.google.com/open?id=1C7_m3or105yD0kw-t_fTPZAWEdaKLo9

We know that 350-901 exam is very important for you working in the IT industry, so we developed the 350-901 test software that will bring you a great help. All exam materials you need are provided by our team, and we have carried out the scientific arrangement and analysis only to relieve your pressure and burden in preparation for 350-901 Exam.

Leading Certification Path: Cisco Certified DevNet Professional

The DevNet Professional certificate helps candidates to demonstrate their mastery of software and infrastructure development. It will confirm if you are proficient in designing and maintaining applications on functional Cisco platforms and your skills align with the latest technology needs.

Cisco 350-901 exam is ideal for developers, software engineers, network engineers, and network architects who want to validate their skills in developing applications on Cisco platforms. 350-901 Exam consists of 60-70 questions that need to be completed within 90 minutes. 350-901 exam tests the candidates on their knowledge of software development and design, data formats and protocols, APIs, automation, and network fundamentals. Developing Applications using Cisco Core Platforms and APIs (DEVCOR) certification exam is an excellent way for professionals to enhance their skills and knowledge in developing applications on Cisco platforms, which is highly in demand in the job market.

350-901 Exam Assessment & 350-901 Reliable Braindumps

The pass rate is 98%, and we also pass guarantee if you buy 350-901 study materials of us. We have received many good feedbacks of the 350-901 exam dups. You also enjoy free update for one year after your payment, and if you have any questions about the 350-901 Exam Dumps, just ask our online service stuff, they will give a reply immediately, or you can send email to us, we will answer you as quickly as we can. Therefore, just contact us if you have the confusions about the 350-901 study materials.

Cisco 350-901 Certification Exam is a challenging but rewarding experience for software developers who are looking to demonstrate their expertise in building and deploying applications using Cisco's core platforms and APIs. It is an excellent way for developers to stand out in a highly competitive job market and advance their careers in the field of software development, cloud computing, and networking.

Cisco Developing Applications using Cisco Core Platforms and APIs (DEVCOR) Sample Questions (Q110-Q115):

NEW QUESTION # 110

Which two types of organization are subject to GDPR? (Choose two.)

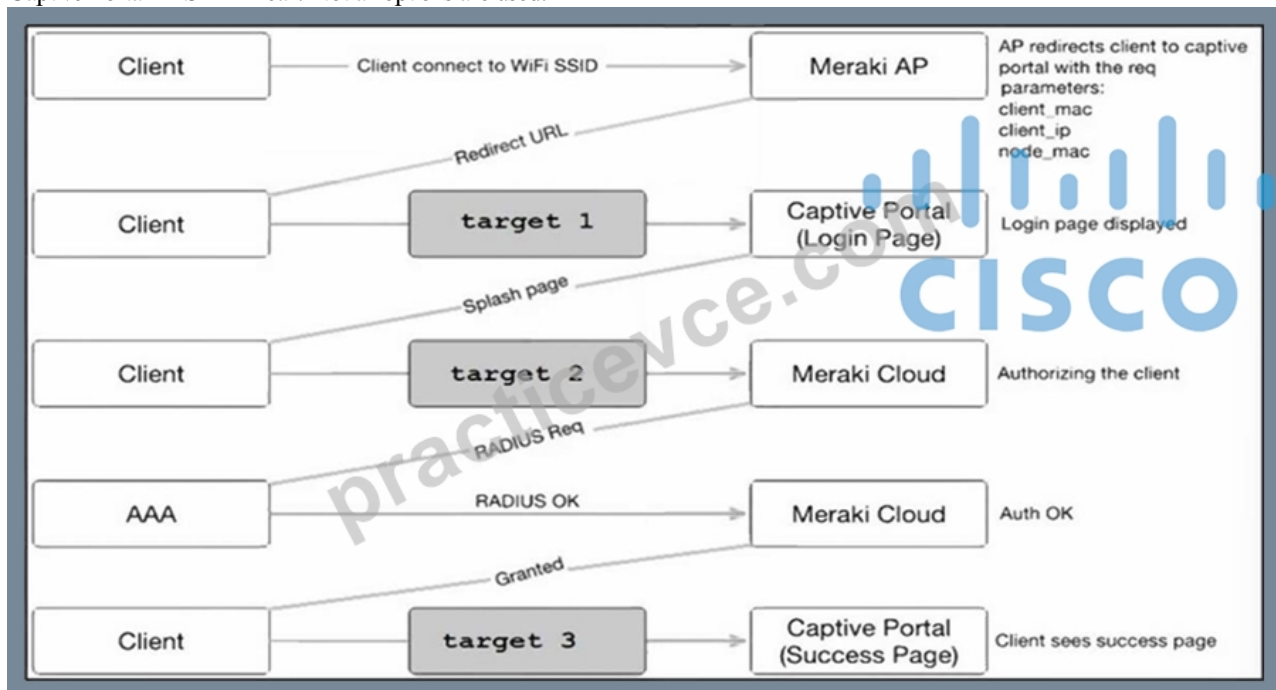

- A. any organization that offers goods or services to customers in the EU
- B. only organizations that have offices in countries that are part of the EU
- C. only organizations that operate outside the EU
- D. only organizations that physically reside in the EU
- E. any organization that operates within the EU

Answer: A,E

NEW QUESTION # 111

Drag and Drop Question

Refer to the exhibit. Drag and drop the code snippets from the left onto the targets on the right to complete the Cisco Meraki Captive Portal REST API call. Not all options are used.

