Our HPE7-A03 learn materials can provide a good foundation for you to achieve your goal. A good job requires good skills, and the most intuitive way to measure your ability is how many qualifications you have passed and how many qualifications you have.

With a qualification, you are qualified to do this professional job. Our HPE7-A03 Certification material is such a powerful platform, it can let you successfully obtain the HPE7-A03 certificate, from now on your life is like sailing, smooth sailing.

HP Aruba Certified Campus Access Architect Exam Sample Questions (Q29-Q34):

NEW QUESTION # 29

XYZ Regional Hospital is an integrated healthcare system of hospitals, neighborhood health centers, and small doctor offices. XYZ Regional Hospital has recently merged with 4x neighborhood health centers and 125 doctor branch offices. The wireless, wired access, and AAA solutions are outdated and need to be replaced

XYZ Regional Hospital is looking to future-proof and improve efficiency across all sites by enhancing wired and wireless access and migrating to a centralized and unified wired/wireless and policy management that can provide uninterrupted availability of all systems.

Locations:

- XYZ Regional Hospital is located in New York City
- Dila Health Center is located in City A
- Mount Health Center is located in City B
- Rock Health Center is located in City C
- Branch clinics are located at different locations across the United States Requirements:
- Provide, via management software, one single pane of glass to manage wired and wireless IANs. and VPNs across campus, branch, and remote via web/cloud architecture providing near real-time Insight. troubleshooting tools, and Service Level performance reporting.
- Seamless integration across wired, wireless. WAN. SD-Branch. IoT
- Provide secure wireless access to all the employees of the Regional Hospital and partners, as well as provide wireless Internet access to medical citizens when they visit our facilities.
- All-access points must support the following features and specifications: 802.11ax (Wi-Fi 6E Certified)
- Security options including WP2/WPA3. 802.1X with Radius secure authentication
- Identify and authenticate every wireless and wired device
- End-to-end role-based security
- Seamless mobility across the hospital for medical learns, patients, and visitors
- Cuts Wi-Fi deployment times from days to hours and enables Zero-Touch deployments across the site
- Establishes a resilient, future-ready network infrastructure with the intelligence, scalability, and intuitive toolsets to meet emerging needs
- Fully redundant branch solution with dynamic path selection to the hospital A Regional Hospital will be implementing RADIUS authentication across all their switches. They are looking for a solution wherein they can use HPE Aruba Networking ClearPass Policy Manager to allow staff members from five different teams (AV team, security team, desktop/printer team, voice team, network & security team) to register these types of devices and control access to them to a specific team. This registration, visibility, and access control to devices must be self-service In addition, device registration needs to be removable on a scheduled basis.

What is the most appropriate solution for the hospital's requirements?

- A. HPE Aruba Networking ClearPass Device Insight
- **B. HPE Aruba Networking ClearPass Device Registration**
- C. HPE Aruba Networking ClearPass Endpoint Repository
- D. HPE Aruba Networking ClearPass Device Profiler

Answer: B

NEW QUESTION # 30

What should be Included in an Executive Summary? (Place the correct Items into the list at the right Order is no: Important Not all cottons will be used)

POSSIBLE INCLUSIONS

brief summary
contact information
high-level design
job roles
purpose of the document
recommended cabling
recommendations
scope
target audience

CORRECT INCLUSIONS

Answer:

Explanation:

POSSIBLE INCLUSIONS

brief summary
contact information
high-level design
job roles
purpose of the document
recommended cabling
recommendations
scope
target audience

CORRECT INCLUSIONS

brief summary
contact information
high-level design
purpose of the document
recommendations
scope
target audience

Explanation:

For an Executive Summary, typically the following items should be included:

- * Brief Summary
- * Contact Information
- * High-Level Design
- * Purpose of the Document
- * Recommendations
- * Scope
- * Target Audience

NEW QUESTION # 31

You are going with a 3-tier design and need to calculate the oversubscription ratio on the Access, Distribution, Core, and ToR Layer. What is a suitable oversubscription ratio for each layer?

2:1 4:1 24:1

Answer Area

Access

Aggregation

Core

ToR

Answer:

Explanation:

2:1 4:1 24:1

Answer Area

2:1 Access

4:1 Aggregation

2:1 Core

24:1 ToR

Explanation:

Access - 20:1

Aggregation - 4:1

Core - 2:1

ToR - Not typically applicable in a 3-tier design; however, if ToR were used, it could be 24:1 or better depending on the specific design and requirements.

