- A. SAP Global Human Rights commitment
- B. ESG reporting
- C. Transparency and accountability
- D. Ethical governance

Answer: A,C,D

Explanation:

SAP's Responsible AI framework includes the SAP Global Human Rights commitment, transparency and accountability, and ethical governance, as detailed in SAP documentation. Transparency and accountability mandate clear documentation of AI processes and decision-making, fostering trust. Ethical governance establishes policies and oversight to ensure fairness, mitigate bias, and comply with regulations. ESG reporting, while part of SAP's sustainability efforts, is not a core component of the Responsible AI framework, and human-centered design is a principle but not explicitly listed. These elements ensure SAP's AI solutions are trustworthy and ethical.

NEW QUESTION # 44

What is the semantic backbone of the AI Foundation that seamlessly links and contextualizes enterprise data for AI insights?

- A. Document grounding
- B. SAP Document AI
- **C. SAP Knowledge Graph**
- D. Joule Studio

Answer: C

Explanation:

The SAP Knowledge Graph serves as the semantic backbone of SAP's AI Foundation, enabling seamless linking and contextualization of enterprise data for AI-driven insights. According to SAP Business AI documentation, the SAP Knowledge Graph integrates data from multiple SAP and third-party systems, creating a structured, interconnected data model that disambiguates terms and links concepts to entities. This facilitates contextual insights by providing a unified view of enterprise data, enhancing AI applications' ability to deliver relevant and accurate recommendations. SAP Document AI focuses on document processing. Joule Studio is a low-code development environment, and document grounding is a process, not a component. The Knowledge Graph's ability to ground AI insights in domain-specific knowledge ensures robust and meaningful outcomes for businesses.