Answer Area

[POST] URL: https://splashurl.com?Query:continue_url

[GET] URL: <https://splashurl.com/call>

[GET] URL: <https://splashurl.com?Query:pass>

[GET] URL: <https://splashurl.com?success>

[GET] URL: https://splashurl.com/call?Query:client_mac,client_ip,node_mac

[GET] URL: <https://splashurl.com?failed>

target 1

target 2

target 3

Answer:

    Note over Server: [GET] URL: https://splashurl.com?success
    Server-->>Client: [GET] URL: https://splashurl.com?success
```

NEW QUESTION # 112

Refer to the exhibit.

```
FROM alpine:3.7
RUN apk add --no-cache bash
```

Which additional line results in the output of Test 1 upon execution of the docker run --rm devnet 1 command in a Dockerfile with this content?

- A. ENTRYPOINT ["/bin/echo", "Test"]
- B. CMD ["/bin/echo Test"]
- C. CMD ["/bin/echo", "Test"]
- D. RUN ["/bin/echo", "Test"]

Answer: C

NEW QUESTION # 113

```

""" Instantiate a UCS Service Profile from template and associate """
from ucsm.sdk.ucshandle import UcsHandle
from ucsm.sdk.mometa.ls.LsBinding import LsBinding
from ucsm.sdk.mometa.ls.LsServer import LsServer

HANDLE = <item1>{
    "ucs-devcore.cisco.com",
    "admin",
    "password"
}

HANDLE.<item2>()

SP_FROM_TEMPLATE = <item 3>{
    parent_mo_or_dn='org-root/org-devnet',
    name='devcore-server-01',
    src_tmpl_name='devcore template',
    type='instance'
}

LsBinding(
    parent_mo_or_dn=<item 4>,
    pn_dn='sys/chassis-7/blade-3'
)

HANDLE.<item 5>(SP_FROM_TEMPLATE, modify_present=True)
HANDLE.<item 6>()

HANDLE.<item 7>()

```

1.5 Getting Started

1.5.1 Connecting Disconnecting

```

from ucsm.sdk.ucshandle import UcsHandle

# Create a connection handle
handle = UcsHandle("192.168.1.1", "admin", "password")

# Login to the server
handle.login()

# Logout from the server
handle.logout()

```

Refer UcsHandle API Reference for detailed parameter sets to UcsHandle

1.5.2 Base APIs

The SDK provides APIs to enable CRUD operations.

- Create an object - `add_mo`
- Retrieve an object - `query_dn`, `query_classid`, `query_dns`, `query_classids`
- Update an object - `set_mo`
- Delete an object - `delete_mo`

The above APIs can be bunched together in a transaction (All or None). `commit_mo` commits the changes made using the above APIs.

All these methods are invoked on a `UcsHandle` instance. We refer it by `handle` in all the examples here-after. Refer to the *Connecting/Disconnecting* to create a new handle.

1.5.3 Creating Objects

Creating managed objects is done via `add_mo` API.

Example:

The below example creates a new Service Profile (`LsServer`) Object under the parent `org-root`