NEW QUESTION # 32

A large multinational financial institution has contracted you to design a new full-stack wired and wireless network for their new 6-story regional office building. The bottom two floors of this facility will be retail space for a large banking branch. The upper floors will be carpeted office space for corporate users, each floor being approximately 100,000 sq ft (9290 sqm). Data centers are all off site and will be out of scope for this project. The customer is underserved by its existing L2-based network Infrastructure and would like to take advantage of modern best practices in the new design. The network should be fully resilient and fault-tolerant, with dynamic segmentation at the edge.

The retail space will include public guest Wi-Fi access. Retail associates will have corporate tablets for customer service, and there will be a mix of wired and wireless devices throughout the retail floors. The corporate users will primarily use wireless for connectivity, but several wired clients, printers, and hard VoIP phones will be in use.

The customer is also planning on renovating the corporate office space in order to take advantage of 'smart office' technology. These improvements will drive blue-dot wayfinding, presence analytics, and other location-based services.

The client has decided that more critical switch stacks supporting Contact Center resources will need to support greater than 600W of CL4 PoE and have redundant power supplies. These stacks will have approximately six members.

What would be the most economical choice Aruba switch series to meet these requirements?

- A. Aruba CX6200M
- B. Aruba CX 6100
- C. Aruba CX6300F
- D. Aruba CX 6400

Answer: A

NEW QUESTION # 33

ACME retail has 38 locations spread out across five US states and two provinces in Canada.

They are looking to grow 20% over the next two years. They have an HQ with a staff of 200 employees. The organization has eight Regional Managers and two VPs who work from home and the road. Stores typically have 17 employees on average per location.

The two warehouses have a remote loading system and 20 employees each to load the trucks and fulfill the online orders. The warehouse has 40-foot ceilings and large metal racks to store inventory. The main location is 240K sq ft (22300 sq m) and the Canadian warehouse is 130K sq ft (12100 sq m). The forklifts on the loading docks are equipped with a wireless tablet on board.

A typical store is reportedly about 60,000 sq ft (5575 sq m) and smaller stores are planned at 25,000 sq ft (2320 sq m). The locations need to expand the abilities to vendors that need to add setup displays or interactive kiosks in the stores.

The current infrastructure was installed in 2015 and used wireless N technology in a coverage model. The wiring is Cat5, and they are unsure of the fiber connections. The inventory is all placed on the floor when it is delivered to the local store.

Inventory control is handled through Zebra barcode scanners, and they have had a lot of issues in getting signals throughout the stores and this makes monthly inventory difficult. The organization has a small help desk to troubleshoot issues that happen at the retail locations and PC support for the office. The company is looking to upgrade away from the current PBX system later this year. With the need to grow and cut costs, they are interested in moving the data to the cloud but need to get almost real-time inventory control for the online service to function.

The network has all been wired over the last ten years, but with the new systems being all wireless, they have seen the trend to offer wireless to all the vendors for their needs but also would be to allow employees, guests, and contractors all to use it. With the new IT director starting next week, the project has been set by the CTO of the company. The marketing group has asked how they can interact with the customers and get more info, while the IT support desk needs to cut staff in half.

The office has an MDF and two IDFs located on floors one and two. The MDF is in the basement, and you have multiple WAN circuits for the HQ links. Each store has a local handoff from the cable company (ethernet) in the middle of the store in the office, so distance for the wiring is not an issue.

The customer has budget concerns but does want something that could last 7+ years.

What should the architect be concerned about regarding the solution? (Choose two.)

- A. Regulatory Domains
- B. IP addresses
- C. Active Directory

- D. multiple locations

Answer: A,D

Explanation:

In designing a network solution for ACME Retail, which operates across various regions in the US and Canada, the architect must consider Regulatory Domains and the challenges posed by multiple locations. Regulatory Domains are crucial because wireless standards and allowed frequencies vary by country, affecting how WLAN equipment is configured and deployed.

Compliance with local regulations is essential to avoid legal issues and ensure optimal network performance. The challenge of multiple locations involves ensuring consistent, high-quality network service across all sites, despite geographical distances and site-specific characteristics.

This requires a scalable, flexible network architecture that can be centrally managed while accommodating the unique needs of each location.

NEW QUESTION # 34

.....

If you want to get HP certification, you can save a lot of time and effort with our HPE7-A03 study materials. We know that you must have a lot of other things to do, and our products will relieve your concerns in some ways. First of all, HPE7-A03 exam materials will combine your fragmented time for greater effectiveness, and secondly, you can use the shortest time to pass the exam to get your desired certification. Our HPE7-A03 Study Materials allow you to improve your competitiveness. With the help of our HPE7-A03 study guide, you will be the best star better than others
