

High Hit Rate C_BW4H_2505 Study Tool–Find Shortcut to Pass C_BW4H_2505 Exam

P.S. Free & New C_BW4H_2505 dumps are available on Google Drive shared by Lead1Pass: <https://drive.google.com/open?id=1aO7W0SnaOhAG0S8Pcfqllbhm2vvpH0yy>

Desktop-based C_BW4H_2505 practice exam software is the first format that Lead1Pass provides to its customers. It helps track the progress of the candidate from beginning to end and provides a progress report that is easily accessible. This SAP C_BW4H_2505 Practice Questions is customizable and mimics the real C_BW4H_2505 exam, with the same format, and is easy to use on Windows-based computers. The product support staff is available to assist with any issues that may arise.

The scoring system of our C_BW4H_2505 exam torrent absolutely has no problem because it is intelligent and powerful. First of all, our researchers have made lots of efforts to develop the scoring system. So the scoring system of the C_BW4H_2505 test answers can stand the test of practicability. Once you have submitted your practice. The scoring system will begin to count your marks of the C_BW4H_2505 exam guides quickly and correctly. You just need to wait a few seconds before knowing your scores. The scores are calculated by every question of the C_BW4H_2505 Exam guides you have done. So the final results will display how many questions you have answered correctly and mistakenly. You even can directly know the score of every question, which is convenient for you to know the current learning condition.

100% Pass Quiz Reliable SAP - C_BW4H_2505 Study Tool

If you are determined to purchase our C_BW4H_2505 latest dumps materials, please prepare a credit card for payment. For most countries we just support credit card. You can click the PDF version or Soft version or the package of SAP C_BW4H_2505 latest dumps, add to cart, then you enter your email address, discount (if have) and click payment, then page transfers to credit card payment. After payment our system will send you an email including downloading link of C_BW4H_2505 Latest Dumps, account & password, you can click the link and download soon.

SAP Certified Associate - Data Engineer - SAP BW/4HANA Sample Questions (Q66-Q71):

NEW QUESTION # 66

You notice that an SAP ERP ODP_SAP DataSource is delivering incorrect values into the first persistent data layer in SAP BW/4HANA. Which options do you have to analyze a potential extractor issue? Note: There are 2 correct answers to this question.

- A. Use the transaction ODQMON (Monitor Delta Queues) in SAP BW/4HANA.
- B. Check entries in the table RSDDSTATEXTRACT in SAP ERP.
- C. Use the program RODPS_REPL_TEST in SAP ERP.
- D. Use the transaction RSA3 (Extractor checker) in SAP ERP.

Answer: C,D

Explanation:

SAP BW/4HANA Project and Modeling Process

NEW QUESTION # 67

What are prerequisites for S-API Extractors to load data directly into SAP Datasphere core tenant using delta mode? Note: There are 2 correct answers to this question.

- A. Operational Data Provisioning (ODP) must be enabled
- B. Extractor must be based on a function module
- C. Real-time access needs to be enabled
- D. A primary key needs to exist.

Answer: A,D

Explanation:

To load data directly into SAP Datasphere (formerly known as SAP Data Warehouse Cloud) core tenant using delta mode via S-API Extractors, certain prerequisites must be met. Let's evaluate each option:

* Option A: Real-time access needs to be enabled. Real-time access is not a prerequisite for delta mode loading. Delta mode focuses on incremental data extraction and loading, which does not necessarily require real-time capabilities. Real-time access is more relevant for scenarios where immediate data availability is critical.

* Option B: A primary key needs to exist. A primary key is essential for delta mode loading because it uniquely identifies records in the source system. Without a primary key, the system cannot determine which records have changed or been added since the last extraction, making delta processing impossible.

* Option C: Extractor must be based on a function module. While many S-API Extractors are based on function modules, this is not a strict requirement for delta mode loading. Extractors can also be based on other mechanisms, such as views or tables, as long as they support delta extraction.

* Option D: Operational Data Provisioning (ODP) must be enabled. ODP is a critical prerequisite for delta mode loading. It provides the infrastructure for managing and extracting data incrementally from SAP source systems. Without ODP, the system cannot track changes or deltas effectively, making delta mode loading infeasible.

References: SAP Datasphere Documentation: Outlines the prerequisites for integrating data from SAP source systems using delta mode.

SAP Help Portal: Provides detailed information on S-API Extractors and their requirements for delta processing.

SAP Best Practices for Data Integration: Highlights the importance of primary keys and ODP in enabling efficient delta extraction.

