IIBA Certificate in Product Ownership Analysis (IIBA-CPOA) Sample Questions (Q29-Q34):

NEW QUESTION # 29

What type of connection is required to create a support system and a culture of teamwork across the organization?

- A. Influential
- **B. Emotional**
- C. Personal
- D. Social

Answer: B

Explanation:

An emotional connection fosters trust, empathy, and mutual respect, creating a strong support system and a culture of teamwork across the organization.

NEW QUESTION # 30

Which component is used to determine how the product teams operate within the enterprise context?

- A. Brand value
- **B. Collaboration**
- C. Market value
- D. Time value

Answer: B

Explanation:

Collaboration determines how product teams operate within the enterprise context by defining how they interact, share information, and work together to achieve organizational goals.

NEW QUESTION # 31

Iteration reviews and user acceptance testing to validate product features will be negatively impacted if:

- **A. product changes while building product features are not communicated with customers.**
- B. details about resource planning are not communicated with customers.
- C. iteration plan is not published.

- D. retrospective meeting plans and reviews are not communicated with stakeholders.

Answer: A

Explanation:

If changes made during feature development are not communicated with customers, iteration reviews and user acceptance testing suffer because stakeholders may be unaware of modifications, leading to misaligned expectations and incomplete validation.

NEW QUESTION # 32

When do product ownership analysis (POA) practitioners conduct stakeholder analysis?

- **A. Early in the product delivery process and updated as the work progresses**
- B. Early in the product delivery process and once at the end
- C. When all the stakeholders have been identified
- D. Once the product has been delivered

Answer: A

Explanation:

POA practitioners conduct stakeholder analysis early in the product delivery process and continuously update it as work progresses to maintain alignment with evolving stakeholder needs and priorities.

NEW QUESTION # 33

What happens when the product ownership analysis (POA) practitioner rejects a product backlog item (PBI) that has been marked done and the team decides the work cannot be completed?

- **A. The change is added to the product backlog for revision work in the next iteration**
- B. The change is added to the product backlog for revision work to update the stakeholders
- C. The change is added to the product backlog for revision work to change the road map
- D. The change is added to the product backlog for revision work in the next release

Answer: A

Explanation:

If a PBI marked as done is rejected and the team cannot complete the work, the POA practitioner adds it back to the product backlog for revision in the next iteration, ensuring the issue is addressed promptly without delaying ongoing delivery cycles.

NEW QUESTION # 34