```
from ucsm.sdk.mometa.ls.LsServer import LsServer  
  
sp = LsServer(parent_mo_or_dn="org-root", name="sp_demo")  
handle.add_mo(sp)
```

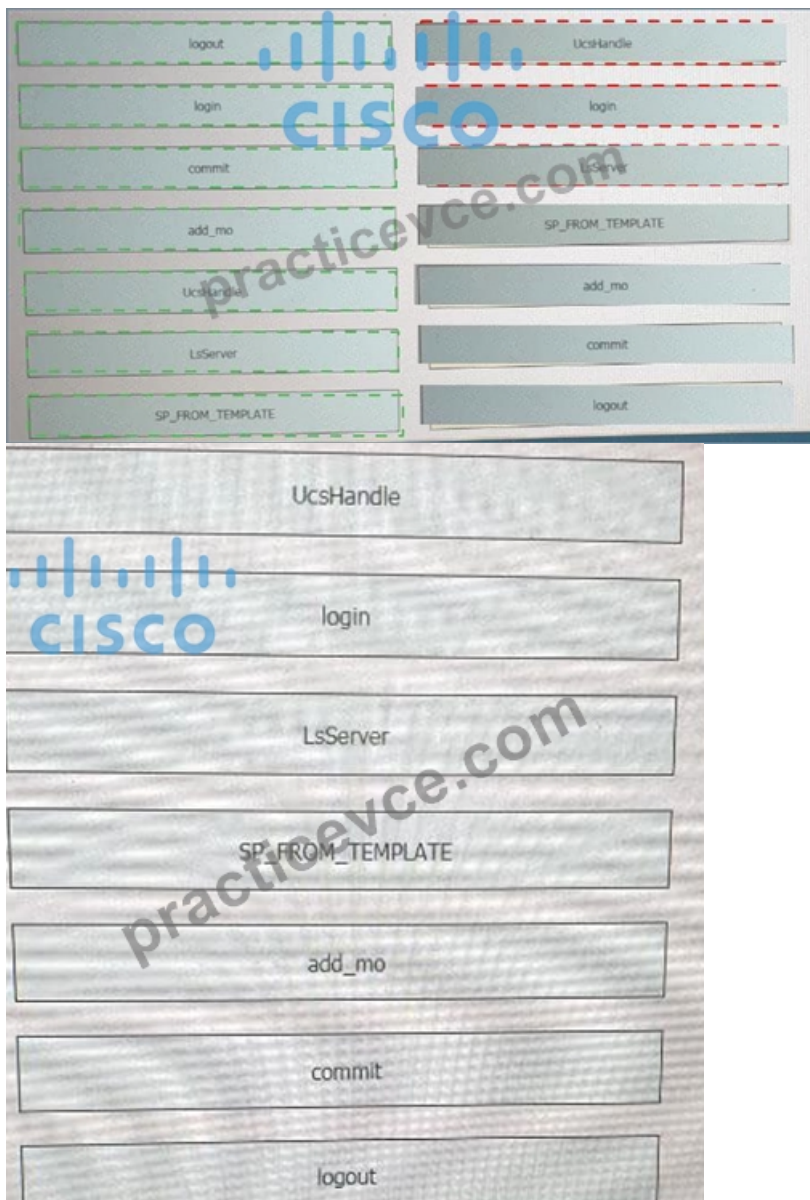

note: the changes will only be sent to server when `handle.commit()` is called.
Add Mo API reference

Refer to the exhibit above and click on the resource tabs in the top left corner to view resources to help with this question. Python code that uses the UCS Python SDK is instantiating a service profile named "devcore-server-01" from service profile template "device-template", then associating the service profile instance to blade 3 in chassis 7. Drag and drop the code snippets from the left onto the item numbers on the right that match the missing sections in the Python exhibit.

logout	<item 1>
login	<item 2>
commit	<item 3>
add_mo	<item 4>
UcsHandle	<item 5>
LsServer	<item 6>
SP_FROM_TEMPLATE	<item 7>

Answer:

Explanation:

NEW QUESTION # 114

Drag and drop the code from the bottom onto the box where the code is missing in the Python code to complete the greeter function while also mitigating against XSS threats. Not all options are used.

```

from datetime import datetime
from flask import Flask, request, make_response, escape
from flask_wtf.csrf import CSRFProtect

csrf = CSRFProtect(app)

def time():
    now = datetime.now()
    current_time = now.strftime("%H:%M:%S")
    return make_response("Current time: " + current_time)

def greeter():
    first_name = request.args.get("name", '')
    return make_response("Your name: " + [ ] )

first_name [ ] app = Flask(__name__) [ ] @app.route("/time")
@app.route("/greeter") [ ] escape(first_name) [ ] last_name

```

Answer:

Explanation:

```

from datetime import datetime
from flask import Flask, request, make_response, escape
from flask_wtf.csrf import CSRFProtect

app = Flask(__name__)
csrf = CSRFProtect(app)

@app.route('/time')
def time():
    now = datetime.now()
    current_time = now.strftime("%H:%M:%S")
    return make_response("Current Time: " + current_time)

@app.route('/greeter')
def greeter():
    first_name = request.args.get("name", '')
    return make_response("Your name: " + first_name)

```

first_name app = Flask(__name__) @app.route('/time')

@app.route('/greeter') escape(first_name) last_name

Explanation:

```

from datetime import datetime
from flask import Flask, request, make_response, escape
from flask_wtf.csrf import CSRFProtect

app = Flask(__name__)
csrf = CSRFProtect(app)

@app.route('/time')
def time():
    now = datetime.now()
    current_time = now.strftime("%H:%M:%S")
    return make_response("Current Time: " + current_time)

@app.route('/greeter')
def greeter():
    first_name = request.args.get("name", '')
    return make_response("Your name: " + first_name)

```

escape(first_name) last_name