In conclusion, the two prerequisites for S-API Extractors to load data into SAP Datasphere core tenant using delta mode are the existence of a primary key and the enabling of Operational Data Provisioning (ODP).

NEW QUESTION # 68

You created a generic DataSource in SAP ERP, but did not release the DataSource for Operational Data Provisioning (ODP). What is the effect in SAP BW/4HANA?

- A. The ODP DataSource has to be created using the ODP_SAP source system type.
- B. The ODP DataSource cannot be replicated using the ODP_SAP source system type.
- C. The ODP DataSource has to be created using the ODP_HANA source system type.
- D. The ODP DataSource can be generated using the DataFlow generation feature.

Answer: B

NEW QUESTION # 69

Which external hierarchy properties can be changed in the query definition? Note: There are 3 correct answers to this question.

- A. Exp to level
- B. Time dependency
- C. Display text nodes
- D. Sort direction
- E. Position of child nodes

Answer: A,C,D

Explanation:

In SAP Data Engineer - Data Fabric, particularly when working with hierarchies in query definitions, external hierarchies are used to organize and structure data in a meaningful way for reporting and analysis. External hierarchies are predefined hierarchies that can be integrated into queries, and certain properties of these hierarchies can be adjusted within the query definition to meet specific reporting requirements.

* B. Sort direction

* The sort direction determines the order in which the hierarchy nodes are displayed in the query results. You can choose to sort the hierarchy in ascending or descending order based on node names, key values, or other attributes. This property is adjustable in the query definition to allow flexibility in how the data is presented to end users.

* In SAP BW (Business Warehouse) and SAP Data Engineer - Data Fabric, sorting options for hierarchies are available in the query designer under the hierarchy settings.

C). Exp to level

The "Exp to level" property allows you to specify the depth to which the hierarchy should be expanded when displayed in the query results. For example, if you set "Exp to level" to 3, the hierarchy will automatically expand to show all nodes up to the third level. This is useful for controlling the granularity of data displayed without requiring manual expansion by the user.

Reference: In SAP BW Query Designer, this property is part of the hierarchy display settings and can be configured during query design.

D). Display text nodes

The "Display text nodes" property controls whether text nodes (descriptive labels) are shown alongside the hierarchy nodes in the query output. Text nodes provide additional context or descriptions for each node, making the hierarchy easier to interpret for end users.

Reference: This property is commonly used in SAP BW and SAP Data Engineer - Data Fabric to enhance the readability of hierarchical data in reports.

Incorrect Options:A. Position of child nodes

The position of child nodes within a hierarchy is determined by the hierarchy's structure and cannot be altered in the query definition. It is a fixed property defined during the creation of the hierarchy in the backend system.

Reference: SAP documentation specifies that structural properties like node positions are not modifiable at the query level.

E). Time dependency

Time dependency is a characteristic of the hierarchy itself, indicating whether the hierarchy changes over time (e.g., organizational structures that evolve). This property is defined during the creation of the hierarchy and cannot be changed in the query definition.

Reference: SAP BW and SAP Data Engineer - Data Fabric treat time-dependent hierarchies as static entities in the query context, meaning their time dependency cannot be altered dynamically.

Conclusion: The three correct answers - Sort direction, Exp to level, and Display text nodes - are properties that can be modified in the query definition to customize the presentation of external hierarchies. These adjustments provide flexibility in how hierarchical data is displayed and analyzed, enhancing the usability of reports and dashboards in SAP Data Engineer - Data Fabric environments.

NEW QUESTION # 70

Which data deletion options are offered for a Standard DataStore Object (advanced)? Note: There are 3 correct answers to this question.

- A. Deletion of data from all tables
- B. Selective deletion including data of subsequent targets
- C. Selective deletion of data
- D. Request-based data deletion
- E. Deletion of all data from active table only

Answer: A,C,E

NEW QUESTION # 71

.....

You can trust the C_BW4H_2505 practice test and start this journey with complete peace of mind and satisfaction. The C_BW4H_2505 exam PDF questions will not assist you in SAP Certified Associate - Data Engineer - SAP BW/4HANA (C_BW4H_2505) exam preparation but also provide you with in-depth knowledge about the SAP Certified Associate - Data Engineer - SAP BW/4HANA (C_BW4H_2505) exam topics. This knowledge will be helpful to you in your professional life. So SAP Certified Associate - Data Engineer - SAP BW/4HANA (C_BW4H_2505) exam questions are the ideal study material for quick SAP C_BW4H_2505 exam preparation.
