## Microsoft Identity and Access Administrator Sample Questions (Q244-Q249):

### NEW QUESTION # 244

You have an Azure AD tenant named Contoso that contains a terms of use (ToU) named Terms1 and an access package. Contoso

users collaborate with an external organization named Fabrikam. Fabrikam users must accept Terms1 before being allowed to use the access package.

You need to identify which users accepted or declined Terms1.

What should you use?

- A. audit logs
- B. provisioning logs
- C. sign-in logs
- D. the Usage and Insights report

**Answer: A**

Explanation:

When users accept or decline a Terms of Use (ToU) in Azure AD, these actions are recorded in the audit logs.

The Microsoft Identity and Access Administrator documentation specifies that audit logs capture "Terms of use acceptance records" including who accepted, who declined, timestamp, and version of the ToU accepted.

The other options are incorrect because:

\* Provisioning logs capture provisioning events (not ToU).

\* Usage and Insights reports provide activity metrics, not compliance actions.

\* Sign-in logs capture authentication activity but not ToU acceptance.

Therefore, to identify which users accepted or declined Terms1, you should use the Audit logs in Azure AD.

#### NEW QUESTION # 245

You have a Microsoft 365 E5 subscription that contains three users named User1, User2, and User3.
