Accurate ABMM Prep Material & Free PDF American Society of Microbiology Realistic ABMM Latest Exam Camp

Our ABMM exam question will be constantly updated every day. The IT experts of our company will be responsible for checking whether our ABMM exam prep is updated or not. Once our ABMM test questions are updated, our system will send the message to our customers immediately. If you use our ABMM exam prep, you will have the opportunity to enjoy our updating system. You will get the newest information about your exam in the shortest time. It not only can help you protect your eyes, but also it will be

very convenient for you to make notes. We believe that you will like our ABMM Exam Prep.

American Society of Microbiology ABMM Sample Questions (Q127-Q132):

NEW QUESTION # 127

A research laboratory is developing a novel diagnostic assay for early detection of sepsis. They are investigating the use of host biomarkers that are rapidly upregulated in response to bacterial infection. Which of the following biomarkers has shown promise for differentiating between systemic inflammatory response syndrome (SIRS) and sepsis?

- A. C-reactive protein (CRP)
- B. Interleukin-6 (IL-6)
- C. Erythrocyte sedimentation rate (ESR)
- **D. Procalcitonin (PCT)**

Answer: D

NEW QUESTION # 128

A research laboratory is investigating the mechanism of action of a novel antiviral compound that inhibits the replication of a specific RNA virus. They find that the compound binds directly to the viral RNA-dependent RNA polymerase, preventing its elongation activity. This mechanism is most similar to that of:

- A. Acyclovir
- B. Interferon-beta
- C. Oseltamivir
- **D. Ribavirin**

Answer: D

NEW QUESTION # 129

A research laboratory is investigating the mechanisms of antigenic variation in *Trypanosoma brucei*, the causative agent of African trypanosomiasis. The parasite evades the host immune response by periodically changing its surface coat protein. This process primarily involves:

- A. High-frequency point mutations in the gene encoding the variant surface glycoprotein (VSG).
- B. Recombination between different VSG gene loci on minichromosomes.
- **C. Segmental gene conversion events involving a large repertoire of silent VSG genes.**
- D. RNA interference-mediated silencing of expressed VSG genes followed by activation of a new VSG gene.

Answer: C

NEW QUESTION # 130

A microbiology laboratory receives a bronchoalveolar lavage sample from a patient with suspected ventilator-associated pneumonia. Quantitative culture yields >10
