The sans bug plans have been given to you all to drift through the Salesforce Plat-101 certification exam.

Salesforce Plat-101 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> • Salesforce Ecosystem: This section of the exam measures skills of Marketing Cloud Administrators and covers the overall Salesforce ecosystem. It focuses on understanding the different resources available for learning and skill development, recognizing how Salesforce Customer 360 products can be applied in real business use cases, and explaining how organizations make use of Salesforce in daily operations. It also highlights awareness of job roles and career opportunities within the Salesforce ecosystem.
Topic 2	<ul style="list-style-type: none"> • Navigation: This section of the exam measures the skills of Marketing Specialists and covers how users navigate Salesforce. It tests the ability to locate and access necessary information in given scenarios and to identify where different types of Salesforce customizations take place. The emphasis is on practical system navigation that supports marketing operations.
Topic 3	<ul style="list-style-type: none"> • Reports & Dashboards: This section of the exam measures skills of Marketing Specialists and covers reporting and visualization in Salesforce. It includes describing how reports are built, how dashboards present insights, and how these tools help organizations monitor performance and make informed marketing decisions.
Topic 4	<ul style="list-style-type: none"> • Data Model: This section of the exam measures skills of Marketing Cloud Administrators and covers Salesforce's data model. It involves understanding the relationship between core standard objects such as Accounts, Contacts, Leads, Opportunities, and Cases. The section also evaluates knowledge of ensuring data visibility through features and maintaining data integrity using the right tools in different business scenarios.

Salesforce Certified Platform Foundations Sample Questions (Q45-Q50):

NEW QUESTION # 45

A Salesforce associate at Get Cloudy Consulting needs a list of all active contacts grouped by Account. What is the first step in building this report?

- A. Create a new report using the **Contacts & Accounts report type**.
- B. Create a Contacts report with a filter on Account.
- C. Create a joined report with accounts and contacts.

Answer: A

Explanation:

The first step in building a report that shows all active contacts grouped by account is to create a new report using the **Contacts & Accounts report type**. The report type determines the objects and fields that are available for the report. The **Contacts & Accounts report type** allows users to report on contacts and their related accounts, as well as account fields such as industry, annual revenue, and number of employees

NEW QUESTION # 46

A salesforce associate is excited to find they can combine the challenge of learning new skills with the chance of winning prizes?

- A. Super badges
- B. Quests
- C. **Ranks**

Answer: C

Explanation:

The Salesforce feature that allows an associate to combine the challenge of learning new skills with the chance of winning prizes is **Ranks**. Ranks are a way to measure your progress and compare it with other learners on Trailhead. You can earn ranks by completing modules, projects, superbadges, and trails. Each rank has a minimum number of points and badges required to achieve it. You can also win prizes by participating in quests, which are time-limited challenges that reward you with swag, certifications, or other goodies¹. Superbadges are not a feature that offers prizes, but they are a way to showcase your advanced skills and earn real-world scenario credentials²

NEW QUESTION # 47

Get Cloudy Consulting gets 90% of its leads from trade shows. Sales reps create many lead records during these events, but they often forget to change the Lead Source field to Trade Show*.

What approach would improve data integrity for the Lead Source field?

- **A. Set the default value of the Lead Source field to Trade Show'.**
- B. Create a validation rule requiring the Lead Source field to equal Trade Show'.
- C. Make an assignment rule named Trade Show' to only assign leads to sales reps.

Answer: A

Explanation:

Setting the default value of the Lead Source field to Trade Show' is the best approach to improve data integrity for the Lead Source field. A default value is a value that is automatically populated in a field when a new record is created, unless the user enters a different value. Setting the default value to Trade Show' would save the sales reps time and ensure that most of the leads have the correct value for the Lead Source field.

Creating a validation rule requiring the Lead Source field to equal Trade Show' would not work, because it would prevent the user from entering any other value, such as Web, Phone, or Referral, which may not be accurate for all leads. Making an assignment rule named Trade Show' to only assign leads to sales reps would not work, because it would not affect the Lead Source field, and it would not allow the user to assign leads based on other criteria, such as territory, industry, or product.

NEW QUESTION # 48

Where can a new user set up an email signature in Salesforce?

- A. Personal Settings
- **B. Email Setup**
- C. User Profile

Answer: B

Explanation:

The place where the new user can set up an email signature in Salesforce is the Personal Settings. The Personal Settings are where the user can customize their preferences, such as language, locale, time zone, display, security, and email. The user can access the Personal Settings by clicking on their profile icon and then clicking Settings. Then, they can click on Email under My Personal Information and then click on My Email Settings. There, they can enter their email signature in the Email Signature field and click Save. The User Profile and the Email Setup are not the correct places to set up an email signature in Salesforce.

NEW QUESTION # 49

A Salesforce user at Get Cloudy Consulting informs the company's Salesforce associate they have moved to another department in the organization and no longer need access to Salesforce.

How should the associate change the user's access?

- **A. Deactivate the user to free up the Salesforce license.**
- B. Delete the user to free up the Salesforce license.
- C. Do nothing; the user may need to access Salesforce in the future.

Answer: A

Explanation:

Deactivating the user is the best way to change the user's access and free up the Salesforce license.

Deactivating a user prevents the user from logging in to Salesforce and removes the user from any assigned permission sets, queues, and groups. However, the user's record and related data are still preserved and can be reactivated if needed. Deleting the user would also free up the license, but it would also delete the user's record and related data, which may not be desirable. Doing nothing would not change the user's access or free up the license, and it would pose a security risk if the user still has the login credentials.

NEW QUESTION # 50
