Scrum Professional Scrum Product Owner II Sample Questions (Q57-Q62):

NEW QUESTION # 57

How does the Scrum Master help the Product Owner? (choose the best three answers)

- A. Finding techniques for effective Product Backlog management
- B. Leading and coaching the organization in its Scrum adoption
- C. Introducing cutting edge development practices
- D. Understanding product planning in an empirical environment
- E. Facilitating Scrum events as requested or needed

Answer: A,D,E

NEW QUESTION # 58

A Product Owner is needed for every:
(choose the best answer)

- A. Portfolio.
- B. Program.
- C. Product.
- D. All of the above.

Answer: C

Explanation:

The Product Owner is the sole person accountable for managing the Product Backlog and ensuring the value of the work the Scrum Team performs. The Product Owner is one person, not a committee. The Product Owner may represent the desires of a committee in the Product Backlog, but those wanting to change a Product Backlog item's priority must address the Product Owner¹. The Product Owner is responsible for the product and its outcome².

A product is a vehicle to deliver value. It has a clear boundary, known stakeholders, well-defined users or customers. A product could be a physical product, a software product, a service, a project, or something else³. A product has a product vision, which is the overarching goal of the product, the reason for creating it, and the impact it should have on its customers and users⁴.

A portfolio is a collection of products or projects that are aligned with a strategic goal or an organizational unit⁵. A program is a group of related projects or products that are managed in a coordinated way to obtain benefits and control not available from managing them individually. A portfolio or a program may have a portfolio or program manager, who is responsible for overseeing the alignment, prioritization, and governance of the portfolio or program. However, these roles are not equivalent to the Product Owner role, as they do not have the same accountabilities and authorities as the Product Owner.

Therefore, the correct answer is that a Product Owner is needed for every product, not for every portfolio or program. Reference: 1: Scrum Guide 2: Understanding and Applying the Scrum Framework 3: Managing Products with Agility 4: [Product Vision] 5: [Portfolio] : [Program] : [Portfolio Management] : [Program Management]

NEW QUESTION # 59

The Evidence-Based Management (EBM) consists of four Key Value Areas (KVAs). One of which is Ability to Innovate (A2I). The goal of looking at the A2I is to maximize the organization's ability to deliver new capabilities and innovative solutions. Which action can improve your A2I? (choose the best answer)

- A. Increasing the level of your team's cross-functionality skills.
- B. All of the above.
- C. Co-locating the team members.
- D. Setting days where there are no meetings outside of the Scrum events in order to increase focus.

Answer: B

NEW QUESTION # 60

As a Scrum Product Owner, what should be your most important activity? (choose the best answer)

- A. Making sure that all the needs of the stakeholders are satisfied.
- B. Being the primary contact point for all product details
- C. Planning release schedules and roadmaps
- D. Ensuring the maximum value is delivered by the product.

Answer: D

NEW QUESTION # 61

Which activities a Product Owner likely to engage in during a Sprint? (choose the best three answers)

- A. Update the Sprint burndown chart.
- B. Assign and prioritize the Developers's tasks.
- C. Support the Developers by answering questions about items that are unclear
- D. Re-order Product Backlog Items.
- E. Host the Daily Scrum and Retrospective.
- F. Collaborate with stakeholders.

Answer: C,D,F

NEW QUESTION # 62

.....
